

Rotary Kiln Parts Catalogue

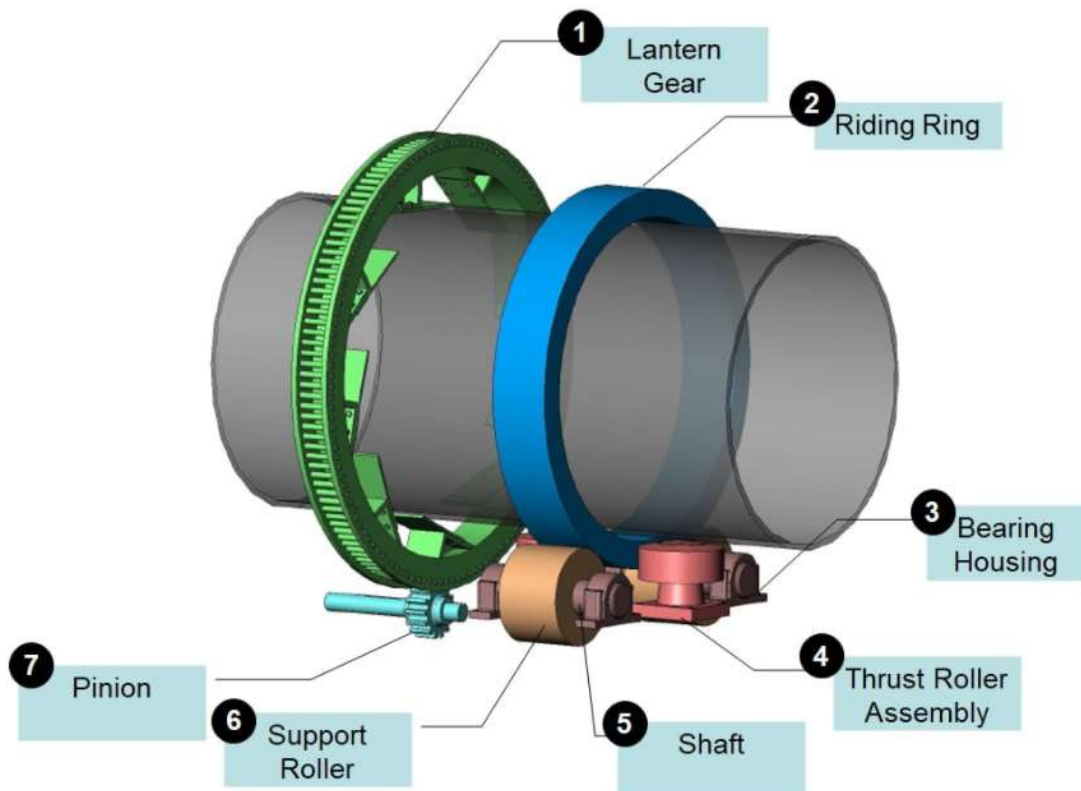

Company Profile

Anshan Metal Co., Ltd. is a professional supplier of customized casting and forging. Our company located in Anshan City which is the largest iron & steel manufacturing and processing base in China. Unique geographical location enables us integrate and utilize local and surrounding area material and technology resources to provide our customer high quality product with reasonable price.

We adhere the concept "High Quality, One-stop Service, Integrity Management". We strictly control from raw material to final product. Every process of production like casting, forging, heat treatment, nondestructive testing, machining, assembling, packing and delivery had been supervision by professional staff.

Our products for cement plant are rotary kiln parts and crusher parts.

Advantage

1. Whole process quality control, from raw material to delivery
2. Regular reporting for any update for process

Factory Profile

1. Staff: 100~150
2. Technical staff: 10~15
3. Max Single Casting: 30 ton
4. Annual processing capacity:
15000 ton
5. Annual girth gear capacity: 200~
350 set
6. Equipment:
 - 6.1 15T medium frequency electric
furnace
 - 6.2 Large annealing kiln
 - 6.3 Vertical lathe: 3.5m, 5m, 8m
 - 6.4 Hobbing machine: 2.5m, 3.5m,
5m, 8m
 - 6.5 Planer
 - 6.6 Milling machine
 - 6.7 Drilling machine
7. Other processing machine
