

ParagonTapes

Manufacturers of self adhesive and special tapes

ADHESIVE TAPE THAT WORKS

Paragon Tapes is a renowned adhesive tape manufacturing company that has gained recognition for its commitment to excellence and innovation. With a relentless focus on product quality, cutting-edge technology, and customer satisfaction, Paragon Tapes has become a leading player in the global adhesive tape industry. Paragon Tapes is a standout company in the field of adhesive tape manufacturing.

We at paragon welcome you for a tour of different kinds of adhesive tapes where better never compromises quality We believe in invention through the vision of our valued customers and our well-trained technical staff. Paragon tapes is a Global production and supply Facility that produces over 10 million square feet Self Adhesive Tapes per month

Building Relationships

Establishing and nurturing strong client relationships is a cornerstone of business success. Cultivating meaningful connections with clients goes beyond transactional interactions and fosters long-term loyalty and mutually beneficial partnerships. highlighting the importance of communication, trust, responsiveness, and value creation.

Paragon Tapes ensures that every person in the company undergoes periodic training to ameliorate their knowledge and keep updated with the latest developments in technology & production

At Paagon Tapes, our prime focus is to meet the needs of our customers, which often translates into the creation of innovative self-adhesive tape products.

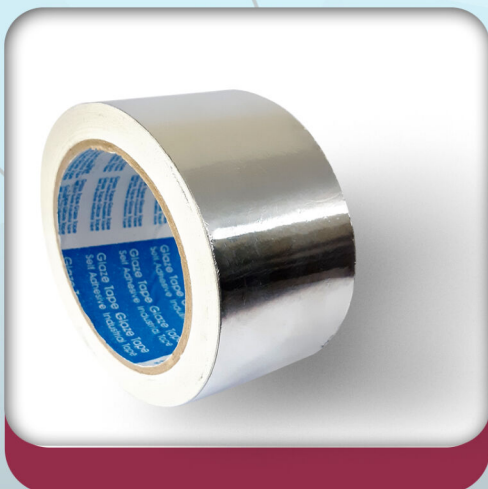

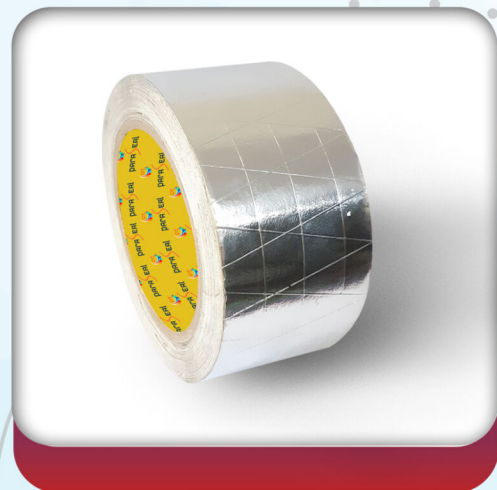

Aluglass Tape

Aluminium Foil is Laminated with Glass Cloth and Combined with a high-performance synthetic rubber based adhesive. It is for joining and sealing laminated fiberglass blanket, duct board joints and flexible air duct seams and connections.

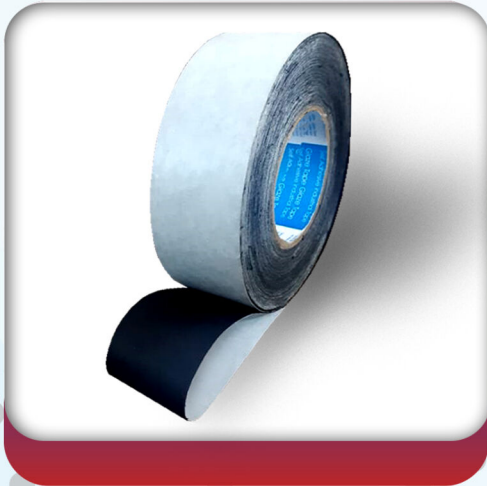

Aluminium FSK Tape

FSk Tape is Coated with strong acrylic adhesive and laminated with release liner. This tape is used mainly in duct insulation. This tape is also used as heat reflector and sealing of double-glazing units.

