WHY BOMBAY METAL

- ❖ Exclusively represent world's well known supplier in india
- ❖ One stop shop for ferrous & non ferrous metal.
- ❖ Capability to supply as per technical requirement.
- ❖ Capability to supply on demand.
- ❖ Competitive pricing.
- ❖ Global supply capability.
- ❖ Specialist ETP (E.C) grade copper & aluminium sheet/coil/foil/flat.
- ❖ Aluminium heating plate (coil board) for plywood ind.
- ❖ Liner & wear plate.

COPPER

Bombay Metal Corporation have Copper, Coil, Foil, Sheet, Plate, Flat Bar LME A Grade Copper Cathodes for ETP, DHP Grades. Which are use in Electronic, Electrical, Automobile, Transformer Industries.

We are Stockits of Agrawal Metal Works Pvt. Ltd.

Transformer strip.

Bombay Metal Corporation's line of copper strips also includes strips that have smooth and polished surfaces with de-burred edges for transformer windings. The precision de-burring is done on a highly sophisticated line which makes these strips ideal for electric windings in large transformers.

The transformer strips are made of ETP copper with tolerances within the limits imposed by the EN 1652 standard.

ONE STOP SHOP

BRASS

With the assistance of our qualified and experience founder **Mr. P. K. Vakhariya**, we are engaged in trading and supplying a premium quality **Brass Sheet & Strip**. These are designed using quality material, as per the industry norms and standards at reliable vendor's end in reputed organizations. The tested sheets fulfill all parameters of quality as specified by international standards of quality and design. Our precious clients are also purchased from us at industry leading prices and available sheets in various sizes and finishes, as per their requirements

ALUMINIUM

We Provide Wide Variety Of Aluminum rolled product like Coil , Sheet , Foil , chequer plate speciality Extrusion Product Aluminum Sections, Aluminum Ladders, Aluminum Composite Panel, Aluminum Rolled Products, Aluminum Grills, Chequered Plates, Roofing Sheets.

SHEETS, COILS, PLATES

Bombay Metal Corporation is a supplier of Hindalco ,Balco and Nalco for complete range of aluminum products. With increasing use in automobiles, food and beverages, building and construction and several other industries, the demand for aluminum is expected to increase exponentially. Bombay Metal Corporation' market position and core competency will put the company in the forefront to serve the domestic and global markets

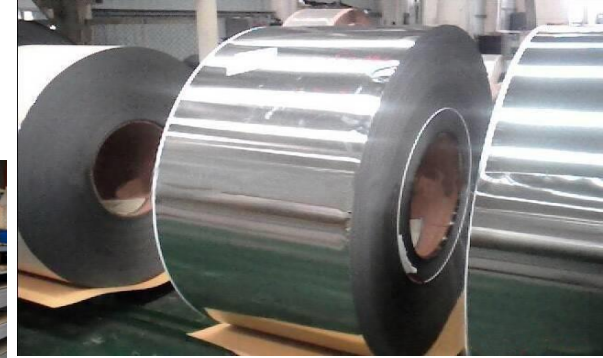

BACK

STAINLESS STEEL

We are looked upon as one of the most prominent suppliers and Stockists of Stainless Steel Coils in India. We additionally provide our customers with the availability of the Cold Rolled Stainless Steel Coils / Plates as well as Hot Rolled Stainless Steel coils /Plates in various grades, sizes dimensions and finishes as per the specifications provided.

Bombay Metal Corporation supplies all kind of stainless steel products that available in different diameters and specifications. We stock large range of all type of stainless steel products like Round / Pipe / Wire / Angle /Flat We are major supplier of stainless steel for many small and large scale industries. We believe in quality and we strive to provide exceptionally good quality stainless steel products to our domestic and international clients

WEAR RESISTANCE

Wear Resistant Plate is Magic Plate who have 400-600 High Brinell Hardness (BHN) with Superior forming, welding and wear characteristic. This steel plate is particularly suited to the mining equipments, earth moving equipments.

Wear Resistance Plate is recommended for the following applications:

- mining and earthmoving machinery
- crushing and pulverizing equipment
- buckets, knives, crushers, feeders
- presses
- skips
- excavators
- slurry pipe systems
- screw conveyors

BACK

HIGH TENSILE STEEL

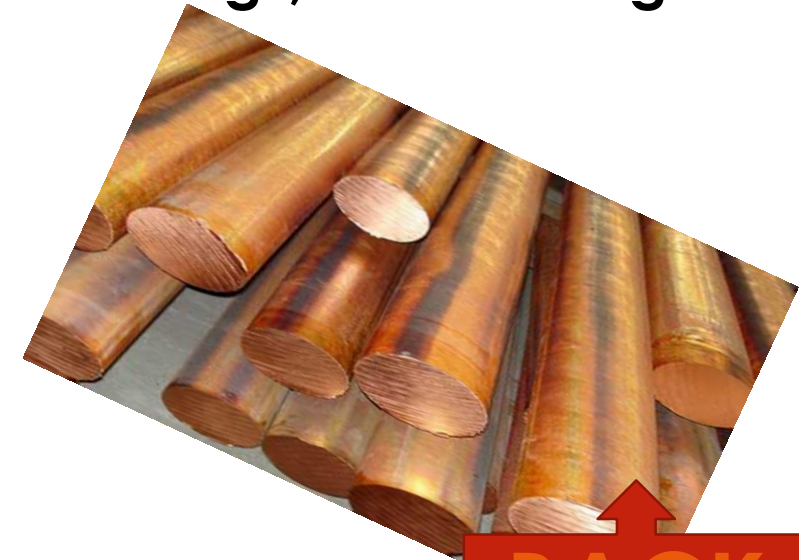

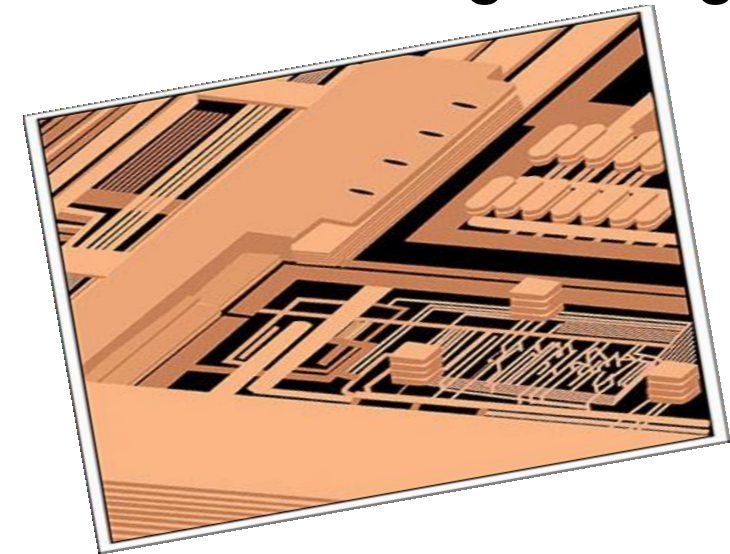

is recommended for the following applications:

- truck chassis
- lifting and hoisting equipment
- handling equipment

PHOPHOR BRONZE

- PB is a solid solution strengthened copper alloy (bronze) with different grades (I – IV) having 4% to 8% tin. Its higher tin content imparts high strength and springiness to the metal. Its adequate conductivity makes it particularly interesting for springy conductive components. It is wear-resistant, has very good corrosion resistance and can be readily soldered. Due to the high strength and springiness and good workability, CuSn is used for all types of springs, Automotive, Components of electrical Engineering, Connectors, Contact Springs, Slide Bearings, and Bushings.
