COMPANY OVERVIEW

ABOUT US

Stack Solution is an emerging IT Solutions Provider and Software Training institute in Bangladesh. We use the latest, secure, and scalable technologies to build world-class software solutions. To make an impact on information and technology, we have various IT related services. Quality Services, Customer Satisfaction, and Teamwork are our key values to represent Bangladesh in this borderless world of internet and technology.

If your ship
doesn't come in,
**swim out to
meet it!**

OUR MISSION

To provide world-class feasible IT Business Solutions and IT training that Bangladesh can proud of. We want to contribute to this rapidly changing world of technology and make an impact on our society through the flow of information and technology.

COMPANY VALUES

Quality Services: In terms of IT Solutions we want to establish "Stack Solution" as a synonym of QUALITY. Quality services come in the first place no matter what we did, what we are doing, and what we think to do in the future.

You can't give it
outside, if you
can't take it
inside.

Customer Satisfaction: A sumptuous food item is worthless without salt. The same goes for a quality product without customer satisfaction. It creates no value at all. That's why one of our main concerns is clients' demands and satisfaction. Our dedicated team is always ready to reach their level best to achieve client satisfaction.

Teamwork: A single piece of stone can never make a pyramid. So when we are talking about changing the whole society with bit and bytes, it's crucial to have a team of creative people who love to take any challenges to establish that big dream. Every single team member of Stack Solution is a piece of precious stone and as a whole, we are going to build that pyramid.

Passion: Stack Solution doesn't believe the so-called "9 to 5" job system. Here we work as a family where everyone is passionate about their responsibilities. We have established an environment that forces us to think out of the box and produce world-class products. Our dignity lies in the quality of our products.

STATEMENT FROM THE LEADER

HM Nayem

Founder &
Chief Executive Officer

I DREAM...

I dream one day we (Bangladeshi) will have a giant tech company that will be recognized by each person in the universe. To make this dream come true we need truly skilled people. We need to learn, promote, and implement modern technologies. We need people who can risk their lives for our country. This is just a dream but this dream is the only source of our motivation.

A captain alone can never cruise a ship. He needs brave crew members to voyage successfully. I have got a team of brave skillful people who can risk anything to represent Bangladesh in the world stage.

If I want to succeed in any field- first, I have to know how to generate successful people around me. Now we are training thousands of students around the country. This is our main vision to have the best people serving our country in the field of technology.

“Our mission is to provide the highest level of information and professional services for members and their clients worldwide”

STATEMENTS FROM 2ND IN COMMAND

Shegufa Taranjum

Co-Founder &
Chief Operating Officer

I HOPE...

As our country is still struggling to hold her ground in the software industry. Stack Solution will develop software shoulders and Bangladesh will satisfy its needs. Today they count our population, One day they will count our human capital. I am following my heart and it will surely take us to the pinnacle of success.

I BELIEVE...

Everyone has a dream to do something, I also had. But while starting my journey, I face the lack of enough resources to learn technologies in Bangla. That lacking encouraged me to search for the proper solution. Everyone says, you need money to do something big, but the truth is - there are many ways your compassion, mentality, intelligence and most importantly your knowledge will influence how much money you will earn. The best way to contribute to our country is to contribute ourself.

Shayaike Salvvy

Co-Founder &
Chief Strategy Officer

MEET OUR DEVELOPMENT TEAM

Our Development Team consists of professionals who do the work of delivering a potentially releasable Increment of "Done product" at the end of each Sprint. All of our highly qualified software engineers have vast experience working with the latest technologies on the most challenging and innovative projects in the market. HOW IT WORKS? THE PROCESS

Company projects

Design & Develop

We have designed and developed several projects like Journal, Course Site, Educational Platform. Stack Journal is a platform where people can share their thoughts. Stack courses site is a place where people can get quality learning resources related to technologies. SL3 is a programming learning platform to simplify programming fundamentals.

Education

Stack Solution runs online and offline bootcamps to provide world-class IT training. We also have a dedicated YouTube channel to offer free resources about programming and technologies. We have thousands of students worldwide.

Consultancy

We provide Stack Consultancy with the motto "**Your Confusion, Stack Solution**". Through social platforms and offline we have provided consultancy that matters to our clients. We are always open, frank, realistic about the problems so that we can make an impact and ensure the best guidance for our clients. Stack Consultancy is one of our main forces to establish Digital Bangladesh.

Web & Mobile Apps

We are building the Android and IOS app of SL3 Programs which stands for Stack Learner Language Learning Program. SL3 is a dedicated platform to learn programming fundamentals which was featured in mainstream print and online media in Bangladesh. Stack Journal and Stack Courses site are two of our Web Apps that are being used thousands of uses every day.
