IKS PERSONALIZED TREATMENT

The IKS trichology line, based on functional vegetable active ingredients, is the result of a fusion of experience, love for nature and its remedies, together with cutting-edge technology, through a constant search for the best solutions. **Top-quality raw materials and adequately balanced exclusive formulations, and tested for efficacy and safety, are the main features of our products:** Shampoos and Peeling developed to meet the specific needs of scalp and hair, Essential Oils to treat hair disorders, Restructuring products to foster hair body and vigour, and Finishing products for the hairstyle designed to maintain integrity. If appropriately combined, according to the professional I.K.S. system (Innovation Kapelli System), these products allow to create customised treatments, that are specifically designed to treat any scalp and hair disorder. . In any case, they represent a valuable ally for hygiene even in the absence of particular problems, as they are an important aid for moisturising, nourishing and balancing scalp and hair, according to the concept that healthy habits are the best form of prevention. **Each product is dermatologically tested and NICKEL/CHROME/COBALT tested in order to be used even on the most delicate scalps.** We have always been sensitive to ecological issues and protecting the environment, as a matter of fact, our packaging is made of materials chosen in full compliance with environmental rules to facilitate recycling operations.

IKS

Personalized Treatments

SHAMPOO

IKS shampoos, made from naturally derived raw materials and free of aggressive or irritating surfactants, are designed for every scalp and hair disorder. They are differentiated into specific shampoos to restore scalp balance (Sebum-Regulating Shampoo, Dandruff-Reducing Shampoo, Revitalising Shampoo) and specific shampoos to manage length disorders (Baby Shampoo, Emollient Shampoo, Fragile Hair).

Each of them performs and completes its functions thanks to combinations of essences that are created to address each individual disorder, but have common qualities and characteristics:

- Are concentrated and used in small quantities
- Allow to wash without damaging scalp and hair
- Produce an effective antibacterial action
- Restore the hydrolipidic film with dermo-compatible molecules
- Contain no dyes
- Contain specific phyto-complexes
- Are biodegradable and environmentally friendly.

BABY BY SHAMPOO

(specific for hair)

Specifically designed to cleanse gently it is ideal for frequent washes and delicate, sensitive and itchy scalps. It is recommended in cases of hyperhidrosis and, thanks to its antioxidant properties, is also particularly suitable for white hair. Its formulation, a combination of carefully selected and skilfully blended ingredients, soothes the scalp and gives radiance and softness to the hair. In particular:

- **Malva Silvestre and Witch Hazel Extract:** have anti-inflammatory, healing and decongesting properties, allow to repair and control irritated and sensitive scalps, providing immediate relief and comfort.
- **Marigold Extract:** protects against sun damage thanks to its soothing properties.
- **Hydrolysed Wheat Protein:** produces an important action on long hair, making it shiny, soft and easy to detangle.

1000 ml - 200 ml resale

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

BRITTLE HAIR TK SHAMPOO

(specific for hair)

Rich in fatty acids and vegetable proteins that provide a protective and restructuring action, , **it is designed for thin, bleached or permed hair whose structure is particularly fragile.** Its formulation, a combination of selected and skilfully blended ingredients, allows to restructure and give volume to the hair. In particular:

- **Hydrolysed Wheat Protein:** contains amino acids that are similar to those found in the hair, thus providing strength, volume and brightness, as well as a powerful restructuring action.
- **Ginkgo Biloba:** promotes microcirculation by supplying nutrients to the hair, thus helping to strengthen and giving thickness and volume.
- **Panthenol (or provitamin B5):** provides strong nutrition and moisture, leaving the hair soft and supple.
- **Hypnea Musciformis:** a small seaweed with high anti-free radical properties that is specific for protecting the scalp.

