

**BRITISH BUILT  
GENERATORS**

Interpower Generators is an independently owned business, with a strong reputation in the supply of power generation equipment.

Our team have over 30 years experience in the design, manufacture, export & installation of generators and associated products around the world.

Interpower generators are regularly supplied into the following markets & installations

- Hospitals
- Airports
- Banks & Financial Institutions
- Data Centres
- Commercial Buildings
- Factories
- Residential Complex
- Government Buildings
- Palaces
- Off Grid
- Rental Fleets
- Militaries, Naval & Land Based
- Telecommunications Sector
- Marine Generators
- Oil & Gas Industry

Every Interpower generator is manufactured in the UK by our team of experienced staff using only British and European supplied components.

### **Industrial**

Interpower Generator's range of industrial generators have electrical outputs from 5kVA to 4000kVA. Available as both 50Hz & 60Hz machines, and voltages up to 13.8kV, they are suited to applications where cost effective prime power is required. Markets include offices, factories and manufacturing.

### **Backup & Standby**

For critical installations that require emergency backup power, the Interpower Generators range of standby generators have been designed to offer the highest reliability. Automatic control systems ensure that the power is restored in the shortest possible time. Typical installations include hospitals, airports, and data centres.

### **Offshore, Oil & Gas**

Designed, built and tested to the toughest specifications, Interpower Generators offshore equipment is in service in the oil & gas industry around the world. In applications including FPSO, oil exploration, and decommissioning of platforms, Interpower's equipment incorporate ATEX safety features, and safety requirements for offshore operation.

### **Marine**

Suited to the corrosive environments associated with marine applications, Interpower Generators marine equipment is built and tested to society standards, including Lloyds, DNV, BV, GL, KR and ABS. Supplied to navies, exploration vessels, and other working boats, Interpower marine equipment is relied on daily.

### **Containerised**

For installations where an engine room is unavailable, Interpower Generator's container gensets can be dropped on-site to provide prime or standby power as needed. Available in capacities up to 3000kVA, and sound levels down to 65dB(A)@1m.

### **Silent & Low Noise**

Interpower Generator's soundproof enclosures offer a compact low noise power solution. Using the latest acoustic materials, and innovative designs, our super silent units are available in capacities up to 900kVA.

## Special Projects

At Interpower Generators we appreciate that sometimes a standard generator won't fit the application. As an original equipment manufacturer we are able to tailor our generators to suit the customer's requirements.

Working closely with our customers, and their consultants, we can engineer our products to offer the best solution and fit, for the installation.

Our bespoke generators are built to incorporate special features requested by the end user. From custom fuel systems, ultra low noise levels, and tailored control and monitoring panels, through to projects where power is a useful by-product, and the main requirement is heat or mechanical power.

Buying from the manufacturer, rather than a reseller of other manufacturers products, ensures that you get the right product for your needs.

## Environmental Policy

Interpower Generators Ltd adopts a responsible attitude towards the protection of the environment. The company strives to meet the requirements of all applicable environmental laws and regulations.

Interpower Generators minimises energy use, and seeks to reduce, re-use and recycle waste where possible, and for proper disposal of waste where this is not possible.

Interpower Generators is located in the market town of Malton, to the North East of York, in England.

Approximately 300km North of London. Malton is a 1hr drive from Leeds/Bradford airport, and easily accessible by rail from London, Manchester & Edinburgh through York station, which is only 50km away.
