## Dansen Aluminum Group

★ The group has been focusing on the aluminum industry for 13 years, with ingenuity and wonderful aluminum creation.

★ Founded in 2010, it covers an area of more than 400 acres, 28,000 square meters, and a construction area of 10,000 square meters.

★ It integrates production, sales, contracting, system doors and windows, construction curtain walls, aluminum veneer. It is a comprehensive economic entity for projects such as interior ceiling panels.

★ The group has a complete set of modern imported sheet metal processing equipment and Lanzhi Vertical Automatic Spraying Line.

It has experienced management personnel and first-class technical team.

★ The group is a high-tech enterprise in Beijing and has obtained high-tech enterprise certificates for many times.

## About Dansen

Dansen Group was founded in 2010, focusing on the aluminum industry for 13 years, integrating product development, material production, engineering design, project construction and other businesses, headquartered in Beijing, with two production bases in Xianghe and Chifeng, covering an area of more than 400 acres, 28,000 square meters. We specialize in the production of wholesale curtain wall aluminum veneer, honeycomb panel, heat transfer aluminum plate, imitation stone aluminum plate, aluminum square tong, aluminum grille, shutters, guardrails, aluminum profiles for construction, aluminum profiles for doors and windows, and make and process all kinds of doors and windows and KFC doors. It is a Grade A qualified curtain wall engineering company. Forming a physical service model of design, production, processing, sales and construction, it providing "Aluminum One-stop" service for aluminum profiles, aluminum windows and doors, aluminum curtain walls and deep processing of the whole industrial chain.

The group has a complete set of modern imported sheet metal processing equipment, as well as imported Lanzhi fully automatic spraying system.

## Business philosophy

Adhere to the business goal of "Creating a brand and becoming a first-class enterprise"  
Adhere to the business philosophy of "Attentive culture, the pursuit of excellence", we pay attention to creating the core corporate culture spirit of "learning, service, and innovation"!

Thousands kinds of building aluminum profiles, as well as industrial profiles, decorative profiles, and custom profiles are widely used in real estate, industrial construction and other industries. With the outstanding features of durability, precise management and fast delivery, Dansen Aluminum has successfully served more than 20,000 projects.

Imported Brand Equipment Ensures High Quality

### Extruders: 600 to 5,000 tons

1. The non-extrusion time is shorter, and the production is more efficient.
2. Applying servo motor control during rod pushing system, the entire rod action is faster, precise and reliable.
3. As a reliable and competitive supplier, we always offer the best quality profiles.

### Furnaces for Wire and Rod

1. The advantages are fast heating, high efficiency, small energy consumption, no oil leakage.
2. The aluminum profiles cutting is flat and precise.
3. They feature with high configuration, long use term and low failure rate.

### Aging Furnaces

1. The furnaces have good performance in temperature uniformity and controlling.
2. The bottom of the train-type furnace is easy to operate. Work pieces loading and unloading is stable and smooth.

### Spraying Line: Japanese Imported Lanzhi

Fine Management

Use virgin aluminum, no recycled.

The specific gravity is more than 10% lighter than that of recycled aluminum.

Substrate iron content less than 0.18%

The surface of the profile should be neat, no cracks,

peeling, corrosion and bubbles defects are allowed or present.

Minor pits, bruises, and abrasions are allowed. Profiles

Wechsler hardness is not less than 8Hw0

Paint film refers to the film coated on the basic surface of metal, cured fluorocarbon paint, can also be called a coating. The types of coatings include two coatings (average film thickness 30um) primer, topcoat; Three coats (average film 40 um) primer, topcoat, varnish; Four coats (average film thickness 65um) primer, barrier paint, topcoat, varnish.

Thermal insulation: low for joining aluminum alloy profiles.

Non-metallic materials with thermal conductivity. Thermal insulation in the middle of the product.

Materials are treated as metal entities. Thermal insulation profile products.

Longitudinal shear characteristic values and transverse tensile eigenvalue results

> 24(N/mm). Strip heat insulation

The composite part of the material allows the coating to have slight cracks,

However, cracks are not allowed in the aluminum substrate.

Very

Fast

Delivery

### Attention to Detail and Excellence

Quality management is quality-cent from product design to equipment procurement, production line automation, equipment maintenance, etc., under the premise of ensuring quality, reasonable control of costs and delivery.

## **Dansen Aluminum Profiles Standardization**

Standardization of card slots, components, and industrial processes,

1

## **Aluminum Profiles Industrialization**

Standardization of construction, design and installation,

2

## **Aluminum Profiles Intelligent**

Intelligent control adjustment, intelligent central control of the whole house.

3

**Civil, thermal break, system window, curtain wall, solar frame and industrial aluminum profile**

## Dansen Aluminum Group Machining Center

①With 13 years of production and processing experience, our business scope includes the manufacturing and selling for civil aluminum profiles, industrial aluminum profiles, aluminum veneer, aluminum honeycomb panels, thermal break aluminum profiles, system window aluminum profiles, curtain wall aluminum profiles, solar frames, frame curtain walls, unit curtain walls and other products.

②There are 6 production lines, with more than 100 sets of equipment such as CNC arbitrary angle cutting double-head saw, six-axis end baht, hydraulic punching machine, computer numerical control machining center (CNC) and so on.

③Large-scale, specialized and strong aluminum profile and aluminum plate processing enterprises in North China

# D Our Featured Projects

Dansen Aluminum operates in good faith and serves attentively. The products are innovative and of excellent quality. Over the years, we have served more than 20,000 engineering projects.

**Thankful for you along the way.** Dansen will continue to improve. "To achieve others is to achieve oneself." Dansen can meet all your cooperation needs.
