### HC600S

Recently developed a strong performance of industrial intelligent scan code terminal. MTK platform, Cortex-A53 2.0ghz, standard 3+32G memory, support optional 4+64G; With fingerprint identification, two-dimensional code scanning, NFC, face recognition, wi

### HC720S

This one integrates powerful UHF RFID capabilities. Using the self-developed UHF module based on Impinj E710 / R2000 chip, data acquisition is accurate and fast, and the reading range is wide. The reading distance in outdoor open environment is more than

### HC710S

HC710S is an industrial-grade UHF intelligent UHF handheld terminal with strong performance carefully built by Shenzhen XinlianIntelligent. Developed based on Android 12 operating system, using high-performance processor, quad-core CPU, support dual-band

### HC605S

The product is based on the MTK solution, uses an 8-core processor and is developed on the Android 12 operating system. Support dual-band WiFi and high-speed 4G communication, 5000mAh replaceable battery. Users can customize and expand functions according
