

TELMAT SYSTEMS LTD

Technology for your comfort

INTRODUCTION

TELMAT SYSTEMS LTD is a private -owned c ompany in Uganda, established with the major aim of providing GPS tracking and fleet management solutions,

It's to be known that with only basic tracking a servic e to offer back then, now Telmat systems Limited offers a range of services from Fleet management, car alarms, basic tracking, fuel monitoring, Dash cameras and temperature sensor monitoring, cctv cameras, elect ric fence and automatic gates, out door solar lights. among others.

We don't just track, but care deeply for our clients and this is reflected in our mission; Working towards breaking the challenges of our partners/ clients. Telmat Systems' vision is that your success will always be our victory.

Telmat Systems Ltd prides itself in its reliability, being connected all the time able to keep track of your asset 's location.

The professional, committed and innovative team with plenty diverse skills isTelmat Systems' nerve center. It's the same team that always strive to offer excellent relations with the clients. Clients have a privilege to access the user portal keeping up with their assets or vehicles 24/7.

Telmat Systems' key services are all due to the advanced software tracking platform with substantial programming and modular design. The tracking software performs exceptionally well in simplifying the monitoring process and eases recovery in case of theft.

There's an in -house shop where authen tic GPS -tracking related products can be ordered and bought. We offer the lowest and friendly prices for any of the products.

The user interface is as friendly as it can be, allowing the user to track their asset/ vehicle on their own, as its practical and simple to use. The dashboard gives you access to location where you keep note of your vehicle's position, navigation and time. The platform offers a customizable experience, generating reports that are easier to understand.

CLIENTELE

SOKOTO HOLDINGS LTD

OCTA AUTHENTIC PARTNERS

OUR SERVICES

BASIC TRACKING

Tracking assets/vehicles using GPS and advanced software to detect their location 24/7 for organized Fleet Management. Monitoring commercial motor vehicles such as cars, vans, trucks, specialist vehicles, forklifts, and trailers, Private vehicles used for work purposes using easy -to-use and effective -Fleet management software.

ADVANCED TRACKING

Our advanced tracking includes basic tracking plus fuel monitoring. This enables you to track real time fuel level, refilling, consumption and downfall to optimize fuel efficiency preventing misuse, drainage and fraudulent activities minimizing expenses on fuel which contributes to more than 60% of the operating costs in most companies. Our system gives reports to exactly calculate the miles traveled by the fleet

DASHBOARD CAMERAS

A dashboard camera or simply dashcam, is an onboard camera that continuously records the view through a vehicle's front windscreen and sometimes rear and can automatically send pictures and video using 4G to the clients' application.

CCTV CAMERAS

We install CCTV cameras at your premises to allow you monitor events 24/7. With our advanced cctv technology you can monitor online with your phone or laptop. A few advantages of surveillance cameras include;

- Prevent and Reduce Chances of Theft
- Real-time Video Surveillance
- Useful Criminal Evidence
- Better Employee Productivity
- Resolve Internal Business Disputes
- Improve Your Customer's Shopping Experience
- Cut Down Security-related Costs
- Monitor High-risk Areas

AUTOMATIC REMOTE GATES

With the use of a remote , open and close the gate by a touch of a button.

Automatic gates are becoming an increasingly popular option for both homes and businesses. Offering comfort, simplicity and security, these can be a great addition to properties. Meanwhile, the various automatic gate systems available offer versatility, making automatic gates a possibility in all locations.
