BLUESPHEREOCEANUS INTERNATIONAL

Uses:

1. Growing medium for Home terrace garden, roof garden, balcony garden
2. Media for seed germination.
3. Soil conditioner for planting beds in parks and garden, golf course.
4. For Agricultural, horticultural and Floricultural applications

COIR BRISTLE FIBER

1. Long and strong fibres commonly used in brush and broom manufacturing industries. The stiff, straight and long strands of fibre are termed bristle fibre or brush fibre.
2. The basic grade of bristle fibre is known as 1Tiefibre. This is then further hackled and classified into 2Tie and 3Tie based on the length of strands and the general condition of fibres.
3. The product is applied in brush and broom manufacturing industries. Other than that for potting mixes, manufacturing of special filters, coir twine etc.

COIR FIBER

BLUESPHEREOCEANUS INTERNATIONAL

1. We export fine coir fibers extracted from mature green and brown coconut husks. Coir is widely used for commercial and industrial applications to design mats, mattresses, brushes and upholstery.
2. It is known for its low decomposition rate. We provide coir fiber that is free from 2-3% pith, and roots.
3. Natural coir fiber is baled with the assistance of rust free iron Hoops or plastic straps, to ensure its high quality and utility. Our products are available at competitive prices. We also customize the product for a client.
4. Coir fiber is used in the bedding industry, for automobile upholstery and for erosion control.
