**J1 Global Co., Ltd.**

Be the First

# J1 Global

## Executive Summary

J1 Global Co., Ltd. is a pioneering **Korean bioscience company** that specializes in the manufacturing of a diverse range of products, including HA/PLA fillers, Skin boosters, and medical devices providing a unique value proposition in the rapidly growing global aesthetic market.

Guided by our corporate philosophy of '**Be the First**', J1 Global seamlessly integrates Korean beauty innovation with rigorous international and strict quality controls. This approach enables us to deliver premium products at competitive prices, meeting the evolving needs of the global market.

Our comprehensive product portfolio, coupled with vertical integration and dedicated R&D capabilities, positions us as among the leaders in the Korean fillers market. Moreover, we are expanding our global presence, harnessing our strengths to meet the increasing demand for high-quality aesthetic solutions worldwide.

**QUALITY FIRST**

**INNOVATIVE  
LEADERSHIP**

# Our Vision, Mission, and Values

At J1 Global Co., Ltd. , our vision, mission, and values are the foundation of everything we do. With a strong and enduring commitment to excellence, safety, and customer trust, we go beyond expectations to deliver solutions that not only enhance beauty but also bring lasting satisfaction to our clients.

## Vision

To lead global aesthetics and biotechnology with innovative high-quality solutions that restore youthfulness and set new standards in beauty and healthcare.

## Mission

Advance HA/PLA fillers, skin boosters, and medical devices through technology

Ensure product safety, reliability, and effectiveness

Foster innovation and excellence in every solution

## Values

Innovation

Quality

Integrity

Customer Focus

Collaboration

Each product is manufactured in our highly controlled facilities, following strict quality and safety standards at every stage of production. This ensures that every unit delivers the reliability, effectiveness, and safety that professionals expect and clients deserve.

# J1 Global Solutions

## Technological Versatility

Mastery of both DVS and BDDE cross-linking agents allow the creation of fillers with distinct properties, potentially offering unique benefits in terms of longevity, volume augmentation, or tissue integration compared to competitors focused solely on BDDE.

## Expanded Choice

Providing options beyond the standard BDDE fillers allows practitioners to select the ideal product based on treatment area, tissue type, and desired outcome.

## Commitment to Innovation

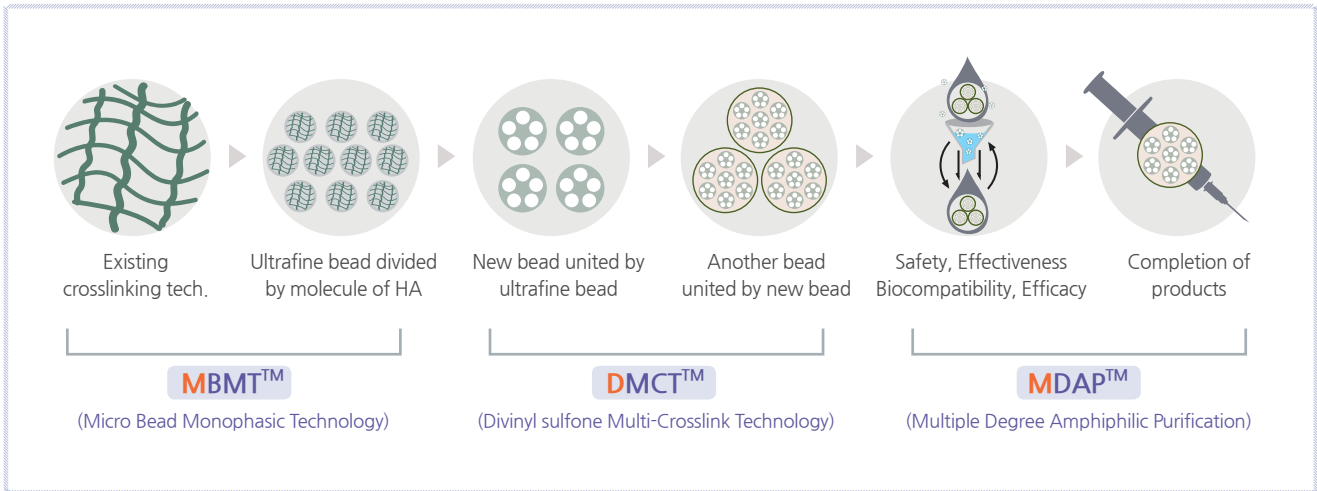

Our expertise across different cross-linking methods demonstrates a deep understanding of HA science and a commitment to offering advanced solutions such as large volume body fillers.

## Versatile Solutions

**CE certified DVS  
BDDE Cross-Linking for Personalized Aesthetic Outcomes**

# DVS Technology

## Key Features

- **Core Innovation:** Leverages hyaluronic acid and proprietary **MDM**. A technology for safe, effective tissue repair and wrinkle reduction.
- **Enhanced Durability:** Achieves longer-lasting effects through high viscoelasticity, compressive strength, and excellent shape retention.
- **Superior Performance:** Offers outstanding molding and shaping capabilities for precise application.
- **Versatile Use:** Effectively addresses wrinkles on the forehead, around the eyes, nose, cheeks, and lips.
- **Market Advantage:** Provides a tailored product lineup focused on exceptional durability, trust, and reliability, addressing key market demands for safe, long lasting solutions.

