

Hubei YongXiang Agricultural Machinery Equipment Co.,Ltd

## Lawn Seeding Machine for Grass Seeds

The Seeding Fertilizing Machine is combined with 8 Rows and 150L Pneumatic Seeder, Radar Sensor, Spreading or Drilling Equipment. it's a simple one and it's very suitable for grass seed sowing or fertilizing. This allows farmers to utilise the optimal time for sowing and benefit from saving grass seeds or fertilizer volume and labor cost.

The Yongxiang 8 rows Seeding Machine is perfectly suited for spreading grass seeds, fertilizer or other seeds which only need broadcast or drill sowing. Support customization of your needs according to farmland and tractor conditions.

YongXiang offers a combined 150L pneumatic seeder with radar sensor and broadcast or drill equipment. This allows farmers to utilise the optimal time for sowing and benefit from immediate erosion protection. For most farmers, sowing catch crops directly as they cultivate their stubble is the easiest approach, as it avoids an additional pass and reduces working time, effort and costs.
