Specialized Construction & Controlled Demolition

Specialised Cutting, Coring, Drilling, Boring Contracting

About Hanan Al Wafaa

Since its inception in 1998, Hanan Al Wafa Trading & Contracting (HWTC) has established itself as a leader in providing superior construction solutions across Saudi Arabia. Our rebranding in 2005 marked a new era of growth and innovation, positioning us as a trusted partner for major contractors and builders.

HWTC's portfolio boasts over 500 successfully completed projects, a testament to our expertise in Diamond wire cutting for concrete and Steel, cutting and drilling concrete walls/ Floor, slabs, doorways, and more. Our advanced Chemical Anchoring techniques and state-of-the-art equipment from Germany, Sweden, and Japan ensure precision and reliability in every project.

In response to evolving market needs, HWTC has expanded its services to include controlled demolitions, concrete repairing, and waterproofing, offering comprehensive solutions for complex construction challenges. Our turnkey finishing work for housing projects, along with house renovation and consultation services, highlights our commitment to delivering end-to-end project management and execution.

Our trading division complements our contracting services, providing cobalt brand Core drilling, cutting machine spares and consumables, ensuring our clients have access to the highest quality materials and equipment. As one of the original pioneers in this field, HWTC remains dedicated to pushing the boundaries of innovation and excellence, making us the ideal partner for large-scale, high-stakes projects.

Our Services

1. Concrete & Steel Cutting

- Concrete Saw Cutting
- Concrete/Steel Diamond Wire Cutting

2. Concrete Coring

- Vertical Coring
- Horizontal Coring
- Angled Coring
- Special Coring

3. Concrete Treatment

- Waterproofing

4. Chemical Anchoring

5. Turnkey Finishing Works

6. Horizontal Directional Drilling

- (HDPE) Pipe Welding

7. General Equipment Sourcing

- Cobalt Diamond Tools

Concrete & Steel Cutting

Experience a new dimension of construction with Hanan Al Wafa's Concrete Cutting services. Committed to excellence, safety, and client satisfaction, our certified professionals use cutting-edge technology and industry expertise to elevate your projects.

Our range of wall saw machines can handle concrete up to 80 cm in thickness and any length. Additionally, we collaborate with leading manufacturers to create tailor-made machines for specific jobs. Our team also receives specialized training from top engineers at HYDRO STRESS Switzerland, ensuring we are equipped to handle even the most challenging projects.

Concrete Saw Cutting

Our expert team uses advanced saw cutting techniques to provide precise and efficient cuts for all types of concrete structures, ensuring minimal disruption and optimal results.

Concrete/Steel Diamond Wire Cutting

We offer specialized wire cutting services for both concrete and steel, delivering clean and accurate cuts for complex projects, from demolition to renovation.

Concrete Coring

At Hanan Al Wafa, our Core Drilling services redefine precision in the construction industry. Guided by a commitment to excellence, safety, and client satisfaction, our certified professionals utilize advanced technology and industry expertise to ensure the success of your projects.

Our current ranges of machines are suitable for drilling up to 3 meters depth and diameter from 12mm to 600 mm. Our principles are capable of manufacturing tailor made machines as per client requirements. Our team also receives specialized training from top engineers at HYDRO STRESS Switzerland, ensuring we are equipped to handle even the most challenging projects.

Vertical Coring

Ideal for creating perfect vertical holes for utility installations, our vertical coring services ensure accuracy and structural integrity.

Horizontal Coring

Our horizontal coring solutions are designed for precise hole creation in various applications, facilitating seamless integration of utilities and services.

Angled Coring

We specialize in angled coring, providing the flexibility to create holes at any angle required, tailored to your project's specific needs.

Special Coring

For unique or challenging requirements, our special coring services offer customized solutions to meet your exact specifications.

Concrete Treatment

Experience the pinnacle of durability and performance with Hanan AlWafa's Concrete Treatment services. Dedicated to excellence, safety, and client satisfaction, our certified professionals use advanced technology and proven techniques to enhance your concrete structures.

Our waterproofing solutions safeguard your concrete against water damage, extending the lifespan and maintaining the integrity of your structures. We use state-of-the-art materials and methods to ensure effective and long-lasting protection.

Chemical Anchoring

At Hanan AlWafa, our Chemical Anchoring services redefine stability in construction. Rooted in a commitment to excellence, safety, and client satisfaction, our certified professionals leverage advanced techniques and cutting-edge equipment to fortify the foundation of your projects.

Our chemical anchoring services provide strong and reliable fastening solutions for structural and non-structural applications, ensuring secure attachment in concrete and masonry.

Turnkey Finishing Works

From initial planning to final touches, our turnkey finishing works deliver complete project solutions, encompassing all aspects of finishing to achieve a polished and professional result.

Horizontal Directional Drilling (HDD)

Horizontal Directional Drilling (HDD) is a trenchless method used to install underground pipelines, conduits, and cables without extensive excavation. This technique involves drilling a pilot hole along a predetermined path, then enlarging the hole to accommodate the desired utility installation, ensuring minimal surface disruption.

Benefits of HDD

- **Minimal Disruption:** No extensive excavation, reducing impact on the environment and existing structures.
- **Versatility:** Effective in diverse terrains, including urban, rocky, and densely populated areas.
- **Cost-effective:** Reduces project costs by eliminating large-scale excavation.
- **Efficient:** Faster project completion, saving time and money.

(HDPE) Pipe Welding

We offer horizontal directional drilling services with HDPE pipe welding, providing efficient and precise installation of underground utilities without disrupting the surface.

Trading & Special Equipment Sourcing

Cobalt Diamond Tools

Cobalt Diamond Tools specializes in high-quality tools for cutting and drilling, offering superior performance and durability.

- Diamond Core Bits
- Diamond Blades
- Diamond Wires