EMOLLIENT EM SHAMPOO

(specific for hair)

Specifically designed for the outer keratin layer, it is suitable for very dry, porous and thick hair. **It provides a high restructuring action, which makes it particularly suitable for stressed hair and split ends.** Its constant use prevents their formation and makes the hair supple, smooth and disciplined. Its formulation, a combination of selected and skilfully blended ingredients, restores moisture even on dry or alipidic scalps. In particular:

- **Aloe Barbadensis Extract:** rich in vitamins, enzymes, trace elements and amino acids, it produces a refreshing and softening action and helps moisturising dry and dehydrated scalps.
- **Matricaria Chamomilla Extract:** made mostly of flavonoids, it provides strong decongestant and soothing properties. Stimulates the synthesis of collagen, elastic fibres and hyaluronic acid.
- **Hydrolysed Keratin:** consisting of long chains of amino acids, it has strong restructuring properties.
- **Polyquaternium 10:** wraps the hair, helping to make it stronger, more elastic and electricity-free.

DANDRUFF DF SHAMPOO

(specific for the scalp)

It is specially designed to treat both oily and dry dandruff, delaying its appearance without attacking the scalp. It performs an important sanitising, anti-inflammatory, antiseptic and antifungal activity. Moisturises and refreshes the skin. If used regularly, it is helpful for Ph rebalancing. Its formulation, a combination of selected and skilfully blended ingredients, will make you dandruff-free for several days, while its constant use will help normalizing the skin. In particular:

- **Rosemary Extract:** provides a strong, anti-inflammatory and antiseptic action.
- **Aloe Barbadensis Extract:** acts as a moisturiser and provides healing, soothing and antifungal properties
- **Menthol:** : helps refreshing and moisturising the skin.

NATURAL & TECHNOLOGY HAIR PRODUCTS

SEBUM-REGULATING SB SHAMPOO

(specific for the scalp)

It performs an important sebum-balancing and antibacterial action. **Its formulation is suitable for all types of sebum (fluid-oily, waxy)**. It removes sebum accumulation from scalp and hair, normalises sebum and sweat, controls bad odours and stabilises Ph. . It also performs a nourishing and moisturising action. Its formulation, a combination of selected and skilfully blended ingredients, removes greasiness over time, for healthier and cleaner hair. In particular:

- **Ivy Extract:** rich in saponin, ensures a gentle and thorough cleansing action on the scalp.
- **Juniper Fruit Extract:** : thanks to its antiseptic and antibacterial properties, it removes sebum accumulation from the scalp, reducing greasiness and eliminating the unpleasant odour that is typical of seborrhoea.

VITALISING CD SHAMPOO

(specific for the scalp)

It's a shampoo specifically designed for hair loss and thinning. **By reactivating blood microcirculation on the scalp, it promotes the assimilation of active ingredients that are functional to the health of the hair, playing an important role in preventing hair loss.** It strengthens and stimulates skin defence, is anti-free radical and, if used on long hair, produces a restructuring effect, providing essential amino acids that are useful for the synthesis of keratin and collagen. Its formulation, a combination of carefully selected and skilfully blended ingredients, revitalises the activity of hair bulbs, thus making the hair stronger and healthier. In particular:

- **Nettle Glyceric Extract:** has an astringent and invigorating action.
- **Arnica Extract:** produces a powerful stimulating action.
- **Nasturtium Essential Oil:** acts directly on long hair, particularly if fine and brittle, improving body and strength.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

ESSENTIAL OILS

Essential Oils, also known as Etheric Oils, are substances with a very complex composition that represent the noblest part of the plant.

The molecules of Essential Oils have a high affinity with the tissues of human body thus allowing to easily penetrate the scalp.

Although each Essential Oil has its own specific activity, **all Essential Oils, albeit to varying degrees, have antibiotic and antiseptic properties that support our immune system and protect our bodies from the action of free radicals, which are responsible for cellular ageing.**

They have been used for a long time, but have recently been rediscovered for their extraordinary therapeutic properties and safety.

IKS ESSENTIAL OILS are the result of precise molecular synergies, from which are derived real concentrates of functional active ingredients.

