UNIFIED COMMUNICATIONS AND COLLABORATION

We are providing following UCC Solutions:

Contact Center Solution

Contact Center portfolio delivers everything your business needs to transform customer journeys into Omni channel experiences. Those experiences empower customers to engage with you on their terms while optimizing your workforce.

Hospitality Solutions

Guests are actively engaging with your establishment more than ever before. Whether you are a hotelier or in the cruise ship industry, how guests view and review your service is of utmost importance. The answer is scalable, reliable communications that provide the best customer experience to guests while streamlining your operations.

IPBX Solution

An IP-PBX is a customer premises business phone system that manages telephones throughout the enterprise and acts as a gateway to both voice and data networks. An IP-PBX allows you to place calls using a network instead of standard telephone infrastructure.

Audio & Video Conferencing

Help your team collaborate from anywhere. Our HD video conferencing equipment helps you catch every nuance and get more done.

SIP Terminals

SIP phones offer exceptional features and flexibility in an open-standard enterprise grade IP telephone.

HOSPITALITY SOLUTIONS

PERSONALIZE SERVICES WITH MOBILITY

Incorporate small gestures that make a big difference — remember guest names and preferences, provide timely service and protect their privacy at all times by integrating with hospitality management solutions and contact center routing.

Offer guests relevant content to enrich their experience and promote revenue-generating services based on known guest preferences. With a multi-lingual, interactive guest app, you can customize your guest experience and build rapport for lifelong customers.

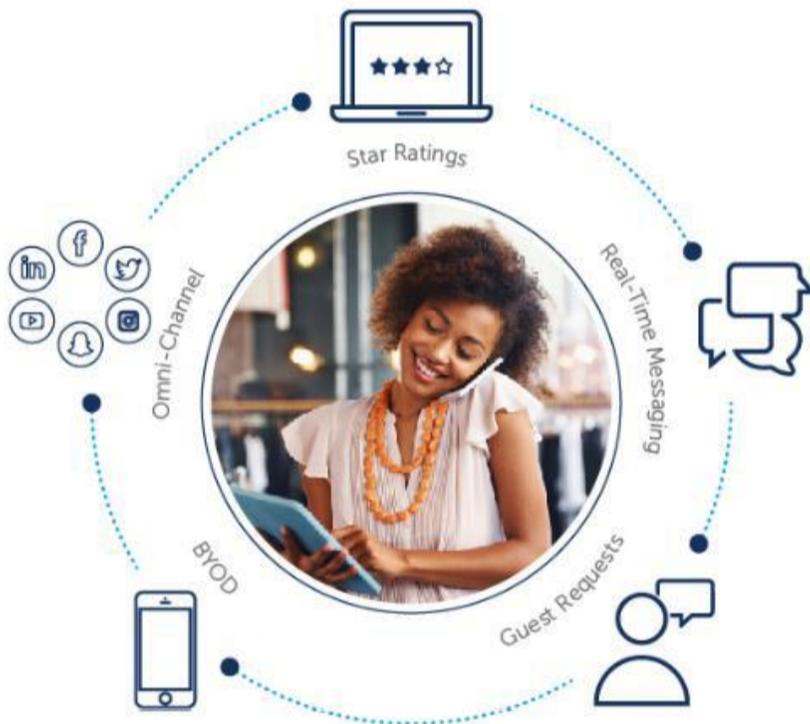

STRENGTHEN GUEST ENGAGEMENT

With contact center routing, real-time messaging and bring-your-own-device integrations, use multiple communication channels to interact with guests and promote your brand, services, restaurants and amenities before, during and after their stay.

Stay available with omnichannel communications

Be responsive across multiple locations with management system integrations

EXCEED GUEST EXPECTATIONS

Provide guests with unexpected conveniences, such as the ability to use their mobile device as an extension of your telephony system.

- Enable guests to stay connected wherever they are on your property
- Easily present services and simplify booking to boost revenue per available room

Mitel Connected Guests - Hospitality Clients

STRUCTURE CABLING AND NETWORKING SOLUTIONS

Intelligent Cabling Solutions

Intelligent Cabling Solution is based on common cabling system and has real-time monitoring function, can monitor and manage all the on-off link on all the complete information, to achieve real-time monitoring.

Cabinets System

Manufactures cabinets complying to ANSI/EIA RS-310-D, IEC60297-2, DIN41494 part 1, DIN41494 part 7 in Wall mount and Floor mount version. The VE and VB series of cabinets offers greater flexibility for installing various networking accessories like Network switches, Server farms and other various accessories. Designed with Customer ease of maintenance in mind these cabinets come with host of optional accessories and features.

Modular Data center solutions

Integrated Modular DC is with pre-integrated high-performance data center rack systems, intelligent closed cooling channel system, highly reliable power supply and distribution systems, energy efficient refrigeration systems, intelligent ring centralized management system and integrated modular pre-terminated wiring system.

INTERNET SERVICE PROVIDER

AKTL has two ISP business units, AKTL which caters to all our Dhaka based clients, and AKTL which does so for our Chittagong based clients. Our network ensures excellent quality, high capacity and low latency internet connectivity. We have established our own dedicated link through an underground fibre optic via NTTN and radio. Our network maintains redundancy of all hardware used. SEA-MEE-WE-4 and ITC cables ensure fast access speeds to the World Wide Web.

Dedicated Internet Connectivity

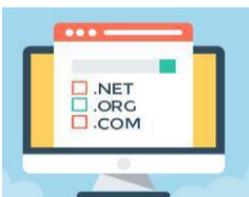

Dedicated Bandwidth Internet is AKTL's network flagship product. Dedicated link is established using our own fiber optic, Underground Fiber Optic via NTTN and RADIO. Our network ensures excellent quality, high capacity and low latency internet connectivity. Our networks using International BW, GGC BW and BDIX BW.

Data Connectivity

AKTL provides data connectivity via underground fiber optics and GSM 3G (ROBI/Banglalink) based data communication services for the corporate customer's all over Bangladesh. Keeping in mind that the low cost but a robust communication link is a main concern. AKTL gives access to virtually unlimited and manageable bandwidth and network coverage. We provide uninterrupted network availability 24/7.

Domain & Hosting Services

Domain Registration

The prominent domains are .com, .net, and org, and the country code top-level domains (ccTLDs). For Bangladesh the country code top-level domain (ccTLDs) is .bd. AKTL provide domain registration service for all the prominent domains and also registrar the .BD domain from BTCL on behalf of customer.

Hosting Services

Web hosts are companies that provide space on a server owned or leased for use by clients. As an ISP, AKTL also offer this service to subscribers. AKTL provide an interface or control panel for managing the Web server and installing scripts, as well as other modules and service applications like e-mail solution.
