## Store & Inventory

Xactidea store & inventory will help you to control efficiently and oversee the movement of stock across all stores of your company. Our software can lessen all of your difficult works and provide you with the right materials at the right time, and in the right condition.

Other than that, you will be able to control your in-house movements including the track of your incoming goods, storage condition, identification of all stocks stored, maintenance, & lack of your stock materials.

- Multiple store
- Roll-wise & lot-wise inventory
- Real-time view to goods received and dispatched across
- locations
- Configure business rules (Tolerances & Delivery schedules)
- Maintain Reorder levels and minimum order quantities critical products.

## Sales Management & CRM

Acquiring and retaining customers in the long-term, requires not only meeting their expectations, but exceeding them. Companies can only do this if they have a full overview of their customer relationships at all times and at every location. As a result, the demands made on sales support in ERP systems are high. With Xactidea Ltd., you can manage your sales processes with ease, from pricing and bid creation to order processing and order controlling through to forecasting and early warning systems. You can reduce errors, identify trends at an early stage, plan dynamically and calculate accurately.

- Purchase Requisition Management, which can track all your placed orders.
- You can track your Purchase details report – invoice wise & purchase return processing.
- Comfortable, swift and hassle-free Sales Order Automation.
- Sales management including sales summary, full sales details, profit summary, monthly sales report.
- Loyalty Management: an effective & efficient customer database to improve customer relationship

## Procurement & Supply chain

With Xactidea ERP, you can control your procurement processes efficiently. All ordering processes are fully integrated – from queries and order proposals to purchase orders, goods receipts and invoicing. You can view, enter, select, edit and approve current purchasing transactions as well as transactions that have already been archived in the DMS. Our prime goal is providing you full authority over your business. Equipped with a better ERP tool can help you to gain a total picture of the condition of your products & where to concentrate effectively. Our Procurement & Supply Chain ERP system can help you to take fast resolutions, avoiding unnecessary fatal errors by automating them, efficiently source materials for running productions smoothly and achieving better results.

- Quick visibility to material requirements and stock in warehouses or goods on-order.
- View Fulfillment Options to efficiently utilize available stock.
- Track Deliveries & Shipments (including partial) against POs
- Supplier PO confirmations
- PO rates and product costs validated against Cost Sheets

## Quotation & Pre-Costing

Xactidea Ltd. also focuses on creating user-friendly interfaces for the existing clients and even for future clients. With our help, you can gain a firm foothold in building different business-related quotations & long term efficient pre costing solutions for business purposes. We are proudly covering these areas for our valiant clients & our consultative solutions will pave the way for a better goal oriented solution.

- Define budgets for various materials based on target quantities for a particular style.
- Multi-level/Multi Currency cost sheets with drill down (total cost, Markup % etc.)
- Build in processing costs as control point during execution.
- Time & Action Calendar (TnA)
- Customers (T&A Templates)
- Automatic trigger T&A track on receipt of customer order
- Automatic escalation of Late & Critical activities
- Exception Management

- Web development using cutting edge software technology.
- Elegant web design.
- Web Application.
- Database Management & Transfer.
- Security & Penetration testing.
- Web Hosting.
- Email & Newsletter Service.
- SMS System Integration.

## Our Cloud Services:

### 1. Amazon Elastic Cloud Compute (EC2)

The Amazon EC2 service comes under the compute domain and it provides services that help to compute workloads. Amazon EC2 web interface is used to reduce the expensive physical servers by creating virtual machines. Also, they help in managing different features of the virtual servers such as security, ports, and storage. Amazon EC2 is highly preferable while creating a virtual server within a few minutes with just a few clicks according to the user's operating system conveniently. It offers resizable compute capacity in the cloud. This helps a lot to focus more on the project rather than the server maintenance.

