

About us.

We are a commercial electrical contracting company who has been offering electrical services in Kampala Uganda since 2012. We are well qualified to service you for all of your electrical needs. Over the years, we have done a diverse amount of commercial electrical work. Many of our projects include hospitals, schools, industrial buildings, residential houses.

We are capable of design and build electrical work as we have in house engineering.

Our electrical engineers have over 15 years of experience in the electrical field. We employ licensed Electricians who are highly trained and dedicated.

Weighcom Electrical Services Offers an Array of Electrical Services for Commercial and Industrial Projects of Any Size and Scope

If there's something you need but can't find in our service overview, just give us a call. One of our courteous professionals can create a solution tailored to your individual needs.

Our electricians can provide you with a full consultation to explain all of your available options so that you can choose the system that's right for business.

Services

Whether it's a new build or addition, our team gets in and out fast, providing quality electrical work while meeting timelines and budgets.

Weighcom Electrical Services Offers an Array of Electrical Services, some of which have included Power line construction, electric power distribution, electrical wiring, electrical planning, Lightning protection service, electrical earthing, CCTV Camera installation, Solar system installation, diesel generator service and repair. We are the right people to serve you.

Our electricians are experts in all domestic electrical jobs. Our friendly and reliable electricians can carry out everything from full electrical wiring to simply upgrading current electrical installation. Like so many of our domestic customers, once you have used our services, you will be sure to keep our business card close to hand.

We install Single phase in domestic environments or where the load is relatively light. For example, lighting, heating or electrical sockets for regular household appliances.

Single phase is generally installed in residential properties unless the property is particularly large, as it may require a greater load and require use of a three phase 415-volt electric power system.

Electrical **WIRING** and **upgrades**

- We are the leading local Kampala electrical contractors for any type of wiring.

- If you live in Kampala area and other areas of Uganda and are looking for an electrician to help upgrade the electrical wiring in your commercial and industrial building, you have come to the right people!
- **ELECTRICAL EMERGENCIES**
- **Our Electrical Engineers are experts in domestic, commercial and industrial emergencies**
- We know that emergencies don't always happen during normal business hours. That's why we offer services before and after our regular business hours, as well as on weekends. – we can help!

POWER LINE CONSTRUCTION

Our power line construction provides comprehensive power line services including Electric power distribution, Overhead power line construction, underground utilities, electrical wiring or electrical installations for both domestic and commercial clients and many other power line construction services we offer in Uganda.

Our qualified electrical linemen and electricians possess extensive experience with power line construction services including Electric power distribution lines for industrial clients throughout Uganda. Our focused experience has given us a deep understanding of the unique characteristics and safety precautions of electric power distribution operations.

ELECTRICAL EARTHING AND LIGHTNING PROTECTION

We install Earthing to protect you from an electric shock. It does this by providing a path (a protective conductor) for a fault current to flow to earth. It also causes the protective device (either a circuit-breaker or fuse) to switch off the electric current to the circuit that has the fault. Electrical earthing conducts excessive electricity to the ground to avoid electric shocks.

Lightning Arrester Installation

We install lightning arresters on houses to avoid being struck. A lightning arrester provides protection by routing the excess electricity away from the system into the ground, where it dissolves without doing any harm.

ELECTRICAL CONDUITS FITTINGS

Electrical conduits are metal, plastic or fiber pipes designed to protect electrical cables and wires. They're used in just about every residential and commercial establishment, especially for wiring that is either exposed, or fitted outdoors. Since they are essentially a safety feature, we select for you the appropriate material, size and fittings based on the environment of the installation and the type of wiring it'll be housing. We are your Number one Kampala experts in Electrical conduits fitting in Uganda. Please reach us by simply a call.

SOLAR SYSTEM INSTALLATION

It is possible to reduce **electric power** use and the associated costs, by switching to a home solar system installation. Such a system takes **energy** from the sun to convert into electric power. It, therefore saves **money**, which is a major advantage of home solar systems. Off grid home solar systems can provide power for unlimited usage of house hold appliances such as TVs, subwoofers, fridges, lights, phone charging, laptops etc.