Their remarkable efficacy is determined not only by their particularly balanced formulations, but also by valuable raw materials, which are the result of strict selections made according to precise criteria (species, genus, soil type, sun exposure, life cycle of the plant, weathering, part of the plant used, and so on) established to ensure purity and true quality.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

PROFESSIONAL TREATMENTS

Salon Essences (50 ml)

They contain blends of essential oils in high concentration, to professionally deal with the main scalp and hair anomalies. They do not contain dyes and the fragrances are the same as the herbs and plants from which the active ingredients are extracted.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

SENSITIVE

It's a combination of Essential Oils with strong relaxing power, specifically designed for sensitive and itchy scalps. **It improves skin microcirculation, controls perspiration, eliminates itching and is an excellent soother for nerve endings.** Its formulation, a combination of selected and skilfully blended ingredients, soothes and relieves scalp irritation and thanks to its sweet, almost floral aroma, acts on the psychic and emotional sphere, thus helping to bring serenity. In particular:

- **Lemon Essential Oil:** performs an antiseptic, astringent and invigorating action.
- **Essential Oils of Mandarin and Sweet Orange:** : with relaxing, antispasmodic properties, they provide a calming effect on nerve endings.
- **Neroli Essential Oil (Bitter Orange):** with aromatic, tonic, antiseptic and microcirculationstimulating properties, it regenerates and invigorates the skin.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

DANDRUFF

It's a combination of Essential Oils, specifically designed for all types of dandruff. It allows to eliminate fungi and bacteria. **Laboratory tests performed to evaluate the microbicidal activity of Malassezia Furfur showed that ESSENZA FORFORA IKS allows to reduce dandruff by 99.91%.** Its formulation, a combination of selected and skilfully blended ingredients, produces a soothing action on irritated scalps, normalises corneal defence, and provides an important dermo-purifying action. In particular:

- **Eucalyptus Essential Oil:** performs an antiseptic and soothing action.
- **Lavender Flower Essential Oil:** purifies, calms and soothes the scalp.
- **Essential Oils of Lemon and Melaleuca:** thanks to their well-known antibacterial and antifungal properties, they purify the skin and fight the formation of both oily and dry dandruff.
- **Essential Oils of Peppermint and Spearmint:** allow to cool and soothe the itching, helping to relieve irritated scalps due to desquamation.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

SEBUM

It's a combination of Essential Oils specifically designed for all cases of seborrhoea. It soothes the typical itching and irritation of excess sebum. In addition, it normalises and fluidises sebum so as to eliminate unpleasant odours and prevents hair miniaturization caused by the aggressive action of sebum. **Its formulation, a combination of selected and skilfully blended ingredients, normalises sebum hypersecretion, thus helping to restore scalp pH to its normal values.** In particular:

- **Lavender Essential Oil:** helps to regularise sebaceous secretions, thus inhibiting the bacteria that are responsible of infections and inflammatory states.
- **Essential Oils of Lemon and Neroli (Bitter Orange):** produce a bactericidal and microcirculatory stimulating action.
- **Serenoa Serrulata Extract:** thanks to its polyphenols with strong sebum-normalising and skin-conditioning properties, it is very effective against seborrhoea.
- **Argan Oil and Sesame Oil:** provide an emollient and calming action, helping to reduce inflammatory states.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

VITALISING

It's a combination of Essential Oils specifically designed to prevent and treat cases of hair loss. **It stimulates microcirculation, helping to increase nutrients' supply to the root.** Its formulation, a combination of carefully selected and skilfully blended ingredients, is effective even on greasy scalps. It strengthens the bulb and stabilises the growth phase (anagen) of the hair. In particular:

- **Essential Oils of Ceylon Cinnamon, Mugo Pine, Lavender Flowers and Ylang Ylang:** with dermo-purifying, invigorating, anti-inflammatory and antioxidant properties, they stimulate microcirculation, thereby increasing the

HOME CARE

ESAROME LINE

The use of Esarome Vials is recommended to give continuity to the treatment performed in the salon. These precious Essential Oils, which should be used at least twice a week, allow to extend the benefits of professional treatments in order to achieve stable results with regular use. **They represent a valid form of prevention against possible disorders.** Thanks to the vial format, they can be used at the same time of hair washing.

