HERBARISTA — AUTHENTIC
ELIXIRS FOR BARTENDERS,
BARISTAS AND CHEFS

HERBARISTA

is premium quality syrups made from rare natural ingredients from different parts of the world.

OUR HISTORY

The story of herbarista began with a dream.

We dreamed of creating a new generation line of syrups - with a special approach to formulations and quality. Since the company was founded, there are no unimportant little things.

The quality of our products is confirmed by experts. The uniqueness of craftsmanship, attention to detail and the use of many years of international experience have been our principles since the foundation of the brand.

OUR ADVANTAGES

We are inspired to create HERBARISTA flavors by the medieval traditions of herbalists and alchemists multiplied by the modern experience of the global bar industry, from Tokyo to New York. Authentic recipes and compositions are constantly being improved, and the quality is confirmed by certificates.

DOUBLE CONCENTRATION

Due to the double concentration, one bottle of HERBARISTA replaces more than a liter of ordinary syrup. If we talk about a bar, coffee shop, confectionery, this gives significant savings and allows you not to raise prices for a long time.

NATURAL COMPOSITION

The most natural composition is what our company proud of. There are no obscure designations, synthetic additives, flavorings or colorants in the compositions of our syrups. HERBARISTA's flavors are bright and rich. They are based on mashed berries and fruits, essential oils, natural essences, herbal extracts and spices.

REDUCED CONTENT OF SIMPLE SUGARS

Working carefully on the formulations, we found the optimal proportion of sucralose and stevia and lowered the content of simple sugars. No cloying — just a pleasant natural taste, reduced calorie content and benefits for people.

CONSISTENCY AND TEXTURE

The HERBARISTA composition is based on natural acacia resin (gum arabic), which allows to achieve an ideal texture — dense, homogeneous and viscous. We use up to 10 times more fruit juices and pulp than in conventional syrups. That is why our products have an unusual consistency with a slight opalescence effect and foam, confirming the naturalness and the best quality.