Aluminium Foil Tape

This Tape Provides an excellent moisture dust, Flame, Certain Chemical and dissipate heat. Generally used for many permanent sealing, holding, Splicing, Masking and ducting application.

Black Cotton Tape With Paper liner

This tape is commonly used for insulating protection of electrical parts and wires, widely used for bundling and packaging

BOPP Packing TRPN Tape

Carton Packaging tapes are made from thin sheets of bioriented polypropylene (BOPP) which serves as the backing material. These backing materials are then coated with various thickness of acrylic adhesives for different weighing requirements and according to the season, different temperature range tapes can be elected.

BOPP Packing Brown Tape

This tape is used for packaging carton boxes. BOPP film is coated with various thickness of adhesive for different weight requirements. BOPP packing tape is available in variety of widths, lengths & colours to meet your specific needs

BOPP Printed Tape

Company Name, Logo, contact information & customized messages can be printed on tape to communicate quality & professionalism. It also seals, protects and secures your transport packages with easy-to-recognize messages indicating features to deflect pilferage and counterfeiting.

BOPP Colour Tape

This tape is used for packaging carton boxes. BOPP film is coated with various thickness of adhesive for different weight requirements. BOPP colour tape is available in variety of widths, lengths & colours to meet your specific needs.

BOPP Black HVAC Tape

60 mic BOPP Tape Coated with water based acrylic adhesive. This tape replaces black duct tape, lasts longer and will not delaminate with age. Available in black, this tape provides easy application and superior performance and durability over a wide range of temperatures and environmental conditions.

Blue Holding Tape

Its features are like high temperature resistance, high tensile strength, good adhesion and erosion resistance etc.

This tape is especially suitable for the family electrical appliances and it's mostly applied for the splicing, fixation and joint of the electrical parts during the production lines of the family appliances.

Copper Foil Tape

This tape provides an excellent moisture dust, Flame, Certain chemical and dissipate heat. Generally used for many permanent sealing, holding, splicing or masking application.

Cross Filament Tape

This tape has Fiberglass reinforced backing, very high tensile strength, not easy to break. Best packing solution in the most economical way. This tape has wide applications. High resistance to abrasion and moisture.

Duct Tape

Possessing outstanding conformity, this tape is designed for industrial or pipe wrapping. Two kinds of film one used as backing material - one is embossed film, easy tear and the other is shiny film.

Double Sided Cloth Tape

Double Sided Cloth tape is with cotton gauze backing and polyester liner siliconized on both sides. It is particularly used for flexo hunters & carpet laying, domestic use and Dye.

Double Sided Foam Tape

This is a double-sided tape made of good quality EVA foam with strong adhesive. It can well resist compression and bond durably with material surfaces. It can be fixed on light load hangers, used as impact preventing material or adhere with advertising boards or plates.

Double Sided Polyester Tape

This is used on printed plates and in electronic industry, it can be used on rubber plants, handicrafts & Stationary etc., this can be used for high temperature mounting of paper & metal labels.

Double Sided Tissue Tape

Double Sided Cloth tape is with cotton gauze backing and polyester liner siliconized on both sides. It is particularly used for flexo hunters & carpet laying, domestic use and Dye.

Double Sided P.E. Black Foam Tape

This tape is used for affixing all kinds of printed plates, utensils, shock absorbing sheets, stationers and other general uses.

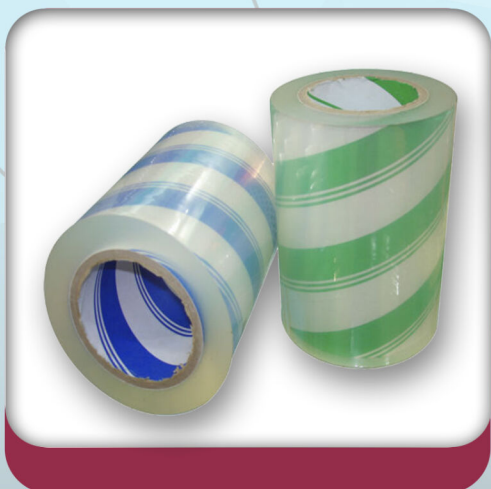

Floor Marking Tape

This tape is widely used as lane marking, section segregating, color-coding, hazard warning labelling, sealing and identifying. It is the initial marking material for ground, electrical post building, vehicles and ramp post etc.