## MDM Tech.'s Physical Properties

Gel with High Viscosity

Cohesiveness

Elasticity

- **Gel with High Viscosity:** Has high cohesiveness between molecules and resists flowing.
- **Cohesiveness:** The force by which HA molecules stick and pull each other together due to intermolecular attraction and surface tension is strong.
- **Elasticity:** Excellent ability to return to its original shape and size when the force causing deformation is removed.

# DVS Filler

A scientifically advanced HA filler solution for a market focused on safety and proven durability.

## Amми Diamond & Sabrina Superb

HA 20mg/ml, Non Lidocaine

23G x 2 Needles

Deep wrinkle improvement and volumizing Nasolabial folds, cheeks, forehead, chin subcutaneous mid-deep dermis.

1ml x 1 Syringe / BOX

## Amми Crystal & Sabrina Solid

HA 20mg/ml, Non Lidocaine

23G x 2 Needles

Deep wrinkle improvement and volumizing Nasolabial folds, cheeks, forehead, chin subcutaneous mid-deep dermis.

1ml x 1 Syringe / BOX

## Amми Aqua & Sabrina Standard

HA 20mg/ml, Non Lidocaine

27G x 2 Needles

Soft tissue augmentation lips, forehead, cheeks, under eye (love band) mid dermis.

1ml x 1 Syringe / BOX

## Amми Hydro & Sabrina Smooth

HA 20mg/ml, Non Lidocaine

30G x 2 Needles

Fine line and wrinkle improvement, crow feet, lip lines mid dermis.

1ml x 1 Syringe / BOX

# DVS Filler

A scientifically advanced HA filler solution for a market focused on safety and proven durability.

## Ammi Desiree

HA 20mg/ml, Non Lidocaine

World class skin boosting filler, skin humectant elastic and energized skin, anti wrinkle, plumping.

3ml x 1 Syringe / BOX

## Ammi B filler H (Hard) & Ammi B Filler S (Soft)

HA 20mg/ml, Non Lidocaine

Premium body filler, improvement of body skin firmness and volume, breast, buttock, hip.

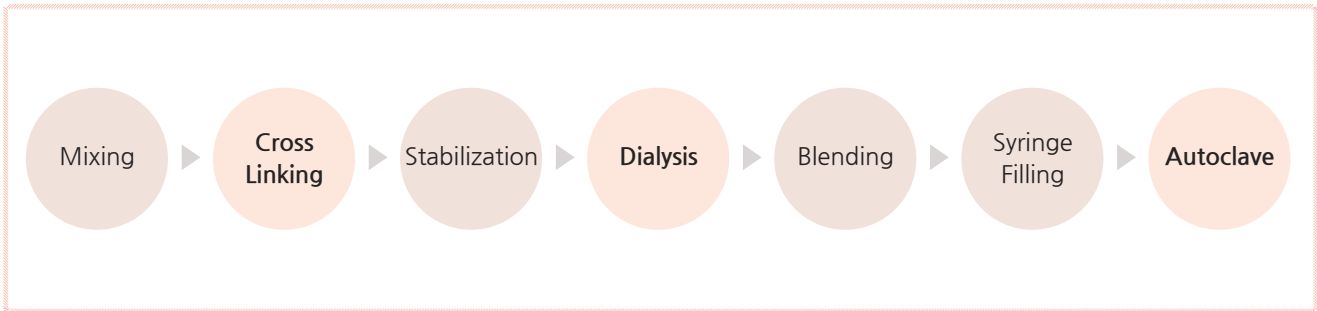

10ml x 1 Syringe / BOX

## Ammi & Sabrina Collection

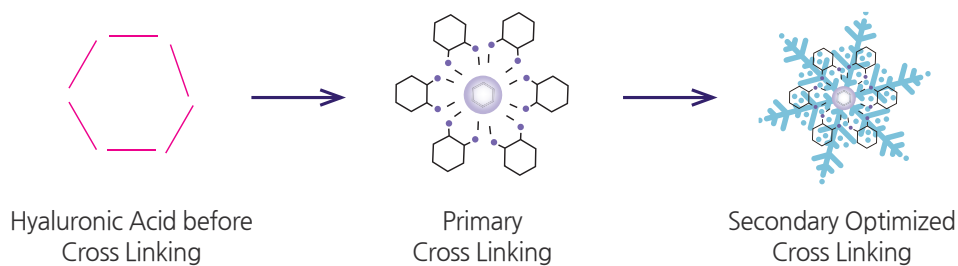

# BDDE Technology

## Key Features

- **Exclusive Technology:** The innovative method LCCP crosslinks HA and BDDE with the optimized ratios to attain the best formula and achieve a stable stereoscopic structure. These cross-links are intermolecular bonds that enhance the stability and durability of clinical implants.
- **Outstanding Results:** Effectively augment volume, reduce wrinkles, and improve skin texture, resulting in natural-looking and long-lasting outcomes.
- **Smooth Injection Experience:** Guarantees consistent and stable delivery with uniform compressive strength.
- **Long-lasting Effects:** Features high viscosity and elasticity for prolonged results and superior shaping capability.