Boxes of 12 vials - 7 ml each

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

DANDRUFF

Specific for cases of oily and dry dandruff. It eliminates dead cells, restoring the physiological turnover of skin cells. Its formulation, a combination of selected and skilfully blended ingredients, effectively prevents the formation of dandruff. In particular:

- **Climbazole:** provides an important antimicrobial, antifungal and dermo-purifying action.
- **Sage Leaf Extract:** has balsamic and anti-inflammatory properties.
- **Eucalyptus Essential Oil:** has bactericidal properties.
- **Peppermint Essential Oil:** has antibacterial and refreshing properties.
- **Organic Lavender Essential Oil:** has soothing and anti-inflammatory properties.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

SEBUM

Designed for all cases of seborrhoea. Its combination of functional active ingredients (PAF) regulates the functions of the scalp, thus restoring its balance. Its formulation, a combination of carefully selected and skilfully blended ingredients, provides an important antibacterial action, prevents bad odour caused by excessive sebaceous secretion, and removes hair greasiness over time. In particular:

Nettle Dioica Leaf Extract - Argan Extract - Ivy Glyceric Extract - Sesame Seed Extract: they produce an effective antibacterial and anti-inflammatory action, keeping the scalp soft and moisturised.

Serenoa Serrulata Extract: its polyphenols have **anti-androgenic properties** that are mainly expressed by inhibiting the 5-alpha-reductase enzyme (responsible for the conversion of testosterone into dihydrotestosterone, which causes androgenic alopecia in susceptible individuals)

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

VITALISING

It's a combination of plant Essential Oils designed for all cases of hair loss and slowed hair growth. **Its formulation, a combination of skilfully blended functional active ingredients (PAF), increases the supply of nutrients to the root,** thus contributing to make the hair stronger and healthier. **Anti-stress active ingredients ensure greater blood circulation.** In particular:

- **Rosemary Extract**
- **Sage Extract**
- **Melaleuca Essential Oil**
- **Mugo Pine Essential Oil**
- **Lavender Essential Oil**
- **Ceylon Cinnamon Essential Oil**

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

RESTRUCTURING PRODUCTS

The IKS Restructuring line, **based on vegetable proteins** and with a very similar structure to that of the hair, is designed to restore elements that were lost for various reasons, thus identifying the needs of the moment. Enriched with nourishing, softening and moisturising substances, it restores tone and vigour to tired and overworked hair.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

REPAIR CREAM RC

An intensive restructuring cream that nourishes, moisturises and invigorates the hair. **Specifically designed for dry, brittle and stressed hair, it is suitable for all types of hair, whether treated or natural.** It can be used as a conditioning cream or, if left on the hair for about ten minutes, free or under a source of heat, as a true restructuring mask. Its formulation, a combination of selected and skilfully blended ingredients, gives body, softness and elasticity to scalp and hair. In particular:

Avocado Oil: thanks to vitamins A, E and B, it gives body and brightness to the hair, protecting it from external aggressions. Rich in phytosterols, it provides softness without greasiness.

Aloe Barbadensis Extract: provides a marked anti-inflammatory, bacteriostatic and at the same time refreshing and softening effect, moisturises and soothes dry and dehydrated scalps.

Ginkgo Biloba Glycolic Extract: with high flavonoid content, acts on the hair as a protective agent against oxidation by blocking the formation of free radicals, reactivates microcirculation and has a remarkable invigorating and stimulating action on the scalp.

Hydrolysed Soy Protein: moisturises the skin and has a conditioning effect on the hair.

Quaternized Wheat Proteins: provide amino acids that are indispensable for the biological balance of the hair, thus nourishing and moisturising it. Their quaternized nature allows these proteins to, bind to the keratin present in the hair, thus providing resistance to rinsing and maintaining the hair full-bodied, soft and supple for a long time.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

KERATINE HK

Vegetable Keratin

It's a combination of proteins, amino acids and keratin oils that acts directly on damaged areas of the hair. Its formulation, a combination of selected and skilfully blended ingredients, regenerates hair structure, making the hair shaft voluminous, shiny and resistant. It also performs an important moisturising and invigorating action on the scalp, thus helping to restore its balance. In particular:

Hydrolysed Keratin: similar to natural hair keratin, provides a restructuring, protective, volumising and film-forming action.

