

Ship Maintenance System

Prime Marine

Vessel Maintenance Software

- Prime Marine is a maritime software company in Italy that specializes in providing Ship Management Software that consists of systems such as planned maintenance system for ships - PMS, safety management system for ships - SMS/ HSEQ / HSQE / QHSE / HSSE , a procurement management system for ships, and a ship crew management system.

Ship maintenance management software

- This software together forms a complete maritime ERP software that helps ship owners and managers with activities related to ship management. The ship planned maintenance system effectively handles breakdown maintenance jobs as well.

Ship fleet management software

- The Prime Marine technical management software is built from experience gained over the successful deployment of products for organizations such as MOL, NYK, SHELL, Unix Line, SMIT Lamnalco, Seaspans and various other maritime organizations.