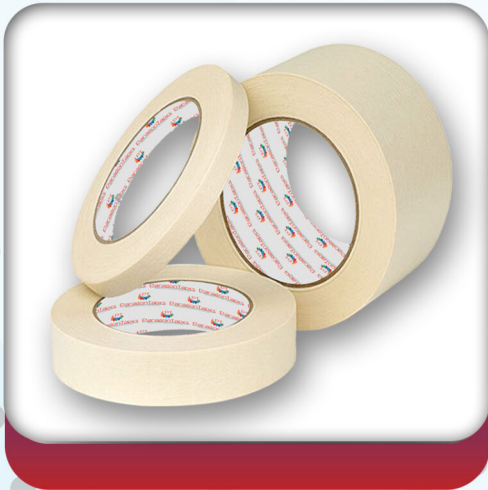

Green Poly Masking Tape

Green poly masking tape is best suitable for protecting from high temperature in the process of powder coating.

Lamination Tape

Super clear Lamination tape is best for over laminating of various labels. It is UV Resistant & best for Machine application. It can also be used for packaging.

Masking Tape

General purpose grade masking tape is used for holding, bundling, sealing and non-critical masking application. Professional grade masking is used in medium temp, paint bake operation for masking cars and trucks during paint repair.

Masking Hi Temp Tape

Designed for masking automotive during OEM painting and repairing. Ideal for protecting from paint and solvent, bleed through can withstand paint oven bake cycles up to 120°C / 140°C for up to 30 minutes.

Mono Filament Tape

This is a heavy-duty packaging tape with glass fibres. It is non-breakable with masking properties.

Nitril Tape

This tape is designed for ducting & fire resistance in construction and electrical insulation

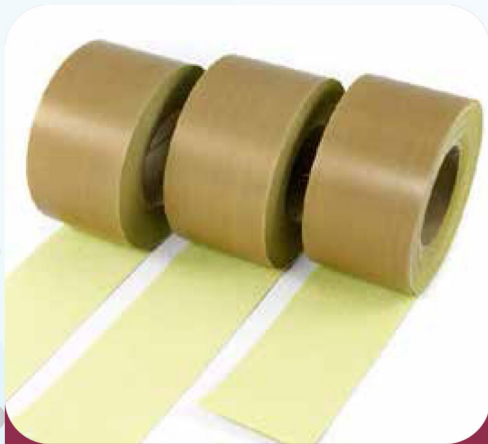

Nylon Tape

This Tape is used for Shoes reinforcement. It is available in two colours, i.e.. Black / White.

Paper Gum Tape

This tape is coated with heat melting PSAs (Rubber PSAs) on craft paper, the tape is designed for packaging. It can also be used in treatment after peeling the PE Layer.

Non Adhesive Teflon Tape

This tape is used for sealing & Cutting of Plastic PVC & PP bags.

Non Water Proof Cloth Tape

This tape is extensively used in packaging fields for various applications. It has excellent adhesive properties & does not dry-up. It is a must for all packaging, maintenance & holding jobs.

Paper Reinforce Tape

Regular grade reinforced gummed paper tape is moisture resistant, has fiberglass filament reinforcement fast adhesion and superior strength packaging tape. This tape provides environmentally friendly high strength packing.

Polymide Tape

Kapton tapes are ideal for masking gold contacts and protecting plug-in connectors & switches during wave soldering. These products have been found to give a better performance than mechanical masks & other tapes. It is suitable for most wave soldering.

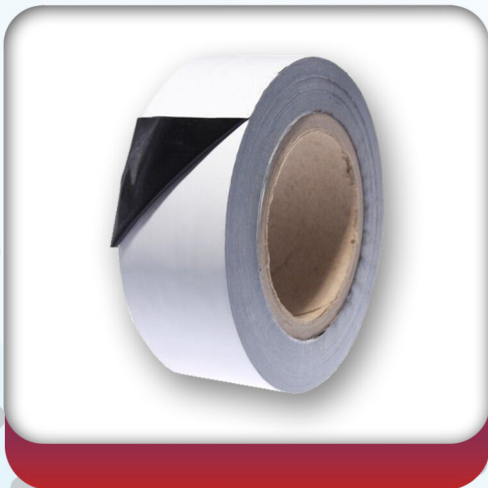

PVC Insulation Tape

This tape is commonly used for insulating protection of electrical parts and wires. widely used for manufacturing of automobiles harness, anti-magnetic coil, household electrical equipment, Refrigerator, Electronic Industry etc.