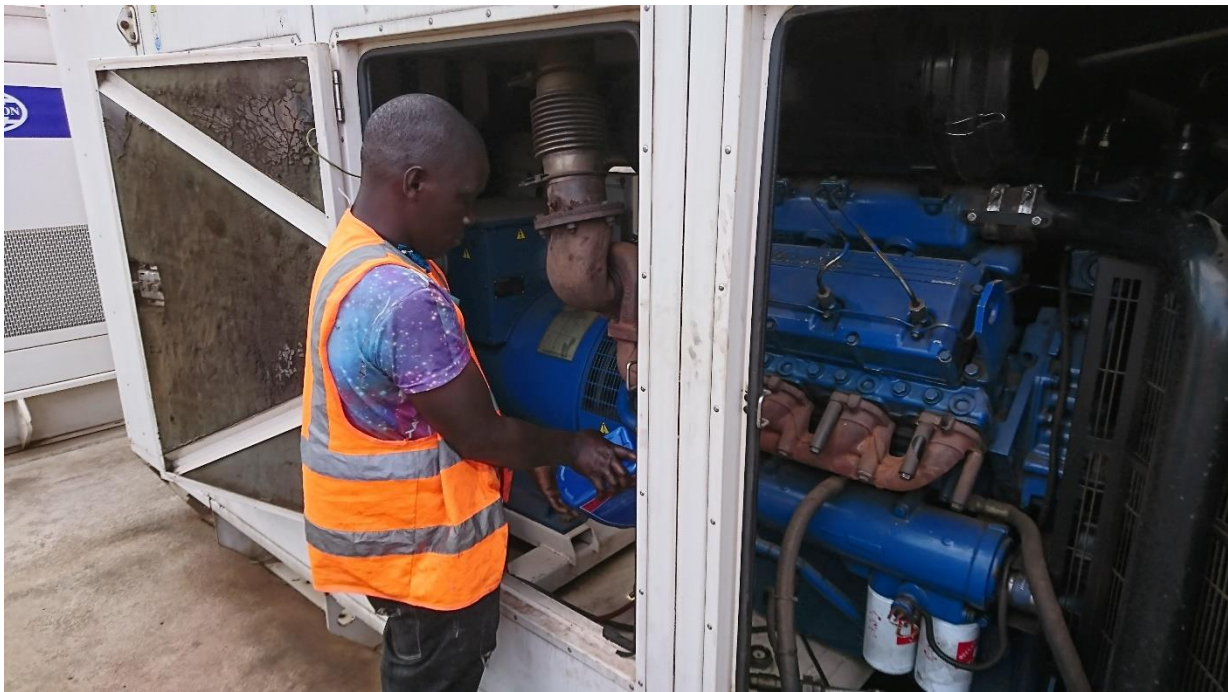

GENERATOR SERVICE AND REPAIR

Weighcom has a broad and deep knowledge in designing electrical systems, installing generators, servicing and repairing three phase generators. All of our repairs are always done with strict adherence to standards and technical conditions. If you already have a three-phase generator installed and didn't install it with us, don't worry. We are experts in all brands of generator repair and have worked on almost every type of repair there is.

Our generator technicians inspect, service, maintain, and repair diesel generators that run on gasoline or petrol and diesel. Three phase generator repair services for generator brands like Volvo, JOHN DEERE, YANMAR, Cummins, Perkins, Kato light, Caterpillar, FG WILSON etc. We are the right people to serve you, simply call **+256750614536**.

Our emergency power generator service customers include hospitals, Apartments, government agencies, and more.

CCTV CAMERA INSTALLATION

We are the leading CCTV Camera system installers in Uganda. People are employing them in their homes and business premises for surveillance. With a CCTV camera security system, you can monitor over your property easily, even in your absence.

The CCTV camera surveillance system helps to keep your property safe by showing you a live feed whenever there is a malicious attack and enhance security in your home.

It also limits the work of the security guards, since it sends every live feed to the supervision or control room or your smart phone.