### 2. Amazon S3 (Simple Storage Service)

Amazon S3 is categorized under storage domain that provides data storage over the Internet services. Primarily, S3 stores data over the cloud in the form of objects. Amazon S3 stores the data with high security because of its improved infrastructure. The information is distributed over different physical regions and has a high-quality integration. This prevents the data from getting lost and helps to retrieve stored data irrespective of time and space via the Internet. Amazon S3 is highly available so that users can access their data just by one click with minimum or zero retrieving time.

### 3. Amazon Relational Database Services (RDS)

Amazon RDS comes under the Database domain of Amazon Web Services and is used to handle database related workloads. The RDS helps the users to design and manage the relational database in the cloud which stores the complex data of the infrastructure. Earlier RDS used to support MySQL and now it also supports Oracle, Microsoft SQL, and MariaDB. It reduces the operational costs and leverages the database server from maintenance and support.

## Computer network and Security

We provide Network security services to our customers to preventing and protecting against unauthorized intrusion into corporate networks. Relentless cyber criminals, disgruntled current and former employees and careless users can bring down your computer networks and compromise data. Network security's made up of the hardware, software, policies and procedures designed to defend against both internal and external threats to your company's computer systems. Our Security eningeers are constantly monitors customer network and proactively inform the cusomer.

## IT audit Services

Our IT audit services focused on helping clients reduce risk while increasing efficiency and effectiveness. Our professionals include audit and security experts, network specialists, IT managers, programmers, and business analysts. XactIdea's management team maintains industry-relevant certifications such as the Certified Information System Auditor (CISA), Certified Information System Security Professional (CISSP).

# Penetration Testing

XactIdea offers complete penetration testing designed to identify system vulnerabilities, validate existing security measures and provide a detailed remediation roadmap.

Our team, equipped with the latest tools and industry-specific test scenarios, is ready to deliver a thorough checkup to pinpoint system vulnerabilities, as well as flaws in application, service and OS, loopholes in configurations, and potentially dangerous non-compliance with security policies.

XactIdea performs the following types of a penetration test

- Network services test.
- Web application security test.
- Client-side security test.
- Remote access security test.
- Social engineering test.
- Physical security test

We apply 3 recognized penetration testing methods

- Black Box testing (external testing).
- White Box testing (internal testing).
- Grey Box testing (combination of both above-mentioned types)

## Plugin Development

Xactidea's another expertise field is "plugin development". We all know that a properly structured WordPress themes work like gravity, & plugins are the one whose duty is to keep them on it. We offer a team of highly experienced developers who are adept at building plugins for various CMS.

We have developed so many automated WordPress plugins which are helping our customer to grow their business.

- "YT Monster" which is working on automated Youtube Video Processing into client site.
- "Auto SEO" helping to improve site's SEO with full automation.
- "Sitemap Master" etc.
- "Hunt Keyword" which is hunting 3rd party "keyword" automatically based on sites' niche.

## Web Hosting

Our secure hosting platform, complete with cPanel, offers a 100% uptime guarantee, unmetered bandwidth. Xactidea Ltd. operates web hosting in Bangladesh with 100% client satisfaction. Unlike any business, hosting services need full-time support with high level IT technical knowledge. However, only dedicated support is not enough; need a stable hi-quality server and latest hardware equipment to keep web host up and running. Xactidea Ltd. has done extensive work on those two key factor and professionally established the standard to grow a business. We don't believe the 24hour support is a promotional word, but we do practice in practical since we have started the hosting business. In consideration of price, we do not provide cheap web hosting, but we offer an affordable price. We ensure the top quality hosting at a reasonable cost. We understand for your business how vital the website you hosted to us. We treat our clients every single website as is ours. If you are looking for top web hosting company in Bangladesh, you are in the right place.

## Our Email Services

With our hosted email service, you are renting high-quality email servers to manage the communications of your business. Some hosting providers offer free email hosting options with very few features and little to no support. Private email interface that gives you more flexibility and power. Professional web-based email takes place when both incoming and outgoing emails are managed by a cloud mail server, which is one of the reasons so many business owners choose Private Email.

## Our Valued Clients