Surface Protection Tape

This tape has excellent protection against damages & Scratches from transportation, Removal & productions wide range of application. This has adjustable peeling force, no adhesive residue, whether resistance.

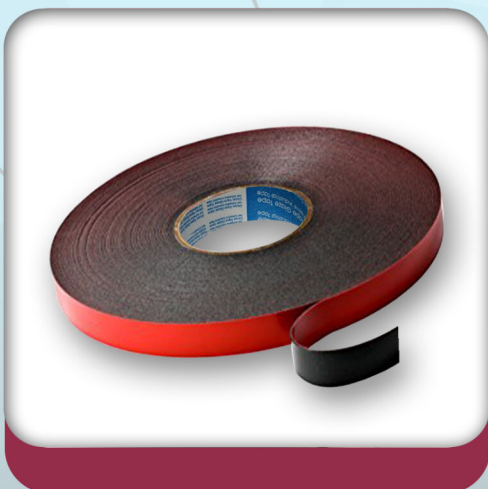

Surface Protection Tape Black & White

This tape is used for the protection of pre-coated sheet metal, which has to undergo roll forming operations. This has an exceptional resistance to ultraviolet rays & the specific adhesion allows the protection of surfaces having a greatly corrugated finish.

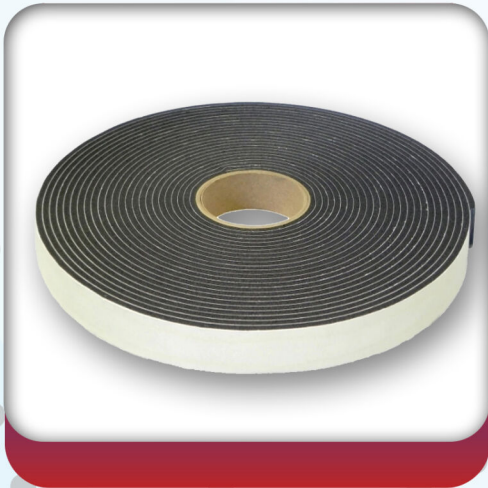

Red Polyester DSTape

Red Polyester DSTape is best suitable for high bonding application. We have this product in various thickness.

VHB Tape

This Tape is very high bond tape formulated with rubber adhesive.

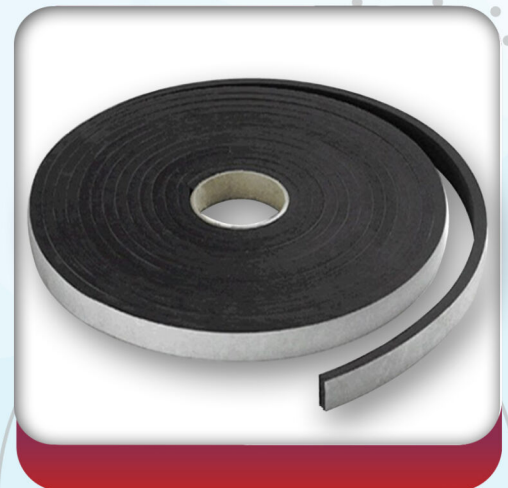

XLPE D/S Foam Tape

Sticky on both sides of tape, Suitable for wall-mount pictures, decorations, it can be used on most types of walls, ceramic tile, wood surface that are clean, dry & smooth. Can be Stamped to various Shapes.

XLPE single Sided Foam Tape

Firm, Waterproof, Dustproof & airtight closed-cell foam provides tight seal for a variety of application, especially for window & floor, great for automobile and marine use to prevent rattle squeaks and vibration.

XLPE Cut Foam Tape

Apply to areas to prevent scratching to providing safety and sure footing. Protect surfaces such as chairs, table legs, stools at home or in office, can be die-cut to custom sizes
