

Damaged Luggage Application

An application for report and manage damaged luggages at for airlines, airports and ground handlers

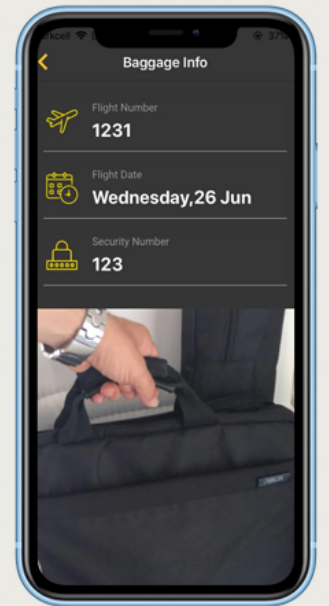

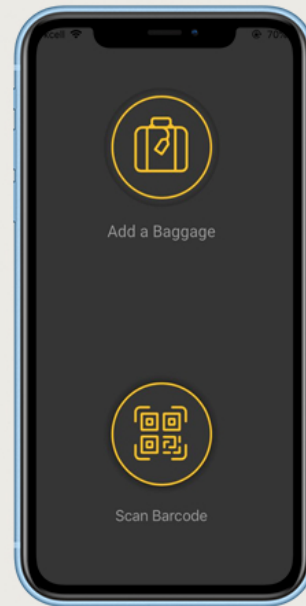

Havatech Damaged Luggage application allows you to report and manage damage of your flights. you can make a report and file passenger's claim at airport. By Havatech application you can inspect the luggage in order to provide compensation.

Every airline has a baggage policy that states which types of baggage damage and the airline will pay for and also which items are excluded from repair or reimbursement offers. By this application you can manage all your policies.

When a passenger ask for compensation, you should take a picture of his or her damaged bag and then scan boarding pass barcode by your phone. application will automatically files damaged bag.

Havatech Damaged luggage features include:

- Damaged luggage application developed and can run both on android and iphone.
- Ability to install on any tablet or mobile phone.
