LAGIDZE WATERS

CATALOGUE OF TIKHVIN LEMONADE FACTORY PRODUCTS

Traditions of 1887

The brand founder Mitrofan Lagidze was born in 1869 in the village Cholevi of Kutaisi province in the family of a nobleman. In 1887 the young Mitrofan Lagidze working in the Kutaisi pharmaceutical shop owned by Kokochashvili and Ivanitski, created a recipe for natural fruit infused water.

In 1900 he opened his lemonade factory in Kutaisi. In 1906 he came to Tbilisi and opened a new lemonade factory and a legendary "Lagidze Waters" shop on Rustaveli Avenue with the support of Ilya Chavchavadze and Akaki Tsereteli.

In 1921 the factory was burnt down and Mitrofan Lagidze started the soft drink production in the basement of his house.

In 1927 he opened a new big lemonade factory in Tbilisi, which is still being operated under the head of his grandson Tornike Lagidze.

In 1934 he was the first in Georgia who started to add carbon dioxide to the soft drinks.

In 1952 Mitrofan Lagidze was appointed a principal adviser of the "Glavfructvoda" department in the Ministry of Food Industry of the USSR. One should note that 90 % of recipes in the Collection of Soft Drink Recipes published by the Ministry of Food Industry of the USSR were created by Mitrofan Lagidze.

Mitrofan Lagidze worked until the last days of his life (1960).

Mitrofan Lagidze was not only a manufacturer but also a philanthropist. He supported Georgian intellectuals, published books, built the first electrical power station in Kutaisi. Mitrofan Lagidze created a variety of soft drinks using the fruits growing in Georgia.

LAGIDZE WATERS

A SYMBOL OF UNCHANGABLE AND IMPECCABLE TASTE

Today the name of Mitrofan Lagidze and trademark "Lagidze Waters" are known to almost everyone. The history of the trademark dates back to XIX century and begins in Kutaisi province where flora of both hemispheres is represented by the great variety of splendid tropical plants. Being a pharmacist's apprentice in Kutaisi, Mitrofan Lagidze follows closely the lemonade production based on the use of flavored essences and in 1887 he starts his early experiments – he tries to make natural syrups from fruits and herbs grown on the lands along the Rion river. Kutaisi is one of the most ancient cities of the Caucasus, having existed in the times of the Argonautic expedition. In Kutaisi of that time horticulture and winemaking is developed successfully, Prince Oldenburg's winery produces champagne, but perseverance and commitment of the young pharmacist enable us to enjoy splendid flavour of the Lagidze waters collection.

His ambitious experiments start giving the first successful results and in 1900 Lagidze opens a small factory in Kutaisi that produces syrups made from natural fruit and herbs. Some time passes and the small artisan factory turns into a well-equipped one. Mitrofan Lagidze's efforts had not been in vain: today in the Old Town of Tbilisi there is a big enterprise "Lagidze Waters" where the descendants of the master continue producing natural lemonade syrups. Due to their excellent taste qualities, delicate aroma and absence of chemical preservatives, the soft drinks of Lagidze trademark have gained growing and deserved popularity which has extended far beyond the borders of Georgia. The lemonades produced by Lagidze Waters enterprise won golden and silver medals on the international exhibitions in Saint-Petersburg and Vienna (1913-1914).

Mitrofan Lagidze,
a pharmacist's apprentice

Mitrofan Lagidze

Traditions of 1887

Mitrofan Lagidze with his wife and children. Tiflis.

Almost all the lemonades and syrups produced in the USSR were based on the Mitrofan Lagidze recipes

Nowadays in Russia the natural syrups and soft drinks created by Mitrofan Lagidze see their rebirth due to their perfect ecological purity, natural fruits that are rich in vitamins, and total absence of chemical additives. The Lagidze lemonades are time-proved and belong to the category of elite non-alcoholic beverages. Uniqueness of the lemonades containing the valuable nutritional qualities of natural fruits supported by the recommendations from the experts: small children, adolescents and expectant mothers keeping a close eye on their health may have these soft drinks safely.

The non-alcoholic beverages produced by the factory "Lagidze Waters" are dietetic products. According to experts, Lagidze soft drinks have a very high nutritional value. They quench your thirst nicely, have accented aroma and taste of the fruit used to prepare a lemonade; in addition, all the drinks are free from complex carbohydrate and nitrogen compounds present in fresh fruit.

MADE IN TIKHVIN

There is a production of soft drinks made from patented Lagidze syrups in the northwest Russia – in Leningrad Region. The factory is situated on the ancient Tikhvin land which is famous for its long-lasting entrepreneurial traditions. High efficiency equipment of the lemonade factory allows to produce 120 thousand bottles of lemonade per shift. Original syrups and syrup compositions supplied by the joint stock company "Lagidze" (Georgia) and purified water guarantee unsurpassed taste and flavor of the soft drinks produced at the Tikhvin factory.

