

Diamond Jute  
Diversification & Co

Manufacturer and Exporter  
of Jute Diversified and  
Seagrass Home Decor Products

100%  
Eco-Friendly

## Company Info

Jute-the Golden fiber is bio degradable and eco-friendly natural fiber. The climate of Bangladesh is highly conducive for cultivation of jute and around 80% of total world production of raw jute and jute goods are produced in Bangladesh. Globally jute is the second most important natural fiber after cotton. Seagrass is one of the fastest-growing plants in Bangladesh, provides a plentiful and sustainable source of raw material. This rapid growth rate allows for consistent harvesting and production of high-quality materials. And the home decor items we made from it is world's no 1. We have 4 sheds around 1250,000 square feet floor space with conducive working environment, safety and security measure.

Diamond Jute Diversification & Co. is one of the leading and most reputed name in jute diversification industry in Bangladesh. We are the renowned manufacturer and most dependable and reliable exporter of jute diversified products and seagrass home decor items with high quality and competitive price. The company is a professionally managed business house offering an excellent range of jute diversified products and seagrass home decor items to our clients.
