

# PURE HONEY

## FROM WILD HONEYBEES OF TANZANIA

We source from local beekeepers who harvest raw honey from the deep forests of Tanzania. Their gentle bee-friendly approach produces delicious honey that goes directly to you.

### Unique Taste That Comes From Natural Process

You cannot have that exceptional taste of raw honey from commercial production. Chemicals, antibiotics, and commercial farming practices kill the unique taste of honey. We support remote beekeepers who pursue traditional beekeeping. That's how we can leave more honeybees in healthy conditions in their forests. Traditional beekeeping lets the honeybees collect from the wildflowers and build their combs naturally. Beekeepers harvest their honey when enough is available to collect from the bees. That leaves the bees healthy, and we get our purest tasty honey.

### No Additives, Just Natural Honey

You get the same honey the beekeepers harvest from the Tanzanian forests. We never add additives or chemicals to manipulate the honey quality.

### 100% Safe & Hygienic

Our honey is so pure and hygienic that you can use it for food, cosmetics, and medicine manufacturing. We offer laboratory tests from Eurofins to confirm you get the raw and healthy version of our honey. You can also request to send over a sample to test its distinctive taste and quality.
