

Sahih Exports

Ensuring Best Quality

Sahih exports is a company which works with the motto of exporting agricultural produce and spices around the world ensuring the best quality and price. Our team works very smartly to incorporate farmers, traders and suppliers to get the supreme quality of goods at competitive prices.

About us

We are a small company founded in 2019 with big dreams. Our first phase of incorporating farmers, traders and suppliers for agricultural commodities is complete and we are supplying goods to various international brokers the supreme quality of goods. We are also exporting spices and agricultural commodities to some of our foreign clients in Asian countries.

Our target is to go multinational very soon, so that we can control prices inflation and avoid losses.

Products

Ginger

Ginger is a flowering plant whose rhizome, ginger root or Ginger is widely used as a spice and a folk medicine. It is an herbaceous perennial which grows annual pseudo stems about one-meter-tall bearing narrow leaf blades.

Garlic

Garlic is a species in the onion genus, *Allium*. Its close relatives include the onion, shallot, leek, chive, and Chinese onion. It is native to Central Asia and north eastern Iran and has long been a common seasoning worldwide, with a history of several thousand years of human consumption and use.

Cardamom

Cardamom, sometimes cardamon or cardamum, is a spice made from the seeds of several plants in the genera *Elettaria* and *Amomum* in the family Zingiberaceae. Both genera are native to the Indian subcontinent and Indonesia.

Turmeric

Turmeric is an ancient spice that has been used in Asia for culinary, as well as medical applications for approximately 2,500 years

Onion

Onions are vegetables. They are plants in the genus *Allium*. When people talk about onions, they usually mean garden onions. Most species of onions have bulbs that people can eat. They have a strong flavour and a very distinctive smell.

Red Chilly

The chilli pepper, chilli pepper, or more simply just "chilli", is the fruit of the plants from the genus *Capsicum*, which are members of the nightshade Family, *Solanaceae*. Even though chillies may be thought of as a vegetable, their culinary usage is generally as a spice, the part of the plant that is usually harvested is the fruit, and botany considers the plant a berry shrub.

Tomatoes

Tomatoes are the richest source of lycopene which is important for the health of the prostate gland in men. They were first brought to Europe in the mid 1500's. The first tomatoes in Europe were yellow varieties. A tomato is a fruit.

Cloves

Cloves are the aromatic flower buds of a tree in the family *Myrtaceae*, *Syzygium aromaticum*. They are native to the Maluku Islands in Indonesia, and are commonly used as a spice. Cloves are available throughout the year owing to different harvest seasons in different countries.

Fenugreek

Fenugreek is an annual plant in the family *Fabaceae*, with leaves consisting of three small obovate to oblong leaflets. It is cultivated worldwide as a semiarid crop. Its seeds and leaves are common ingredients in dishes from the Indian subcontinent.
