VISION, MISSION&VALUE

Vision

Making the world a better place with Fuboo Paper.

Mission

We strive to always adhere to our values and make the future greener. We believe that we can make bamboo an inseparable part of our lives, and for those of generations to come.

SICHUAN FUBOO HEALTHCARE
TECHNOLOGY CO., LTD.
四川福保民生健康有限公司

Value

Excellence: We always strive for excellence, and make sure to provide the best possible service to our clients.

Improvement: We strive to constantly improve our products, and help improve the world overall.

Responsibility: We make sure to stay responsible and ethical, and practice this in our everyday lives.

Equality: We believe in a true sense of fairness, one that benefits our company, our employees, our investors, and most of all, our clients.

Integrity: Act with integrity. Be honest, open, ethical and fair

BUSINESS STRATEGY

Fuboo Paper is working towards a greener future for the society, with the production of bamboo goods to replace wood pulp and plastic products. Ranging from tissue and paper towels to paper bowls and cups, we are looking to bring bamboo to every part of our lives. With a strong research & development team and the state-of-the-art factory behind us, Fuboo is aiming to create a sustainable world while providing the best value to our customers.

OUR COMPANY

Fuboo is a manufacturer specializing in paper products for over 20 years. Located in Sichuan, China, home of bamboo, we've been dedicated to producing bamboo pulp and paper since day one.

With our mission in mind, we make every effort to deliver the idea of a cleaner and healthier tomorrow. We have a strong research & development team dedicated to designing bamboo paper products that can replace wood pulp and plastic.

We operate and handle our own supplies, manufacturing, and delivering, so that we can provide the best possible value and quality control.

BAMBOO IS THE FUTURE.

01

Bamboo is more sustainable than trees, it grows fast and uses land more efficiently.

02

Bamboo doesn't use fertilizer or pesticides.

03

Bamboo consumes 30% less water than wood on average.

04

Bamboo can generate 35% more oxygen compared to hardwood trees.

05

Bamboo is the fastest growing plant in the world with record speeds of 1.2 meters per day.

06

Bamboo can grow to its maximum height in only 4 months in comparison to up to 30 years for trees.

BAMBOO V.S. RECYCLED PAPER

01

Recycled toilet paper saves energy, but the recycling process involves chemicals and energy to mix the paper together.

02

Every time paper is recycled, it loses its quality. It can only be recycled 4 to 6 times before the fibers get too short and weak.

03

Recycled fibers are shorter in length than virgin fibers which makes the end paper product less absorbent.

04

Recycled paper is full of glue, which means it clogs toilets.

05

The process of making recycled toilet paper might not be hygienic.

PREMIUM PRODUCTS WITH CUSTOM SIZES AND PACKAGING

Facial tissue

Paper towel

Facial towel

Toilet paper

Paper bowl

Paper plate

Pocket tissue

Alcohol wipes

Cleansing cloth

CHOOSE FROM OUR LIST OF CUSTOM SOLUTIONS

A

White or Unbleached

Unbleached paper maintains a stronger fiber than bleached peer. However, if you want white bamboo paper, that's also an option.

B

Paper or Plastic Packaging

We also offer biodegradable plastic packaging under requests, but we promote paper packaging whenever possible.

C

Layer and Size

We have standard size for each of the product, but still, numbers of layers and size of tissue/each sheet can be customized.
