RAYBLELON

MAIN PRODUCT

<RAYBLELON honest goods logo> is attached to the RAYBLELON products which were produced after November 1st, 2018. The product without the label is not the honest goods. Be careful for the similar product.

레이블론은 2018년 11월 1일 이후 생산된 제품부터 단상자에 <레이블론 정품 로고>가 부착되어 있습니다. 라벨이 없는 제품은 정품이 아닙니다. 유사품에 주의하시기를 바랍니다.

정품인증 홀로그램
확인하는 방법

- ① 제품 뒷면 하단의 정품인증 홀로그램을 확인합니다.
- ② 스마트폰의 "히든태그" 앱 설치 후, 마크를 스캔합니다.
- ③ 정품 인증 정보를 확인합니다.

How to confirm the honest goods certification hologram

1. Check the honest goods hologram at the bottom of product backside.
2. Scan the mark after installing the "hidden tag" app of the smart phone.
3. Check the honest goods certification information.

WHAT IS PDRN?

PDRN is already widely used as a medicinal product in Europe, and it used in Korea to promote wound healing and tissue regeneration after surgery.

Tissue organism
PDRN

=

Actually there are very few PDIN
in human placenta

**Due to ethical problems and difficulties in
Medicinal productivity, PDRN in fish is an alternative.**

=

**Medicine and
Medical supplies
Or cosmetics**

PDRN

DNA piece (PDRN) extracted and processed from the salmon sperm is excellent in regenerating our body tissue such as the skin, ligament, and tendon, and relieving the inflammation.

To be concrete, a very small amount of salmon sperm is harvested as much as 5~10ml per salmon.

The salmon DNA containing the tissue regeneration elements is used as very invaluable source as the medicine.

Macromolecule hyaluronic acid (sodium hyaluronate)

Powerful moisture power of hyaluronic acid that attracts water 1,000~6,000 times heavier than its weight

EGF

EGF called as cell regenerating factor is one of regenerating cells that heal the injury without the scar. It helps prevent aging, make the skin elastic, and relieve the scar and trouble.

Niacinamide

It is a whitening ingredient notified by Korean FDA, which helps improve whitening by preventing the melanin from coming to the epidermis and preventing the collagen's oxidation.

Adenosine

It improves the wrinkles and prevents the wrinkle creation by increasing the amount of collagen and elastin which are effective in improving wrinkles in the skin.

레이블론 롤러

— RAYBLELON ROLLER —

“ Take care of your skin ”

레이블론 롤러를 사용하여
미세한 통로를 만들어 레이블론 앰플을
빠르고 효과적으로 투입 시키세요.

표피를 손상 시키지 않으면서 레이저 시술과 같이
노화된 피부를 케어 할 수 있으며 앰플을 통한
미백효과와 탄력을 주어 생기 있는 피부 연출

540개의
미세바늘

0.25mm의
길이로 앰플
흡수율 UP

세포생성을
하는 표피층
까지 도달

일상생활
가능

인증받은 롤러

CE RoHS

1. Roller use cycle is 'once in 2~3 days'.

Do not use the roller if your skin is sensitive to metal allergy, keloid, atopy, bleeding, and infectious.

2. Make sure to disinfect before and after using the roller.

RAYBLELON Roller helps a roller needle as long as 0.25mm absorb the ample. Be sure to disinfect 540 installed minute needles for the ample absorption and fast skin improvement

3. Use the roller less than 6 times

Use the roller proper for homecare less than 6 times for the skin sanitation.
