# About SSSL

Founded in 1995, Sentry Security Services Ltd. is one of the largest security service providers in Bangladesh with over 5,500 employees deployed across the country. For the past two decades, SSSL has experienced consistent growth and enjoyed profitability each and every year under the direction of Mr. Hasanul Islam, The Managing Director.

We are proud to be one of the few security companies offering the depth and range of services capable of providing the most comprehensive protection solution. We have operations in all 64 districts and Regional Offices in all the Divisional headquarters, including major district cities.

SSSL first established itself as an industry leader by being the top choice for security services in the telecommunication sector—both in corporate and field level. These roles require security solutions with a two-fold objectives: ensuring asset protection & theft/crime reduction and at the same time customer service.

As SSSL continued to expand, we turned our attention to major multi-national and corporate industries. Continuous development is what we firmly believe in—and it is with these strong partnership we continue to excel. As the industry changed to meet demands of a more volatile world and the emergence of new technology, SSSL embraced these new development. Our sophisticated Technical Division is capable of providing state-of-the-art electronic security and fire detection solutions.

In recent years, SSSL adopted a consultative approach to client security needs. Knowing the diverse requirement of each and every client, and the challenges of understanding and measuring the effectiveness of these requirements are critical to our success. Our strong Operations and Customer Relations Teams proactively reach out to the stakeholders as part of this approach.

## We are proud member of:

- o Bangladesh Professional Security Services Providers Association (Founder member)
- o American Society for Industrial Security (ASIS) International.
- o Association of Certified Fraud Examiners (ACFE), USA

Our broad range of services include every aspect of crime prevention, asset protection, loss recovery, security solutions and fire safety. Please see below informational inserts about our services:

SSSL has professional security personnel deployed at hundreds of locations across the country. We are your one-call solution for professional, trained and customized security service:

- Countrywide coverage with a single point of contact for all scheduling, operations and accounting.
- Protection of your company's assets, facilities and employees.
- Trained, motivated and insured professional security personnel.
- All security staff provided with extensive proprietary training and background check.
- 24/7 operational support from our Security Control Room.
- Customized security procedures and training tailored to your specific needs.

We are one of the top-ranked security service providers in Bangladesh. We have footprints in

- o Government Organizations
- o International NGOs (e.g., United Nation ,World Bank, IFC)
- o Embassies and High Commissions
- o Telecommunication Sector
- o Bank & Financial Institutions
- o Pharmaceuticals Sector
- o Media Organizations
- o Corporate Organizations
- o Hospitality Management Sector
- o Oil & Gas
- o Hospital
- o Power Sector
- o Education Institutions
- o Garments & Textiles

SSSL maintains a wide recruitment network, and our selection procedure is very robust. As such, we are able to meet your customized needs and make sure your company's security is seamless and cost-effective.

# Our Services

## Cash-in-Transit (CIT)

### Cash-In-Transit (CIT)

SSSL offers secured banking movements that protect your staff and cash against robbery.

Our CIT service saves your and your staff's time-consuming trips, cash carrying risk and finally it gives a cost effective solution to our valued clients. SSSL is highly experienced in providing CIT services to a wide range of customers including financial institutions, retail and small businesses. We are also in the process of providing end-to-end ATM services, including cash supply, replenishment and maintenance.

### Benefits of using our CIT Services

- We arrange collection of your cash and cheques to a schedule that suits you.
- We ensure your funds are delivered to your nominated bank/place anywhere within the same business day.
- We accept liability for your cash on a declared value basis from the time of collection until delivery to your bank/palace, backed by liability Insurance.
- We maintain a pull of fully licensed and trained armed security personnel to protect against any robbery incident.
- We operate throughout the country.

# Our Services

### Security Consulting:

We are proud to have seasoned professionals with extensive background in security, law enforcement, military and corporate. Our team includes Certified Protection Professional (CPP), Physical Security Professional (PSP), professional consultants, investigators and personnel trained in industrial security and counter-terrorism.

Effective security begins with good planning. SSSL's diverse consulting services include:

- o Threat / Risk assessment, security survey/audit
- o Corporate site security management
- o Security planning, from Post Orders to Emergency Response Protocols
- o Crime Prevention Through Environmental Design (CPTED)
- o Pre-employment screening, background checks and due diligence
- o Corporate investigations
- o Event security planning and management
- o Security, safety and emergency planning training programs
- o Pre-strike labour disruption planning
- o Fire and personal safety training

SINCE 1995

# Our Services

Executive Protection, Home Security

## Executive Protection:

SSSL maintains a pull of trained veterans who have extensive experience of providing close protection to high profile VIPs, CIPs, including Head of States and celebrities. We are seasoned in providing protection to high profile corporate executives, including expatriates and families. We value your confidentiality and understand your priority.

## Home Security:

We install security system in your home, to help protect your home, valuables and loved ones against burglary, robbery and intrusion. You will be instantly notified via SMS of any intrusion, you may also view the CCTV on your smartphone. We also provide short-term security services to protect your home, while you are away on vacation.

# Our Services

## Electronic Security Systems, CCTV System

### Technological Solutions

#### Electronic Security Systems:

When it comes to electronic security systems, you need a partner to rely on—who can, not only design and install a system, but also efficiently maintain as well as respond to emergencies irrespective of time. SSSL's professional technicians conduct threat assessment/survey and proficiently install complete Security systems, starting from a single camera, through combinations of alarm, CCTV, access control, biometric screening and monitoring features all the way to state-of-the-art solutions. You can either remotely monitor, or arrange on-site monitoring with tactical response—we can develop procedures for you too. Our trusted, reliable Technology Team will provide dedicated onsite service to ensure minimal disruption to your business.