Currently the Tikhvin Lemonade Factory (LLC "Lagidze Waters") produces 20 types of soft drinks and syrups, which are bottled in branded bottles of 0.5 and 0.33 liter. Lagidze lemonades have a taste of natural fruit and quench your thirst nicely whereas the syrups are widely used in confectionary industry and as a cocktail ingredient. And what is more, mixing syrups with carbonated water allows to make gorgeous refreshment drinks at the local level.

In the centre of the trade mark there is the image of a Georgian woman dressed in the national apparel; 1887 – is the year when the recipes for soft drinks were created. Around the logo there is the name of MITROFAN LAGIDZE which is written in three languages: Georgian, Russian and English.

The trademark was registered on the 26th of July 2004 in the International Bureau of the World Intellectual Property Organization in accordance with the Madrid Agreement and Protocols as per List of Goods and Services – NCL (8): 32 Non-alcoholic drinks; mineral and carbonated waters, fruit and grape juices, fruit soft drinks, syrups and other ingredients for making soft drinks.

International registration №831 895

The image of the trademark indicated in the Certificate of International Registration was published in the newspaper of International Trademarks of the World Intellectual Property Organization.

EQUIPMENT FOR MAKING AND DISPENSING LEMONADE

Increase your income or set up a new profitable business through the use of the latest dispensing equipment!

When compared to the bottled lemonade sale, the sale of draught lemonade gives great profits as a result of the low production cost.

You can choose the type of equipment which best suits your business model. You can take a look at the list of the equipment that offers great opportunities to your business.

Flask-holder and flasks

The Tikhvin Lemonade Factory "LLC Lagidze Waters" offers the equipment for making lemonades right at the bar: flask-holder for five types of syrup and saturator device with tap, mixing water and carbon dioxide (it is possible to use bottled or piped water). The syrup is supplied in disposable PET flasks of 4 litre volume, which makes the use of the equipment easier. The flask-holder can be installed not only on the bar counter, but also on the roll-bars (used for street trading). A source of carbonated water can be a carbo-cooler or chilled bottled sparkling water.

For making 180 ml of lemonade you need 160 ml of water, 20 ml of syrup and 1,5 g of carbon dioxide. You can change the proportion of ingredients according to taste preferences of your customers.

The design of the equipment can decorate the bar or shop counters.

Make your business more profitable. It is simple and rewarding, and on top of it, a rapid return on investment strikes imagination. You will have a great success!

This type of the dispensing equipment has been patented by the Tikhvin Lemonade Factory "LLC Lagidze Waters" in the Federal Service for Intellectual Property, Patents and Trademarks. Patent №94559.

Bar Butler Dispenser

So, you would like to increase your business income, installing dispensing equipment on the bar counter, however there is not enough space for flask holder and saturation device on it. In this case you have an excellent option to place the bar butler dispenser there. A source of carbonated water can be a carbo-cooler or chilled bottled sparkling water. The bar butler dispensers are fitted with holders for 4, 6 or 9 bottles. It takes not so much space on the bar counter and allows you to supply your customers with large selection of syrups. The 0,5 litre bottles with bright labels adjusted to the bar butler dispenser decorate the bar or shop counter. You can use delicious and healthy natural syrups of Mitrofan Lagidze trademark for making milk cocktails, alcoholic and alcohol-free cocktails, various desserts and ice-cream.

Post mix dispensers

Post mix dispenser is an advanced and convenient dispensing equipment which can be installed on the bar counter (in public catering enterprise) or on the roll-bars (used for street trading). The Tikhvin Lemonade Factory "LLC Lagidze Waters" offers the equipment with Flomatic valves and you can pour lemonade simply by pushing the lever.

Lemonade in KEGS

Lemonade in disposable and reusable kegs is used successfully both in retail business and hospitality industry. You can fill disposable bottles with lemonade (like draught «live» beer in the supermarkets) or sell prepared soft drinks at the bar. Sparkling water vending machines, designed to work with lemonade in kegs, are rather inexpensive, simple to operate and guarantee a rapid return on investment.

Gaz water machines

On April, 16th 1932 the newspaper "Evening Moscow" published the following news: "The worker of Leningrad plant "Vienna" Agroschkin manufactured an interesting machine. The machine allows to produce sparkling water in every shop. The first saturator... has already made and installed in the canteen of Smolny". The Tikhvin Lemonade Factory "LLC Lagidze Waters" is a supplier of syrups for most of the companies involved into the lemonade vending business.

