

Fuel Your Progress: Achieve Greater Efficiency with Us!

# *introducing* **TANASURGA**

Tana Surga is a concept that evokes images of abundant natural beauty, pristine landscapes, and a place where nature thrives harmoniously. It symbolizes a paradise-like environment, often reflecting regions rich in resources, fertile lands, and a connection to the earth's purity. In many contexts, Tana Surga can represent both a physical location, filled with lush greenery, and a metaphorical idea, where sustainable living and balance with nature are paramount.

FOUNDER

# VISION

"To be the leading global partner in commodity exports, driving progress and efficiency for sustainable growth."

This vision reflects your company's goal of becoming a top player in the global export market while focusing on both progress and sustainability.

# MISSION

## 1. Deliver Excellence

- To provide high-quality, efficient, and reliable export solutions that exceed customer expectations.

## 2. Foster Sustainability

- To implement eco-friendly practices throughout our operations, ensuring that we contribute positively to environmental conservation and sustainable development.

## 3. Innovate Continuously

- To stay ahead by leveraging cutting-edge technologies and innovative strategies that improve the efficiency and performance of our services.

## 4. Build Strong Partnerships

- To develop and maintain long-lasting, trust-based relationships with our clients, suppliers, and stakeholders by delivering consistent value and ethical business practices.

## 5. Empower Growth

- To fuel the progress of our clients, employees, and partners by creating opportunities for growth, learning, and success in the global market.

# Our Product

## **PALM SHELL**

Moisture Content : 17-20%  
Inherent Moisture : 10-14%  
Ash Content : 1-3%  
Volatile Matter : 28-37% max  
Fix Carbon : by difference

## **COCONUT**

Contact us for more  
infomation

## **PALM CAKE**

Ash Content : 3.28%  
Energy From Fat : 61,47%  
Carbohydrates : 59,94%  
Protein Content : 13.43%  
Water Content : 16.53%  
Crude Fiber : 12.57%

# Our Product

**DRAGONFRUIT**

# PROJECT 04

## *Palm Shell*

Indonesia is one of the largest producers of palm oil in the world and exports palm shell (a by-product of the palm oil industry) to various countries.

Palm shell is highly valued for its biomass energy potential and is often used as an alternative fuel in power plants and industrial boilers. It is known for its high calorific value and low ash content, making it an environmentally friendly energy source.

Therefore, our trading company has the ability to provide and supply palm shell in various grades and quantities to our esteemed buyers.

# Company **VALUE**

## Efficiency

We are committed to optimizing every step of the process, from sourcing to delivery, ensuring that our clients experience maximum productivity and seamless operations.

## Sustainability

We prioritize environmentally responsible practices to ensure long-term viability for both our business and the global ecosystem, contributing to a sustainable future.

## Integrity

We uphold the highest ethical standards in all our transactions, fostering trust and long-term partnerships with our clients and stakeholders.

## Innovation

By embracing cutting-edge technology and continuous improvement, we enhance our operational capabilities, ensuring that we deliver the best solutions to fuel your progress.

## Collaboration

We believe in the power of teamwork. Through strong partnerships with our clients and suppliers, we create value and drive mutual success.
