SOHOJLOVVO FOOD & AGRO

Bangladesh, being a small country in Asia, is gradually increasing the dimension and horizon of the Food & agro industry.

Agriculture dominates both the landscape and the economy of Bangladesh. The country has remained largely agricultural, with nearly half the population employed in this sector. The country has invested deeply in agro-processing and livestock development with immense success that is being followed by many other neighboring countries. Sohojlovvo - Food & Agro is part of that journey.

Sohojlovvo - Food & Agro began operations in the year 2018. Sohojlovvo produces poultry feed, fish-feed, and Day-Old Chicks (broiler & layer). Recently, Sohojlovvo has decided to move ahead with Initial Public Offerings.

An automated manufacturing facility for poultry feed. Such integration provided a powerful thrust to the breeder and hatchery operations of Sohojlovvo by ensuring the availability of quality feed. The company markets and packages its feed products under the brand name of Sohojlovvo .
