

### —The achievements of Alvan Sabet (Knowledge base) to date:

1. Production of pharmaceutical dyes - food and higenic
2. Production and supply of a wide range of detergent dyestuffs
3. Production of a number of imported raw materials of the company
4. Production and supply of antifreeze fluorescent dyes and petroleum derivatives
5. The production and supply of a wide range of dyestuffs used by Iranian refineries in gasoline and solvent Petroleum industry
6. Production and supply of auxiliaries for leather industry (soap and grease gripper - penetrator - filler - pull up oil)
7. Production and optimization of optical brightner for textile and paper industry
8. Production and supply a wide range of new leather dyestuffs ( penetration , covering and pigments )
9. Production and wide supply optical brightner suitable for detergent industry in powder and liquid detergents
10. Production and supply new bifunctional reactive dyestuffs consumed in textile industry
11. Production and supply dyestuff consumed in fertilizrand chemical toxins industries fits by application and structare
12. Production and supply textile auxiliry ( resist salt , silicone softner , silicone antifoumer , variety types of detergents and leveling agents
13. Production and supply paper industry dyestuffs( sizepress and internal ) in powder and liquid forms and water proof for paper

### —Future plans of Alvan sabet( Knowledge base) :

1. Production and localization of other imported raw materials in dyestuff production
2. Increasing the capacity and optimizing the production of textile dyes
3. Launching a new production line for consuming pigment powders in Plastics, dye paints and resins, artificial leather
4. Production of liquid solvent dyestuffs
5. Production and formulation of textile dyes for jet printing process
6. Production Offset inkjet printing And various types of printing paper and lithography
7. Production of optical brightner suitable for polyester fibers and plastics industriys
8. Production of glass dyestuff

## Alvan Sabet ( Knowledge Base Co ) :

Alvan Sabet Co. (ASC) is established in 1996 and started to produce in 1997. Alvan Sabet Co. is situated in Hamedan as the largest and strongest manufacturer of dyestuff and chemicals, in the Middle East serving the textile and leather industries in Iran.

Alvan Sabet Co. has 240,000 m<sup>2</sup> production and storage facilities, fully equipped to produce 3500 MT/year including 60 different shades of acid, metal complex, direct, reactive dyes, blend dyes for blend fabric and 500 ~ 1000 MT/year (by full working schedule) textile pigment printing paste and textile auxiliaries.

Quality Control and R&D are fundamental activities at Alvan Sabet Co. and the staffs are highly trained and skillful engineers enabling the company to achieve related quality certificate from ISO , ISIRI ,.... Although Alvan Sabet Co. has been well established in IRAN's market, trying to keep place with new developments in the global market too supply demand from neighbor's country.

due to the needs of the oil refineries in the field of petrol and petroleum products in order to realize the self-sufficiency of the country after obtaining quality approval from the oil industry , Alvan Sabet developed product in production of solvent dyes to supply main dyestuffs consumption of all refineries in IRAN.

We have developed and start to produce new product according demand of industries in paper dyes , detergent & soap dyes, detergent & soap dyes,hygenic dyes, leather dyes, solvent dyes , new patented textile dyes and optical brightener.

## Applied Scientific Center in Alvan Sabet :

In the past years ,The company's worker was trained by experted colleagues or foreign specialists . The need for professional and academic worker training led the company to establish a branch from University of Applied Science and Technology ([www.uast.ac.ir](http://www.uast.ac.ir)) for the purposeful training of specialist workers in dyestuffs fields.

We are welcoming students interested in the industry, who will be trained and specialized in various fields in the near future.

## Standard Collaboration Laboratory :

Approved by the Institute of Standards and Industrial Research of Iran, the Advanced Laboratory of the Company, as a partner laboratory with customs and standard organization , conducts related tests, assists customs authorities in controlling and monitoring the standard of textile dyes at the custom before the goods are cleared .

## Pharma Dyestuff Unit :

Alvan Sabet as 23-year experience of synthesizing a variety of organic dyestuff and 9 years of research on pharmaceutical and food dyestuffs from 2015 by preparing a separate pharma unit and inspiration from the GMP's announced Food and Drug Administration The drug succeeded in producing the dyestuffs used in the pharmaceutical industry.

Our Pharma dyestuffs patented accordance with the references of the world's leading manufacturers, including the United States and Europe, all products are free from any heavy metals and pollutants that by determining the dose of microbes and necessary tests with methods such as Irradiation eliminates all types of microbial .
