Software Development

Teciza POS (Point Of Sale) Software feature helps you to streamline your retail operations.
Providing easy-to-use advanced capabilities, it automates the 'Checkout' process for smooth retail operations.

All it takes is a one-time configuration for the POS feature to be activated!

Teciza POS (Point Of Sale) software is affordable, easy to use and will help you to manage inventory, customers, employees and money. It gives you more control of your counter sales, back office procedures, stockroom management and accounting.

Exam Management System

Teciza platform provides you the option to conduct online exams on the mobile phone of the student.

While the student is attempting an online exam on a mobile phone, the camera of the phone continuously streams the activity/face of the user to exam proctor. Exam proctor can ensure that candidate is not using any means or taking help from books, notebooks, or talking to another person while the exam is happening. We are conducting many such exams for various educational institutes across the world.

**Following types are supported:**

Video Proctoring

Audio Proctoring

Image Proctoring

Screen Recording

Automated AI Proctoring

HR & Payroll Management System

TECIZA offers the finest HR & Payroll Software in Qatar.

From simple Payroll software, HR software to HRMS (Human Resource & Payroll Management software), Employee Attendance Management software, WPS Compliance, Wage Protection System, or a Convenient Payroll service - our Teciza payroll software is the right one!

Teciza Payroll is the only Software Application that unifies HR, Document Management, Live Attendance System, and Payroll into a single system-of-record.

Enterprise Resource Planning (ERP)

Teciza ERP provides the technology you need to integrate the information from all your key business functions. It comes complete with every module and function included, so you only need to enter it once and the entire suite knows about it.

Your Core business functions, including production, sales, purchasing, accounting, distribution, Point of Sale, supply chain and human resources are all limited by your capacity to cross reference information from diverse systems.

Teciza ERP gives you maximum flexibility from the creation of your Chart of Accounts and Cost Centres to Real Time Reporting and easy to use Graphical presentation of data. It provides drillable information throughout its extensive reports. Drill into your Balance Sheet or Profit & Loss down to individual transactions in real time. Full Audit Trail is provided to track all transactions ensuring data integrity.

• Website / eCommerce site Development

Is your website empowering your business goals?
Is your business ethos reaching your target audience?

We believe that good websites can reach good heights and speak volumes and we work out solutions that we believe in. We as one of the leading Qatar Web Design Agency & Development Company aims to provide websites that give businesses huge conversions.

At Teciza, it's all about bringing businesses to life - through our excelling web design, development and digital marketing strategies!

We are experts at developing websites that reflect your brand and communicate your words across. Once your message hits the right audience, you begin to rake. For this, Teciza can help you excel. Our expert's mantra is, Style with Substance, where substance includes speed, accessibility, user-friendliness and above all, increased functionality.
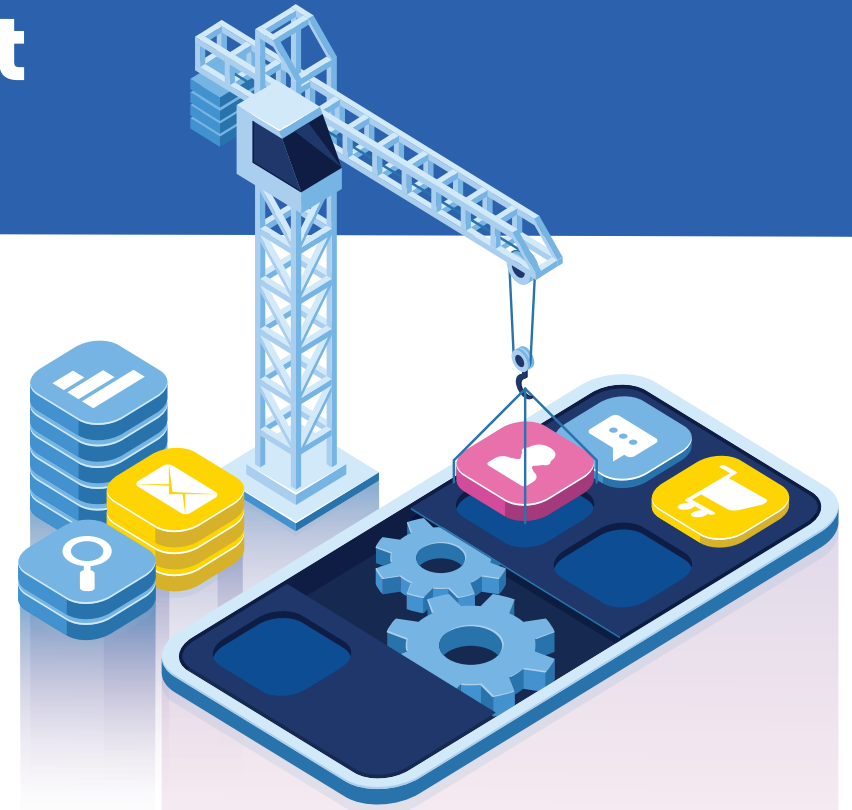

E-Commerce

As a professional retail & eCommerce software development company, we develop exceptionally original eCommerce website development services for small and mid-scale businesses of industry verticals.
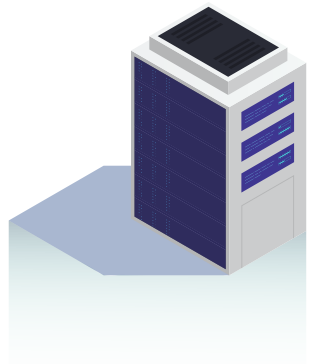

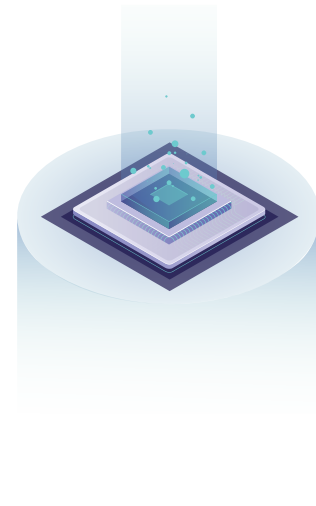

• Mobile App Development

**Teciza uses cutting edge technologies to
deliver Mobile apps to satisfy customer needs.**

**Our expertise as mobile development
is proven by their reviews.**

General Trading

Outsource your IT support with Teciza.

On one hand, you don't need to keep a dedicated work station available for the support specialist at all times. On the other, you are certain that the routine maintenance tasks and common IT issues that arise on a daily basis are taken care of regularly and on time. Getting IT support online also has the benefit of short response times and, in most instances, direct involvement of the support provider in performing the necessary IT tasks on computers in your office.

The set of IT support services we offer remotely includes the following:

- User walk-through instructions.

- Regular and scheduled maintenance tasks (such as software updates, data backup, etc.

- Remote monitoring of system performance.

For communicating remotely with our clients and performing necessary operations on their computers, we utilize the entire spectrum of online IT support methods that modern technology offers: voiceover software, text-only channels like email or chat, and remote desktop applications.
