Greetings..

this way to explore us 

ABOUT US!

Kohenoor International

is proud on it's very successful long history. The great founder of company Late Mr. Noor Muhammad Aleemi started the agriculture business in 1952, and formed this firm in 1957 at Hyderabad Pakistan.

at first he established a local network, later on in 1970 he let this ship sail in the international markets as leading import and export company of Pakistan. His only son Mr. Umar Hayat Noorani took charge of Business in 1980. Mr. Hayat accelerated the business with it's full strength of his expertise established various segments and products lines. Later on Mr. Usman Hayat & Rehan Hayat the third generation of Mr. Noor Muhammad joined the firm sailing this ship towards the success in more than 52 countries around the world.

Kohenoor International is more than 65 years old, well experienced, a successful leader in Pakistani agriculture industry and exporting the top quality products worldwide.

Advance R&D Programs

Fresh Produce From Farms

Kohenor International is quality focused company, our mission is to always provide highest quality products, we do have an advance research and development station, where we exercise extensive research on various agriculture varieties.

with a vast network of farmers across country we always collect fresh farm's produce and thanks to the modern processing facility we are able to create highest purity of the products that has been only shipped to our valued customer after the quality assessment at our in house quality assessment lab.

FORAGE

& FORAGE SEEDS
SPROUTING SEEDS

SPROUTING

KOHEMBOOR ALFALFA

more Leafy

more Branches

more production

Alfalfa and Clovers are the prime products of Kohenoor International. We have various varieties for Europe, Africa, Gulf, Australia, Russia, North and South America.

All our forage varieties are in highest purity free from all weeds and impurities. To maintain the quality we process our sowing seeds at advance processing facility and at optical color and shape sorting equipments. With the help of in house seed quality assessment laboratory, we precisely analyze the purity and seed health of each batch. It gives us the confidence on our produce and excellent production to our clients.

ALFALFA SEEDS

Kohenoor International offers its two varieties of Alfalfa for cold and hot climates

KN92

This variety is very good for dry arid climates as well as to cold and snowy climates. It adopts very well to neutral and / or faintly acid soils, but it also adapts well to high grounds and basic soils, even till the moderately salted ones.

TAIZTAR

This is a hot weather variety, which is mainly sown for fodder purpose. It gives a green fodder yield of 110 – 125 tons per hectare. It is a perennial crop which gives harvesting around the year; annual harvest is 7 to 8 cuttings.

Winter Survival	High
Disease Resistance	Excellent
Production	Medium - High
Regrowth	25-28 Days *
Stem	Tall- Fine
Fall Dormancy	4.0

Weather Tolerance	High
Disease Resistance	Excellent
Production	Medium - High
Regrowth	25-28 Days *
Stem	Tall- Fine
Fall Dormancy	9-11

TRIFOLIUM RESUPINATUM

PERSIAN CLOVER

PRIMO

Primo variety has very strong resistance to cold and flourishes very well in the highlands, having inherited by a large genetic base originated in the North of Pakistan. It resists to dry periods. Because the Primo variety is used to receive water only from the winter snow melting in northern area of Pakistan. It shows persistence in the ground, with a natural re-sowing till the third year. It has an ascendant stalk more reelevated than species average and can produce till 80/90 tons per hector of green forage.

TRIFOLIUM ALEXANDRINUM

BERSEEM CLOVER

KOHENOR GREEN

Kohenor Green Berseem clover is an annual forage legume suitable for hay. A multi cut grass which give 4 to 6 cuts per season.

KOHENOR PROTEINGRASS