Wheat and Rice Proteins: rich in essential amino acids that are useful for the synthesis of the main proteins of scalp and hair (keratin and collagen), they provide an important repairing action. At the same time, they moisturise, nourish and soften scalp and hair.

Green Tea Extract: rich in polyphenols, caffeine and vitamins B1, B2, C, it produces an important anti-free radical action on the hair and a stimulating-invigorating action on the skin.

A water-soluble product that after releasing its functional active ingredients can be easily removed with water without weighing down the hair.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

MINERAL ACID MA

Acid Mineralizer

It is the e bivalent product par excellence : **it normalises Ph balance and provides the right amount of minerals for scalp and hair.** Its formulation, a combination of selected and skilfully blended ingredients, soothes the irritation caused by excess sebum and hyperhidrosis and effectively fights itching. In particular:

Chamazulene: : extracted from chamomile, has anti-inflammatory, pain-relieving and antimicrobial properties.

Red Vine Glycolic Extract: rich in flavonoids and with antioxidant and anti-free radical properties, a regenerating and invigorating effect on the scalp.

Bilberry Glycolic Extract: thanks to its tannins and anthocyanins, it provides astringent, dermo-purifying properties and fosters increased capillary resistance.

Magnesium and Zinc Trace Elements: biocatalysts of many enzymatic reactions occurring at the level of the dermis, they produce important actions: energising for magnesium, purifying and sebum-regulating for zinc.

Hydrolysed Rice and Wheat Proteins: rich in amino acids, they provide an important restructuring, moisturising, nourishing and antistatic action.

Panthenol (Provitamin B5): prevents dryness of the hair by guaranteeing the right level of moisture and repairs the damage caused by chemical and mechanical treatments.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

PURIFIERS

IKS Purifiers based on natural functional ingredients, can be used separately or combined in order to ensure a professional deep cleansing of the scalp, which **is indispensable before any treatment to restore the hair's normal state of well-being.**

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

PEELING CREAM AF

It's a creamy emulsion specifically designed **to obtain and maintain the follicular ostium free from excess sebum and dandruff**. Its formulation, a combination of selected and skilfully blended ingredients, leaves the skin deeply cleansed, softened and free of irritation. In particular:

- **Sage Extract:** provides adermo-purifying, stimulating and normalising action on skin functions.
- **Rosemary Extract:** an aromatic plant whose essential oil is particularly active against excess sebum and dandruff, guaranteeing a refreshed and deeply cleansed scalp.
- **Climbazole:** : provides an antimycotic action that is particularly effective against the Malassezia Furfur fungus, the main cause of dandruff, while remaining inactive against other beneficial bacteria.
- **Peppermint Essential Oil:** refreshes and invigorates the scalp.
- **Panthenol (Provitamin B5):** retains scalp's moisture while performing a repairing and normalising action on the skin's physiological functions, for a deeply moisturised scalp without inflammations.

500 g - 200 g resale

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

SCALP PURIFIER

It's a combination of **specific Essential Oils for a deep cleansing of the scalp. Indispensable for cleansing before any treatment** (to be used in synergy with Peeling Cream AF), it performs a dermo-purifying and refreshing action on the scalp, especially in the presence of sebum and dandruff. Its formulation, a combination of selected and skilfully blended ingredients, provides an antiseptic action and prevents the proliferation of micro-organisms that are responsible for scalp desquamation and inflammation. In particular:

- **White Thyme Essential Oil:** produces a bacteriostatic and antimicrobial action, helping to reduce excessive sebaceous secretion and dandruff.
- **Sage Extract:** provides a dermo-purifying and normalising action on the scalp's physiological functions.
- **Rosemary Extract:** particularly effective against excess sebum and dandruff, it also provides an invigorating effect on the scalp and stimulates the hair bulb.
- **Peppermint Essential Oil:** soothes, refreshes and invigorates the scalp.
- **Watercress Extract** (also known as Nasturtium): rich in vitamins A, B1, B2, C, E and mineral salts, it invigorates the scalp and stimulates microcirculation.
- **Urea:** one of the components of the NMF (Natural Moisture Factor), performs a keratolytic function (reduces skin thickening) and moisturises the scalp.
- **Allantoin:** a substance found in various plants with antioxidant, healing, epitheliumrepairing properties, , it provides deep hydration and allows to reconstruct damaged tissues due to inflammatory states.

