

Manufacturer And Exporter Of Premium Quality Rubberised PVC Paver Moulds

LANDMARK POLYMERS

[www.landmarkpolymers.com](http://www.landmarkpolymers.com)

## About Us

### Why Choose US?

The unique selling point of our products is their quality. We provide customers with the best technologies at the minimum costs without compromising with the quality and reliability.

### Our Vision

Our vision is to develop quality pvc moulds and machineries that play pivotal role in the development of the society.

### Best Quality

Being a quality conscious organization since the time of our establishment . we have installed a quality testing facility that is equipped with all necessary inspection tools.

### Long Life

Our professionals ensure that these products are in compliance we are 100% virgin raw material in our products.

## Quality Control

Land mark polymers ensures that only the best quality products are made into products for our customers. Years of research and development has resulted in products engineered to suit your every demand. Concrete pavers made with PVC moulds have good fit and finish overall. PVC moulds for paver block manufactured by landmark polymers are a premium quality offering.

### Difference Between Landmark Moulds And Other Types Of Moulds

SR.NO.	SUBJECT OF COMPARISON	LANDMARK MOULDS	REGULAR PVC MOULDS	RUBBER MOULDS
1	Life cycle	High	Poor	Good
2	Shining & Flexibility	Superb	Less	High
3	Density	Less	High	High
4	Black Carbon Markon on Pavers	Not Possible	Not Possible	Possible
5	Daily Cleaning	Not Required	Required	Required Acid Wash
6	Acid Resistance	Excellence	Average	Average
7	Remoulding Facility	Available	Available	Not Available

## PRODUCTS

### Zigzag / Unipaver Group

LP - 01A

LP - 01B

LP - 01C

LP - 01D

LP - 01E

100 sq.ft = 288 pcs  
Height = 40/60/80/100 mm

### Cosmic

LP - 09C

LP - 09D

LP - 09E

**Star**

100 sq.ft = 196 pcs  
Height = 60/80 mm

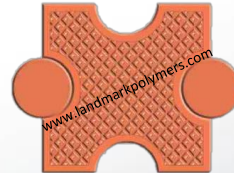

**Brook / Oxford**

LP - 010A

LP - 010B

LP - 010C

100 sq.ft = 196 pcs  
Height = 40/60/80 mm

### Big brook

LP - 011A

100 sq.ft = 196 pcs  
Height = 60/80 mm

### Vajra

LP - 012A

100 sq.ft = 196 pcs  
Height = 40/60 mm

### Hexagon

LP - 013A

LP - 013B

100 sq.ft = 288 pcs  
Height = 60 mm

### V Shape / Arrow

LP - 014A

100 sq.ft = 300 pcs  
Height = 60 mm

### L - shape

LP - 015A

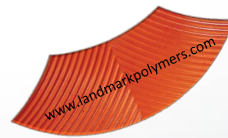

100 sq.ft = 196 pcs  
Height = 40/60 mm

### Arch paver

LP - 016A

100 sq.ft = 276 pcs  
Height = 60 mm

LP - 016B

**TRIHEX**

LP - 017A

100 sq.ft = 247 pcs  
Height = 60/80 mm

**Flower**

LP - 018A

100 sq.ft = 220 pcs  
Height = 60 mm

LP - 018B

**Splendour**

LP - 019A

100 sq.ft = 142 pcs  
Height = 60 mm

**Kamal**

LP - 020A

100 sq.ft = 220 pcs  
Height = 60 mm

### Monarc

LP - 021A

100 sq.ft = 250 pcs  
Height = 60 mm

LP - 021B

### Zigma

LP - 022A

100 sq.ft = 209 pcs  
Height = 60 mm

### Plus

LP - 023A

100 sq.ft = 275 pcs  
Height = 60 mm

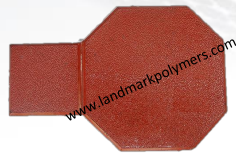

### Tigris

LP - 024A

100 sq.ft = 289 pcs  
Height = 60 mm

**Kirtal**

LP - 025A

100 sq.ft = 180 pcs  
Height = 60 mm

**Deltoid**

LP - 026A

100 sq.ft = 150 pcs  
Height = 60 mm

**Left - Right**

LP - 027A

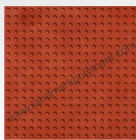

100 sq.ft = 210 pcs  
Height = 60 mm

## Colours And Chemicals

### Concrete Hardener:

Landmark Polymers recommends the use of concrete hardeners in the paving manufacturing process to accelerate setting time. When admixed with concrete and mortar along with water the concrete hardener accelerates the setting time of the concrete and mortar and helps in achieving high early strength. This product is of use in shot-creting and guniting and in concreting and rendering in cold climatic conditions. Paver industry can highly benefit from the use of this product as it helps in early de-moulding and early shifting of the paver blocks to site saving enormous amount of space utilized in conventional curing and its strength development.

## Colours And Chemicals

### Color Oxide:

The strength of ideal paving blocks is their varieties in shapes, sizes and of colours. The many colours of paving blocks are achieved using the various color oxides that are used in the manufacturing process. The color oxides introduced by Landmark Polymers are the results of years of research and development. They are the ideal fit for our products and they ensure maximum life on the color of the concrete paver blocks manufactured. Over and above the life of the color, it also ensures stronger resistance to wear and tear and combined with the glazing technology of Landmark Moulds, the products remain ever radiant.

## Colours And Chemicals

### Acrylic Lacquer / Clear Polish:

It's applied on the surface of Pavers to impart a decorative finish and colourful look. This is a high gloss, best quality Lacquer coating which provides more coverage area and gives more shine to the surface of Pavers. It can be applied on Cement Concrete Block, Paver Block, and Decorative Tiles and like items.