## J1 Core Process LCCR

**Low Control Cross Linker Process:** Dilute a minimum amount of BDDE crosslinking agent during the cross-linking maturation process

Adopt spraying method, evenly and perfectly cross-link all parts of HA.

**Complete BDDE Removal through Micro-Trituration Process:** The micro trituration process shortens dialysis time by fine grinding and cutting HA crosslinks and maximize stability by minimizing and full hydration of remaining BDDE and impurity residues.

**Efficient Sterilization:** Maximize product viscoelastic preservation by minimizing and streamlining high-temperature exposure time.

# BDDE Filler

An extensive product lineup that responds to the needs of the market

## HA Fabianne 101

HA 20mg/ml, Lidocaine 3mg/ml

Cheeks, forehead, chin, under eye.

27G x 2 Needles 1ml x 1 Syringe / BOX

## HA Fabianne 102

HA 20mg/ml, Lidocaine 3mg/ml

Lips, forehead, cheeks.

27G x 2 Needles 1ml x 1 Syringe / BOX

## HA Fabianne 103

HA 20mg/ml, Lidocaine 3mg/ml

Fine lines around eyes, under eye bag, lip line.

30G x 2 Needles 1ml x 1 Syringe / BOX

## HA Fabianne 201

HA 20mg/ml, Lidocaine 3mg/ml

Cheeks, forehead, chin, under eye.

27G x 2 Needles 1ml x 2 Syringe / BOX

## HA Fabianne 202

HA 20mg/ml, Lidocaine 3mg/ml

Lips, forehead, cheeks.

27G x 2 Needles 1ml x 2 Syringe / BOX

## HA Fabianne 203

HA 20mg/ml, Lidocaine 3mg/ml

Fine lines around eyes, under eye bag, lip line.

30G x 2 Needles 1ml x 2 Syringe / BOX

## Fabianne collection

# BDDE Filler

An extensive product lineup that responds to the needs of the market

## Luminous Hard

HA 24mg/ml, Lidocaine 3mg/ml

25G x 2 Needles

Removal of deep wrinkles, improvement of facial volume, smile lines, cheeks, forehead, chin.

1ml x 1 Syringe / BOX

## Luminous Mid

HA 24 mg/ml, Lidocaine 3mg/ml

25Gx 2 Needles

Removal of deep wrinkles, improvement of facial volume, lips, forehead, cheeks, under eye.

1ml x 1 Syringe / BOX

## Luminous Soft

HA 24mg/ml, Lidocaine 3mg/ml

# PLA Technology

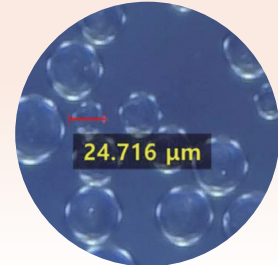

Other companies' microspheres

J1 Global Plarins microspheres

Perfect spherical particle shape  
and uniform particles  
(Particle size : Average 50µm)

Reduced Inflammation  
Increased Soft Collagen

## Tissue-Repair Biomaterial: Product Overview

Our innovative tissue-repair biomaterial uses **PLA**(Polylactic Acid) mixed with **CMC**(Carboxymethyl Cellulose) to enhance skin volume and reduce wrinkles effectively. This advanced injectable maintains the benefits of traditional HA fillers but with a longer-lasting result, providing rejuvenation for approximately 12 to 18 months.

## Key Features

### Proprietary Bead-Shaped Particles

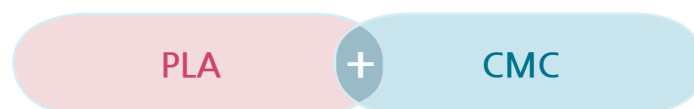

Designed for quick and easy dissolution in injection water, our biomaterial minimizes preparation time from an entire day to just 20 minutes, offering unmatched convenience for both practitioners and patients.

### Uniform Particle Manufacturing

Using advanced emulsification technology, we create consistently sized particles, reducing the risk of side effects like nodule formation post-procedure.

## PLA + CMC Volumizer & Collagen Stimulator

### PLA + CMC Volumizer & Collagen Stimulator

PLA

+

CMC

**PLA (Polylactic Acid)**

Biodegradable, safe for the body  
Gradually stimulates collagen for natural volume

**CMC (Carboxymethyl Cellulose)**

Instantly adds volume and corrects facial  
defects until PLA takes effect

# PLA Filler

A regenerative PLA option for a market moving toward long-term, biocompatible beauty.

## Plarins 200

PLA+CMC mixture 200mg

(Contains more than PLA 150mg)

Nasolabial folds, cheeks, forehead, chin, hips, buttocks, neck, décolleté, breasts, hands

200mg x Vial / BOX

- Physical volume enhancement
- Gradual and sustained improvement of wrinkles
- Promotes collagen production
