

RE:O:SA

**RE:O:SA** which is synonymous to resourceful, enriching, objective, strengthening and adaptable. We are living in a very dynamic environment where everything around us is changing in the blink of an eye as a result people are losing touch with their roots. Our aim is to enrich the indigenous culture and artisans of India and aim to rebuild what is lost. We believe in Conscious and strategic approach to materials and production, supporting Indian textiles, reviving hand loom skills sourcing fabrics from small yet skilled manufacturers we trust and forming a meaningful relationship with such artisans by closely working with them. We are proud to say we create collections from styling these fabrics with unique texture.