Countertop Sparkling Water Machine AMBER-50 (YANTAR-50)

Parameters	Values
Current frequency, Hz / Voltage, V	220/50
Rated power consumption, W	300
Cooler capacity, l/h t=18°C/t=24°C/t=32°C	50/30/18
Volume (bathtub capacity) for water, l	18
Ice field, kg	6
Cooler weight without packaging and water in the tank, kg	20
Overall dimensions, mm width/depth/height	320/470/480
Minimum temperature of drinks, °C	4...6
Refrigerant	R134A, R290
Compressor power, hp ... Watt	¼ ... 250
Other characteristics	<ul style="list-style-type: none"> • LED backlighting of the front panel with your logo • Stainless steel casing • JG connections • Safety inlet valve • Safety block of the water pump • Easy access for full-service maintenance
Products(Optional)	Cold sparkling water Cold still water

Countertop Sparkling Water Machine AMBER-50 (YANTAR-50)

CONNECTION

- A. Input CO₂
- B. Input H₂O
- C. Var.1
- D. Var.2
- E. Side view
- F. Front view
- G. Back view

1. Electrical cable with Euro plug.
2. Power switch 220 V 50 Hz.
3. Thermostat or Temperature Controller
4. Filling taps
5. High Pressure Pump START Button
6. High pressure pump on/off button
7. John Guest quick coupler outputs for connecting water and carbon dioxide hoses
8. Condenser (radiator) of the refrigeration unit
9. Decorative panel
10. Perforation of ventilation of the compressor compartment

Countertop Sparkling Water Machine AMBER-140 (YANTAR-140)

Parameters	Values
Current frequency, Hz / Voltage, V	220/50
Rated power consumption, W	300
Cooler capacity, l/h t=18°C/t=24°C/t=32°C	140/100/60
Volume (bathtub capacity) for water, l	40
Ice field, kg	18
Cooler weight without packaging and water in the tank, kg	36
Overall dimensions, mm width/depth/height	420/420/700
Minimum temperature of drinks, °C	4...6
Refrigerant	R134A, R290
Compressor power, hp Watt	3/4 ... 450
Other characteristics	<ul style="list-style-type: none"> • Safety inlet valve • Safety block of the water pump • Easy access for full service • JG connections
Products(Optional)	Cold sparkling water Cold still water (when connected to the water supply network)

Countertop Sparkling Water Machine AMBER-140 (YANTAR-140)

- A. Input CO₂
- B. Input H₂O for Carbonation
- C. Input H₂O
- D. Accompanying: Output, Input
- E. Gas Water Outlet
- F. Outlet cold H₂O
- G. Recirculation to Column **Apply Thermal Insulation**

1. Electrical cable with Euro plug.
 2. Power switch 220 V 50 Hz.
 3. Thermostat or Temperature Controller
 4. Recirculation pump connector
 5. High Pressure Pump START Button
 6. High pressure pump on/off button
 7. John Guest quick coupler outputs for connecting water and carbon dioxide hoses
 8. Condenser (radiator) of the refrigeration unit
 9. Overflow connection
 10. Carrying handles
- A. Back view
 - B. Front view
 - C. Side view

Tikhvin Lemonade Factory “LLC Lagidze Waters”

The Tikhvin Lemonade Factory “LLC Lagidze Waters” is a company, producing natural premium-class lemonades and syrups of Mitrofan Lagidze trademark. The company has become one of the leaders on the market of healthy and delicious soft drinks. Today the customers taking care of their health can have lemonades made of natural syrups and their compositions on their dinner tables.

Our main task is to produce high quality healthy syrups and lemonades. We use the technology that allows to preserve valuable qualities of fruits, berries and herbs used to make soft drinks for children and adults.

The Tikhvin Lemonade Factory “LLC Lagidze Waters” is proud of its lemonades. The equipment of the factory is one the most expensive and most advanced in the world. It was manufactured on the factories of Germany. Many millions were invested in the equipment and the main reason for that is the following: production of healthy soft drinks on natural ingredients is the only possible in modern technological conditions.

The process of water treatment in Mitrofan Lagidze lemonade production is one of the most important technological stages. In lemonade and syrup production we use only pure water that has passed through the unique biological filtration system. We believe that only such water can be used in lemonades made in accordance with the recipes of Mitrofan Lagidze.

offers the equipment

The experienced professionals of the Tikhvin Lemonade Factory “LLC Lagidze Waters” managed to combine high-end technologies with adherence to the old tradition of making lemonade and unique recipes of Mitrofan Lagidze. It was done to ensure that children as well as the adults in Russia could enjoy the unequalled taste of Mitrofan Lagidze lemonade without fear for their health.

Currently the Tikhvin Lemonade Factory (“LLC Lagidze Waters”) produces 20 types of lemonade and 20 types of syrup.

In the near future we are planning to produce:
Lemonades and syrups made from wild berries (lingonberry, cranberry).
Natural juices and essences.
Drinking water.
Non-alcoholic grogs and mulled wines.
