

Dedicated to People Flow™

CARS TO MATCH YOUR BUILDING

KONE Design Collection

Basic

The basic collection is meant for buildings that need functional designs which are at once simple and stylish.

A choice of single color and dual color painted walls add interesting variation and helps in matching the car to your building. For a more durable and attractive outlook for the car opt for the stainless steel collection.

Both spot lights and diffused light ceilings are available to enhance the lighting and match your ambience. Choice of strong and mild airflow are meant to meet your specific ventilation requirements. Choice of handrails and mirrors add to variety.

The KDS 50 series of signalization is provided as a standard and the new KSS 280 series can be selected as an option to add a touch of class to your elevator car.

NOTE

- For the design collection, car sizes are available in general from 4 passenger to 17 passenger. Some specific designs may have restrictions in size. Please confirm with our sales team
- Glass cars shown here are available upto 1600 mm car width
- For 33033P3Z Blue flow glass car, the available car width is limited to 1400 mm
- All design collections shown here are with automatic car doors. For other type of doors please contact our sales team
- The quantity of lights and fans will vary according to the car sizes selected
- Ceilings have two types of fans. Axial flow fans are centrally mounted with diffusers for strong air flow. Cross flow fans are mounted on the sides and provide mild airflow
- Where skirting is provided it is made of Silver Hairline stainless steel unless specifically mentioned
- The COP will be provided on the front wall if the width of the car is sufficient. Otherwise it will be on the side wall
- KONE reserves the rights to make change in design with equivalent components due to changes in supply of materials and for improvements
- The color and finish shown here may not exactly match final product due to limitation of print and varying car sizes. Samples can be provided where needed. Please contact our sales team
- When handrails are provided on side walls, the number and size of the handrails will vary according to the type of COP on the side wall. Please ask for details from our sales team
- The renderings are not always shown with the standard components. The text defines the standard specification. Alternate components can be asked for to customize your design according to your need and our sales team can provide details.

Standard

The standard design collections are done to enhance the outlook of your building with richer materials and a wider choice. Textured stainless steel, special colored stainless steel, combination of painted and stainless steel, DECO™ and Etched stainless steel for the walls provide an exiting choice to raise the bar.

The Etched stainless steel collection now sports patterns that have been designed specially for our customers by our award winning global design team.

Patterned PVC floors and Stone floors add a touch of class in addition to the functional PVC floors.

The ceilings are designed to attract and yet complement the rich interior.

KDS 300 and KDS D design signalization are available to make user interface a special experience.

This design collection raises the standard - it is now the standard to be delighted !

Premium

When exclusive design is what you seek, KONE's Premium Design collection is where you go. For the first time in the Industry, special materials are made available as a pre designed collection.

Printed stainless steel walls bring color to the stainless steel world creating magic. The laminate cars with the special colored stainless steel are meant to create a WOW! And the three glass series cars can impress anyone who enters.

KONE's global design team have handpicked the materials and matched them painstakingly to ensure that each car is an art. Attention to details is what makes these cars such a delight to step in. LED[†]lights for the ceilings and special lighting methods enhance the ambience.

It is a car that you must experience !

[†]CL70 ceiling does not use LED lights.

KONE provides innovative and eco-efficient solutions for elevators, escalators and automatic building doors. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernization. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life-cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE MonoSpace®, KONE ManiSpace™, and KONE InnoTrack™. You can experience these innovations in architectural landmarks such as the ALDAR Properties Headquarters in Abu Dhabi, the Marina Bay Sands resort in Singapore and the Red Apple building in Rotterdam.

KONE employs approximately 35,000 dedicated experts to serve you globally and locally in over 50 countries.
