# Company Profile

Greenace is fully owned by Hyderabad-based Tejaswini Exports, a startup since 2023 that has been strides in the agri products stream, fast-growing.

Tejaswini Exports was founded by Alapati Murali Krishna, a visionary entrepreneur who brings with him 20 years of experience in the agri and organic initiatives.

Greenace, the flagship brand of Tejaswini is known for vermicompost, wood press oils and other organic products. Our dedicated manufacturing unit is located in Keesara, near Hyderabad.

## Vision

Envision, design and offer topnotch products that cater to global markets, and position Greenace among the top 10 brands

## Mission

Supply high-quality organic products for healthy lives

OUR PRODUCTS

# Benefits Of Vermi Compost

Vermicomposting is the process where earthworms convert organic waste into very high-quality compost. Red Wigglers a species of Earthworms, decay the organic material. The worms thrive in rotting the vegetation and compost.

Worms create Vermicast also known worm castings is the end product of the breakdown of organic matter by the worms. Vermicompost consists of water-soluble nutrients and it is an excellent nutrient-rich organic fertilizer and soil conditioner.

## Benefits Of Vermi Compost

### Soil

- Improves Soil Aeration
- It enriches soil with micro-organisms
- It attracts earthworms already present in the soil
- Improves water holding capacity of Soil

### Plant Growth

- Enhances Plant Growth and crop yield
- Improves root growth and its structure
- Enriches soil with micro-organisms

### Nutrients

- Provides plant with essential nutrients and aids in the suppression of plant diseases
- Worm castings contain 5 times more nitrogen, 7 times more phosphorus and 11 times more potassium than the ordinary soil. These are main minerals required for plant growth
