RELIABLE

INSTRUMENT TRANSFORMERS

Instrument Transformers are an essential link for the safe and efficient operation of transmission networks. They provide accurate and reliable current and voltage measurements for secondary equipment such as meters, protection relays and other devices.

Our instrument transformers are designed for their long-term robustness, safety and reliability.

STRATON offers a comprehensive range of instrument transformers up to 132kV.

Product Range

- Cast resin current transformers for AIS application
- Cast resin inductive voltage transformers for AIS application
- Oil-impregnated paper (OIP) insulated current transformers
- Oil-impregnated paper (OIP) insulated inductive voltage transformers
- Cycloaliphatic Cast resin current transformers for Outdoor application
- Cycloaliphatic Cast resin inductive voltage transformers for Outdoor application

Choose us for

Expertise

Quality Workmanship

Timely Delivery

Our Mission

Build world class products & deliver superior value through quality & reliability

Our Vision

To become a distinct leader in our domain through relentless efforts & innovative work

Our Values

Customer Focus, Integrity, Innovation, Competitiveness

Products

- > Indoor Cast resin Instrument transformers
- > Outdoor Cast resin Instrument transformers
- > Outdoor Oil immersed instrument transformers
- > Control Transformers
- > Customized resin castings

Strengths

Quality

Superior quality raw material with strict inward inspection and process control ensures our product quality

Reliability

Complying to partial discharge requirements as per latest product standards ensures reliability

Timely Delivery

We work hard to deliver on the industry beating schedules everytime

Service

We offer best-in class after sales service

Straton Electricals Private Limited
