

MUNIR AHMAD ENGINEERING WORKS

**Manufacturer, Exporter & Importer of Textile and Apperal Machinery.
Textile Calender Machine, Cotton Roller(Bowl)
Jute Calender Machine**

About us

- Our Company establish since 1965. The name of our company
- "MUNIR AHMAD ENGINEERING WORKS".
- We are famous in name" PAA MUNIR".
- This name is quality, We manufacturing Calender machine good finish for export goods bed sheet, curtain dyeing and printing many more use it.
- In local use Cotton, Latha, Blended, Camric, Lawn , Denim, Lungi etc.
- We manufacture Jute mills calender for finishing. We manufacturing Cotton Roller(Bowl) for textile use for good finish. We are introducing 9- oller(Bowls) Calender Machine his result in market is very responsible.
- We manufacturing also Dryeing Rage Machine.

Textile Calender Machine

- Calender machine is used for giving all types of textiles to the polish, density Decrease, and thin treatment by the pressure between heating and cotton rolls(bowl). The heating system of the steel roll can be selected among induction, steam, oil, gas, and so on. The roll combination (e.g., 3 or 4 bowl) and the material of cotton roll depend on the processing purpose and user application. Calender machine like used processing Export units, Dyeing units, Printing units, Like a good result (finish) very smooth. Export cloth (bed sheet etc), Lawn , Blended , Latha, Cotton PC, etc.
- **Textile Calender machine We Manufacture Manufacture all sizes (as you like) working width.**
- 9(Nine) Roller(bowl)
7(Seven) Roller(bowl)
5(Five) Roller(bowl)
3(Three) Roller(bowl)
Working Width:
1270 mm (50") , 1520 mm (60"), 1675 mm (66"), 1830 mm (72"), 2030 mm (80"), 2235 mm (88"),
2490 mm (98"), 2790 mm (110") 3200 mm (126")' 3350 3m (132"), 3400mm(134), 3555 mm (140").
- MS-Sides
Bottom & Top rolls(bowl) like MS Steel with Hard Chrome.
MS Steel Heating rolls(bowl) with Hard Chrome
Cotton Rolls(bowl) as you like Polyamaid or
Hard Board or Paper rolls(bowl).
Bracket Bearings.
Entry with Cloth Guarder, Metal Detector, Seam Detector (as like customer).
Exit Platter & Batcher with seperate Gear motor with Inverter System.(As Buyer request).
Drive Gear with motor Inverter System.
Electric Panel.
Hydraulic System.

7-Roller Textile Calender Machine

5-Roller Textile Calender Machine

Cotton Roller(Bowl)

- MS Steel Shaft, Plates & lock are thoroughly inspected for hidden cracks, weak spots etc. and are made true prior to installation in hydraulic press. Roller(bowl) are built around a strong MS Steel Shaft held vertically into the specially designed hydraulic press. Cotton cake punched at its centre are lowered from top which axially compressed hydraulically. Periodic filling & compression ensures the cotton mass to settle without air pockets. The Roller (bowl) is finally locked at the top with help of already turned prepared MS Steel Shaft, Plates & lock.
- Finishing of filled cotton roller(bowl) is an important step in the Roller(bowl) manufacture. Roller(bowl) are turned initially carbide tip toll. The finish of cotton Roller(bowl) is produced by applying fine emery paper.
