Super Cut & TC Scissors

- Tips are uniform and carefully rounded: minimum risk for trauma, the suture slides smooth over the tip.
- Tungsten Carbide (TC) insert in the jaws: wear-resistant over the time and retain the holding power for many years.
- Open Box Joints: high polished for smooth and effortless action. Strongly bevelled, prevent the suture to get caught on sharp edges. Cleaning is easier.
- maximum flexibility and smooth, easy handling under all operating conditions.
- Ratchets are precisely: safe, effortless locking and unlocking.
- Bows, gracefully curved: shaped for maximum efficiency, balance and comfort.

Cervical Biopsy & Kerrison Punches

G.A. SURGICAL (PVT.) LIMITED

Cervical Biopsy Punches

- Design for Precise Cutting, Minimal Discomfort and Trauma.
- An Assortment of Biopsy Punches with Varied Sizes and Tips Available.
- Angled Tips Facilitates Sampling by Permitting Easier Access to Difficult Areas and Enhances Grasping Ability.
- Roto-Fit Models are Designed for Easy & Effortless Mounting of Shafts.
- Gold Plated Handles & Springs.

Kerrison Punches

- Use of machine oriented and modern manufacturing techniques
- Available in Different Shaft lengths and Bite sizes from 1mm to 5mm
- Available with or without pin injectors
- Excellent cutting features and smooth functioning
- Assorted models including Standard, Semi-Detachable and Detachable patterns.
- The detachable versions are very user friendly

G.A. SURGICAL (PVT.) LIMITED

Extracting forceps, Scaler & Root Elevator

Extracting Forceps, Scaler, Root & Elevator

- We manufacture the complete line of dental instruments in high quality stainless steel.
- If you have need our complete line dental instruments catalogue kindly email us.

Cardiovascular Clamps

- Atraumatic Jaws With serrations are designed to clamp and hold without slipping.
- Grips tissue delicately yet firmly.
- Completely occlude a vessel, reducing the danger of crushing or causing undue damage to the intima.
- Ratchets on vascular clamps provide indispensable finite control for arterial clamping.
- Assorted Patterns including cooley, Pediatric and delicate models.
- DeBakey Dissecting Forceps are also available in Titanium.

Chisels, Osteotomes & Gouges

- European Standard Stainless Steel to Acquire Optimum Hardness.
- Polished Razor Sharp Edges.
- Assorted Models Including Standard, English & french Patterns.
- Chisels & Osteotomes are Also Available with Extremely Hard & Durable TC Edge.

TC Pliers & Cutters

- Tungsten carbide inserts are Brazed to the Pliers using a unique technology called "Vacuum Brazing"
- Tungsten Carbide Inserts with the simultaneous heat treatment process of instrument in a vacuum furnace, using copper as a brazing agent.
- The bond between tungsten carbide insert and the jaw of Plier is very strong and compact i.e. without any pores. As a result the chances of contamination after sterilization are limited.
- Assorted models can be produced both in Standard or Modified designs.

Micro Instruments

- These instruments have tungsten carbide inserts bonded to their jaws
- Safety Wave safety box lock
- Diamond-coated working part
- Tension spring for reliable jaw opening
- The whole range of diameters
- Instruments with rounded edges allows surgeons to control even the finest suture without snagging or tearing it.

TC Scissors & TC Needle Holders

- Tips are uniform and carefully rounded: minimum risk for trauma, the suture slides smooth over the tip.
- Tungsten Carbide (TC) insert in the jaws: wear-resistant over the time and retain the holding power for many years.
- Open Box Joints: high polished for smooth and effortless action. Strongly bevelled, prevent the suture to get caught on sharp edges. Cleaning is easier.
- maximum flexibility and smooth, easy handling under all operating conditions.
- Ratchets are precisely: safe, effortless locking and unlocking.
- Bows, gracefully curved: shaped for maximum efficiency, balance and comfort.

Laparoscopic Instruments

- Ergonomic Handle Designs
- Ratcheted and Non-Ratcheted Handles
- Durable and sturdy for long-lasting use
- Jaw tips include scissors, graspers, babcocks, clamps, bipolar forceps, and dissectors, as well as others.
- Tubes may be available insulated or non-insulated, rotatable or non-rotatable.