ESACEL 300 WITH PLANT STEM CELLS

Hair loss prevention

Stem cells have the potential to develop into many of the various cell types of our body. Within many tissues, they also act as a repairing system, thanks to the ability to replicate indefinitely and replace damaged or dead cells.

Hair bulb stem cells are very important, as they are the source of continuous regeneration of the epidermis and are essential for the formation of new hair pigments. Over time, these cells lose their vitality, thus leading to senescence of follicles, but at the same time maintaining their regenerative potential.

It has been found that plant stem cells from a particular apple (*Malus Domestica*) have the ability to interact with stem cells of hair bulbs, thus reactivating follicle activity and stimulating hair growth, while at the same time preventing hair loss.

A regular and cyclic use of products from the ESACEL 300 line (Lotion and Shampoo), which is based on *Malus Domestica* Plant Stem Cell Extract (PhytoCellTec *Malus Domestica*) and enriched with other natural functional active ingredients that are indispensable for healthy hair, is an effective tool to prevent hair loss and improve hair quality.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

ESACEL 300 LOTION

Its innovative formulation is specifically designed to help protecting hair follicles and delaying their senescence. **The Plant Stem Cell Extract of Malus Domestica, is rich in epigenetic and metabolic factors, and helps improving longevity, strength, vigour and structure of hair cells.**

Its formulation, a combination of skilfully selected and blended extracts of plant origin, helps to nourish, moisturise and protect the hair, promoting its elasticity and resistance. In particular:

- **Magnesium-Methionine and Zinc-Methionine Combinations:** increase cells' energising and reactivating action and protect against free radicals.
- **Oat Extract - Rice Protein:** produces a strong moisturising and nourishing action.
- **Olive Extract:** rich in antioxidants and vitamin E, provides a soothing, protective, repairing and polishing action on the hair shaft.
- **Green Tea Extract:** with polyphenols, caffeine, vitamins and minerals, it provides powerful anti-free radical properties, thus stimulating and invigorating the scalp.

Box with 12 vials - 7 ml each

COLOUR

Colored Hair Products

“COLOUR” products have been specially designed **for coloured or bleached hair** with more specific needs than natural hair. As a matter of fact, **the protective Plant Oils and the innovative technology with FANCORSIL LIM-1 provide a strong anti-free radical action** that preserves vigour and brightness in a natural way while at the same time maintaining the colour as stable as possible.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

REPAIR COLOUR RE SHAMPOO

It has an innovative formulation, a combination of selected and skilfully blended ingredients, specifically designed to fight the many external and chemical aggressions to which the hair is subjected, especially if coloured, mech-treated or bleached. In particular:

- Meadowfoam Seed Oil (Latin name Limanthes Alba): a small, delicate, white flower that grows in the North of the United States, exceptionally rich in fatty acids and antioxidants, it provides the hair with stability against oxidation and rancidity.
- Wheat Protein: ensures a deep moisturising and nourishing function, preserving the biological balance of the hair.
- Aloe Barbadensis Extract: with a strong bacteriostatic, refreshing, softening and healing capacity, it fosters tissue reconstruction and repair of the cuticle, which can be made vulnerable by treatments.
- Mallow Glycolic Extract: forms a thin protective film on the hair, thus ensuring softness and protection.

The innovative FANCORSIL LIM-1 technology counteracts hair yellowing, increases colour and improves hair brightness.

The presence of a sun filter mitigates the lightening action of the sun thus preventing the colour from fading, while maintaining the brightness.