### CCTV System

We design CCTV systems meeting your needs which will deter theft and vandalism, monitor employee safety and high traffic areas. We have varieties of camera solutions—starting from sophisticated ones which provide excellent video images even in low light situations. SSSL also offers network IP cameras which are stand-alone devices that allow a user to view live, full motion, high quality video from anywhere on a computer network, even over the internet.

# Our Services

Access Control, Intrusion Alarm Systems

## Access Control

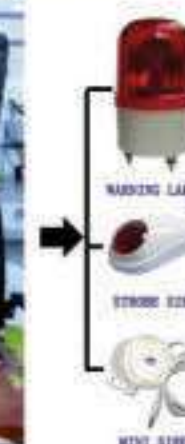

Whether you need a small stand-alone system or a large multi-site networked configuration, SSSL has a system to meet your needs. An effective access control system will reduce theft, protect valuable assets and monitor/limit access to sensitive areas. By limiting access, you can effectively control your business and provide a safe environment for your employees. These systems are supported and interfaced with sophisticated door monitoring and intrusion alarms to provide a complete security solution.

## Intrusion Alarm Systems

SSSL designs and installs alarm system which will allow you to know the status of your premises remotely. Know exactly when your security system has been armed or disarmed via e-mail. Monitor your home or office cameras, motion sensors, temperature and more from your smartphone.

Biometric Time Attendance

# Our Services

Fire Detection Systems, Smoke Detector

## Fire Detection Systems

SSSL provides a full range of services for fire alarm systems, smoke alarm/detectors, heat detectors, and other fire related equipment. We design and install both conventional and addressable devices and fire alarm panels.

In regards to the RMG Sector, we are very thorough on Alliance/Accord Fire Safety Standards, and our professional engineers will design & install your system as per NFPA and BNBC requirements.

## Smoke Detector

Smoke detectors that are properly installed and maintained play a vital role in reducing fire related deaths and injuries. They save lives. If there is a fire in your building, smoke spreads fast and you need smoke alarm detectors to give you time to get out.

# Our Services

Heat Detector, Strobe and Horn

## Heat Detector

Heat detectors are most suitable for environments where rapid fire development are expected. They are basically of two types, rate-of-rise and fixed temperature. Faster detector response may be obtained by reducing the spacing between the detectors.

## Strobe and Horn

Designed for life safety, performance and reliability, our weatherproof audible Strobe and Horn appliances are third party certified—meeting all international Standards. These weatherproof horn and strobes are listed for outdoor applications (e.g., heavy rain, humidity, corrosion).

# Our Services

## Fire Alarm Panel, Voice Communication

### Fire Alarm Panel

A Fire Alarm Panel is the controlling component of a Fire Alarm System. The panel receives information from environmental sensors designed to detect changes associated with fire, monitors their operational integrity and provides for automatic control of equipment, and transmits information necessary to prepare the facility for fire based on a predetermined sequence. The panel may also supply electrical energy to operate any associated sensor, control, transmit or relay.

We offer both Conventional and Addressable Fire Alarm Panel—meeting your particular circumstances.

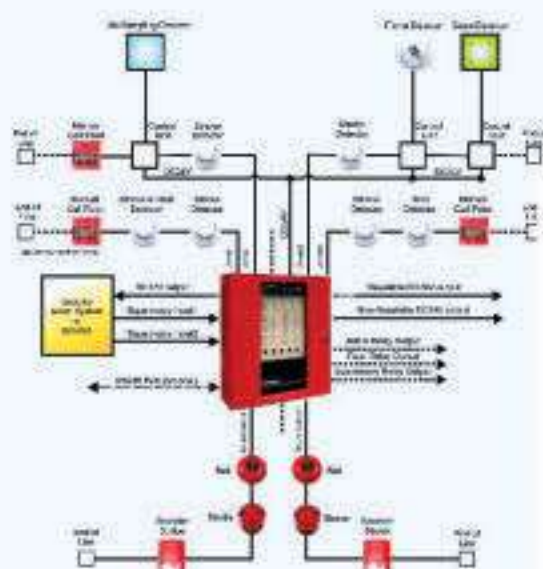

### Voice Communication

Latest international Standards demand that Fire Alarm Systems to expand their services voice evacuation capabilities to support new requirements for mass notification, including support for multiple types of emergency messaging (i.e., fire, inclement weather, security alerts).

Some fire alarm systems provide pre-recorded and manual voice messages. On the other hand, voice-based systems provide response personnel with the ability to conduct orderly evacuation and notify building occupants of changing circumstances.

CONVENTIONAL FIRE ALARM SYSTEM ARCHITECTURE

# Our Services

## Fire Doors, Systems Maintenance

### Fire Doors

A fire door is a door with fire-resistance rating used as a part of passive fire protection systems to reduce the spread of fire or smoke between compartments and to enable safe egress from a building or structure.

We supply Canadian manufactured, UL-listed fire doors with very competitive price. All doors and hardware are equally certified and labelled, and fully comply with Alliance/Accord's requirement for the RMG Sector.

### Systems Maintenance

Maintenance program is no less important than properly designing & installing a system. SSSL will design a maintenance program specific to the system and equipment already installed at your facility. Regular maintenance of your security and fire detection system will provide many years of service to reduce system downtime.
