

Indonesian Coco Peat & Coir Fibre

Profile Company

EASTURA Indonesia
PT. Trinita Sinergi Pacific
Jl. Pluit Indah 168B, North Jakarta City, Jakarta
14450

Welcome to EASTURA!

The Leading **Coco Peat & Coir Fibre Producer** in Eastern Indonesia

Coco Peat

Cocopeat is useful as a versatile planting medium made from selected coconut husks. The fibrous coir is pre-washed, machine-dried, sieved, and free of grit and other contaminants such as animal and plant residues. Coco peat block is a natural fiber made from coconut coir which is 100% organic and environmentally friendly, free from soil pathogens and weeds.

Packaging

	Block	Polybag
Dimension / Weight	30x30x10-15cm / 5kg (± 200grams)	30x40x70cm / 30kg (± 200grams)
Packaging	Bulk, Pallet, Wrapping plastic	Polybag

Shipping Capacity

	Block	Polybag
40ft HC	24 MT (22 pallets @220pcs)	21 MT (700polybags)

Grade	Block / Low EC	Block / High EC	Polybag / Low EC
Electric Conductivity (EC)	<0.5 mS/cm	>0.5 mS/cm	<0.5 mS/cm
Moisture / Water Content	10-15%	10-15%	10-15%
pH value	5.2-6.8	5.2-6.8	5.2-6.8
Expansion	70-80lt	70-80lt	200lt/bag
Color	Light to dark brown	Light to dark brown	Light to dark brown
Impurity	3% Max	3% Max	3% Max
Compression Ratio	5:1	5:1	2:1
Fiber Content / level	Below 5%	Below 5%	Below 5%
Fibre Size	6mm	6mm	6mm
Sand level	below 5%	below 5%	below 5%

Coco Fibre

Coco Fiber is a processed product from coconut in the form of coir fiber which can be used for various needs. Coco fiber is the fibrous material found between the hard, internal shell and the outer coat of a coconut and is used in products such as floor mats, doormats, brushes, and mattresses.

Packaging

- Dimension : 110x100x40cm
- Hidraulically Compressed & Tightly Strapped Ball

Shipping Capacity

- 40 HC : 18 MT (260-270 Bales)

Moisture / Water Content	18-22%
Weight	100-115kg / Bales
Color	Golden Yellow / Brown
Coir length	5-30cm, Fiber Long 75%, Short 25%
Impurity	5% without Big Husk & Stone
Dust Content	3%
Max Husk	4%
Level Drainesse	80-85%
Drying Method	Rotary Dryer / Sun Drying