DEFINING FLUID CURL

REVIVES CURLS

It's a soft gel that allows to shape a loose natural curl on the hair, without weighing it down or making it sticky. Its formulation, a combination of carefully selected and skilfully blended ingredients, improves the quality of scalp and hair, allowing the hairstyle to last longer. In particular:

- **Polyquaternium 46:** a cationic polymer that insulates hair fibre, making the hair less sensitive to humidity and preventing frizz.
- **Extracts of Lemon and Grapefruit:** provide a sebum-regulating and antiseptic action.
- **Pineapple Glycolic Extract:** drains excess fluid and eliminates dead tissue while allowing greater penetration of other functional actives.

To be used both on wet or dry hair.

200 ml

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

FLUID CRISTAL

LIQUID CRISTALS

Innovative liquid crystals. Its formulation, a combination of selected and skilfully blended ingredients, **makes the hair brighter and softer, enriching it with a very pleasant fragrance.** In particular:

- **'Sunflower Seed Oil: rich in functional active ingredients such as unsaturated fatty acids, minerals and vitamins E and B,** it restructures hair fibre, protecting it from free radicals. With strong polishing and elasticising properties, it provides a smoothing action on the cuticles, making the hair combable and shiny.

The specific SUN FILTER attaches to the hair, thus improving stability of coloured hair and performing an important protective and preventive action against the damage caused by sun rays.

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

NATURAL LAC

HAIR SPRAY

Gas-free ecological lacquer for medium fixing. Formulated with excellent polymer resins,, it fixes and supports while providing a **splendid natural effect and leaving the hair shiny and bright.** Its formulation, a combination of carefully selected and skilfully blended ingredients, **supports the hairstyle without leaving traces and without weighing down the hair.** In particular:

- Eucalyptus Essential Oil: provides a deodorant, invigorating, astringent and antiinflammatory action.
- Lemon Essential Oil: has antibacterial properties and provides a disciplining and antiseptic action.

250 ml

DYES

The colouring philosophy proposed by H.K. Hair Kulture is based on a **free of Nickel and Ammonia non-aggressive formulation that is enriched with natural functional active** Ingredients which allow to nourish and protect the hair and effectively counteract the irritating action of coloured pigments. Thanks to these characteristics, the colour of H.K. Hair Kulture is **well tolerated by those who are allergic to the above-mentioned components and by those with sensitive and delicate scalps.**

HAIRKULTURE
NATURAL & TECHNOLOGY HAIR PRODUCTS

KOLOURGEL

Permanent nickel- and ammonia-free, e hair colouring gel, specifically designed for people allergic to both components and with delicate scalps. The absence of ammonia makes it odourless and less invasive on hair structure and its formulation a combination of selected and skilfully blended ingredients, provides scalp and hair with important nutrients, giving tone and elasticity without weighing down the hair. In particular:

- **Coconut Oil:** very nourishing, allows to significantly reduce scalp dehydration and, thanks to its soothing action, calms redness and burning sensation.
- **Wheat Germ Oil:** a true concentrate of vitamin E, has antioxidant properties and provides a deep nourishment to the scalp.
- **Rice Bran Oil:** has an emollient, moisturising and smoothing effect.
- **Linden Bud Extract:** provides the skin with moisture and elasticity, protects the hair by creating a coating around the cuticles, softens and maintains hair turgidity, while limiting the loss of water.

Its nuances are characterised by intense, enveloping shades, with an extraordinarily natural effect.

By being a physical filter, the sun filter contained in the formulation repels radiation, instead of absorbing it, so that colour does not fade.

This guarantees a long-lasting, soft, supple hair colour and a moisturised and protected scalp.

box with 3 bottles, 100 g each

KCG OXID

Oxidising emulsion with an innovative formulation, **designed to create an ideal synergy with the KOLOURGEL line, allowing perfect adherence to the hair and improving the cohesion of pigment molecules on the structure.** Thanks to the quality of raw materials and to its softening and conditioning active ingredients, KCG OXID is delicate even when used in high volumes.

Available in volumes 10 - 20 - 30 - 40.
