About Us

GR EXPORTS is a one-stop trading company dealing in natural and man-made Indian stones like granite, marble, quartz stone (engineered stone slabs), sandstone, limestone, semi-precious stone slabs, etc. We are not merely conduits of stone trading, but we cater to the needs of international clients with our expertise, experience and efficiency.

We started our journey as a trading company with a focused aim to make exclusive associations with international clients. We are based in India but follow an impeccable work ethic as per international standards. With the optimal blend of rich Indian values and absolute professionalism of the west, we aspire to build lasting relationships with our clients that will transcend business collaborations. Our friendly and competent team will be there at every step of the way to understand your needs, take your feedback, accept changes and act on it.

As an environmentally conscious company, we collaborate only with manufacturing units that extract these stones responsibly and sustainably. We value your time and ensure that our orders get delivered as per the deadline and assure complete professionalism, just the way it should be. We offer all this and more at competitive prices. We have standard and customised packages as per the quality, thickness, colour and pattern of the stones. Rest assured, you will only have to pay for what is delivered to you. And we deliver what we promise!

We process our own blocks to get the good quality and also purchase the good quality material to export to our clients. We have gained considerable acknowledgement in the stone trade community with the help of our expertise team and deep knowledge of the domain. Our well developed infrastructure and skilled team of professionals has enabled us to attain perfection in fulfilling every expectation of our clients. We acquire a quality centric approach in our dealing and work and hence with our regular checkups of material, we assure our clients about the quality of products.

Mission

To understand industry trends and provide all kinds of natural and man-made Indian stones under one roof to international clients. Along with a steadfast commitment of timely delivering superior quality stones and efficient service, our open-minded approach and acceptance of client feedback make us their trusted partner in India.

Vision

To grow from a trading company into a global brand and be as rock-solid, stable and long-lasting as the stones. We aspire to have our own manufacturing units and stockyards in India with a strong distribution network in multiple countries that will further enable us to be the agents of change in this industry.

Our Products

Granite

Granite is a natural stone that is formed from molten lava and primarily composed of quartz. Like marble & limestone, granite is quarried from mines.
