ABOUT VNSTAR

Founded in 2009, Vietnam Star (VnStar) has experienced more than a decade of remarkable growth, affirming its position as a leading manufacturer and supplier of wood and metal coatings in Vietnam. We are proud to be a strong, reputable, and sustainable brand highly recognized by customers and partners.

Our business philosophy is “Synergizing Prosperity” – a profound aspiration to contribute to society and the community by delivering superior quality products along with a friendly and professional customer experience.

VnStar’s operating principles:

- International-standard factories with modern production lines imported from Europe and comprehensive technical processes, ensuring the best input materials.
- Sustainable business policies that balance benefits for partners, distributors, and customers, creating shared prosperity for all stakeholders.
- Developing durable and aesthetic products that meet diverse preferences, provide high economic efficiency, are user-friendly, and environmentally responsible.

With core strengths in technology, raw materials, and a people-centered philosophy, VnStar is committed to serving customers and society for a prosperous, strong, and sustainable Vietnam.

We believe that a good layer of paint not only preserves value but also tells a story of sophistication and creativity because every surface deserves to be protected and shine in its own way. We devote our passion to creating paints that are not only durable over time but also carry with them a spirit of passion so that every project and every product embodies the breath of art and the imprint of skillful hands.

iNDU

METAL PAINT

DEFINING QUALITY, ENHANCING METAL VALUE

iNDU Paint was created with the mission of pioneering comprehensive protection and decorative solutions for metal products and constructions. With the aspiration to create beauty and long-lasting durability, iNDU Paint contributes to the sustainable development of the nation.

Our products are researched and developed by top regional experts, manufactured on modern European-imported lines, applying advanced technology, and using 100% imported raw materials meeting strict quality standards.

Through professional, dedicated service and a diverse high-quality product system, iNDU Paint delivers optimal solutions for every need, bringing “New Value – New Class” to metals.

WHY CHOOSE iNDU PAINT?

Superior technology:

Advanced European technology combined with innovations ensures leading performance and quality.

Premium raw materials:

100% imported from the world’s top suppliers, ensuring durability and stability.

Professional R&D team:

Continuously developing new coating solutions that meet market trends and customer needs.

Comprehensive solutions:

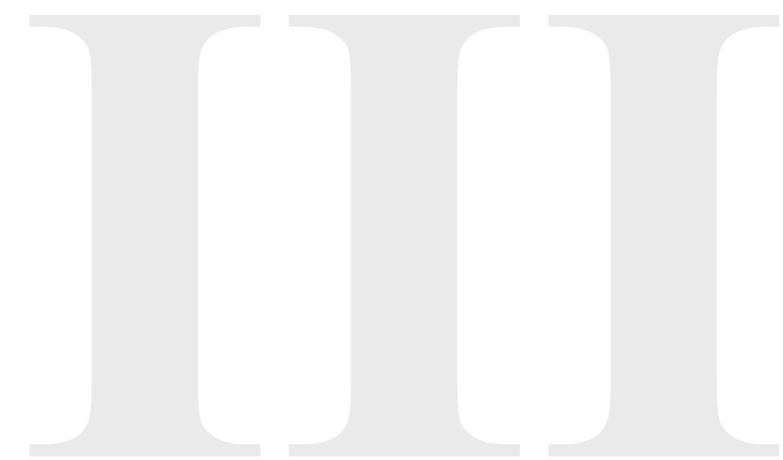

Offering a wide range of metal coatings, from anti-rust, topcoats, to specialized coatings for the most demanding projects.

Commitment to quality & service:

We strive to provide the highest quality products and excellent customer support, building sustainable partnerships.

IMPARTING SOUL

INTO METAL CONSTRUCTIONS

CORE PRODUCT LINES FOR EXPORT

- 1. iNDU ROBOT – GALVANIZED STEEL COATING**
- 2. iNDU FAST-DRYING ENAMEL PAINT**

iNDU ROBOT

GALVANIZED STEEL COATING

Anticipating the strong shift in the construction industry from black steel to galvanized steel, iNDU Paint pioneered the iNDU Robot and iNDU ECO galvanized steel coating lines. These are optimal solutions specially designed to decorate and protect galvanized metal surfaces.

iNDU Robot (Premium): A premium one-component galvanized steel paint, highly popular in the market, delivering both beauty and maximum protection for galvanized steel box materials. Produced on modern European-imported lines, using technology, and 100% imported raw materials.

KEY FEATURES:

High coverage (35% more efficient): reduces material usage and cost.

No anti-rust primer needed: saving time and cost.

No adhesion promoter needed: excellent bonding without extra preparation.

Fast drying: reduces waiting time, speeds up project completion.

Strong adhesion: prevents peeling effectively.

Easy application with simple processes suitable for both professionals and general users.

Wide color range: meets aesthetic and design requirements.

TECHNICAL SPECIFICATIONS:

- Theoretical coverage: 6 – 8m²/kg (mixture)
- Surface dry: ≤ 30 minutes.
- Fully dry: ≤ 16 hrs.
- Storage: Store in a cool, dry place away from heat and direct sunlight.

APPLICATION PROCESS:

Mixing ratio: 1kg paint + 0.7 – 0. kg thinner (stir well before mixing).

Step 1: Clean the surface, ensuring it is free of grease, dust, rust, and contaminants.

Step 2: Apply 1 – 2 primer coats by spray/brush/roller. After 4 – 6 hours, apply the topcoat.

PACKING:

800ML Tin

3L Tin

18KG Drum

APPLICATIONS:

Ideal for galvanized steel structures, factories, stainless steel, aluminum alloys, copper substrates, stainless steel, glass, corrugated iron, and other hard-to-adhere metals.

HS CODE: 32089090

ZINC-COATED STEEL PAINT

INDU ECO

INDU ECO is a premium zinc-coated steel paint, trusted by professionals for its superior protection and modern aesthetic appeal. Specially formulated for galvanized steel, it delivers maximum durability and long-lasting beauty.

Manufactured on advanced European production lines and enhanced with cutting-edge Thai technology, INDU ECO is made from 100% virgin imported raw materials to ensure exceptional quality in every drop.

KEY BENEFITS:

Ready to Use, No Primer Needed: Apply directly on the surface – saving both time and labor.

Quick Drying Formula: Accelerates construction progress with efficiency.

Superior Adhesion & Protection: Provides a tough, glossy, and long-lasting shield for metal surfaces.

Outstanding Durability: Keeps its beauty and strength intact even under harsh weather conditions.

Cost-Effective Solution: Eliminates the need for anti-rust primers, reducing overall project costs.

PACKING:

800ML Tin

2.5L Tin

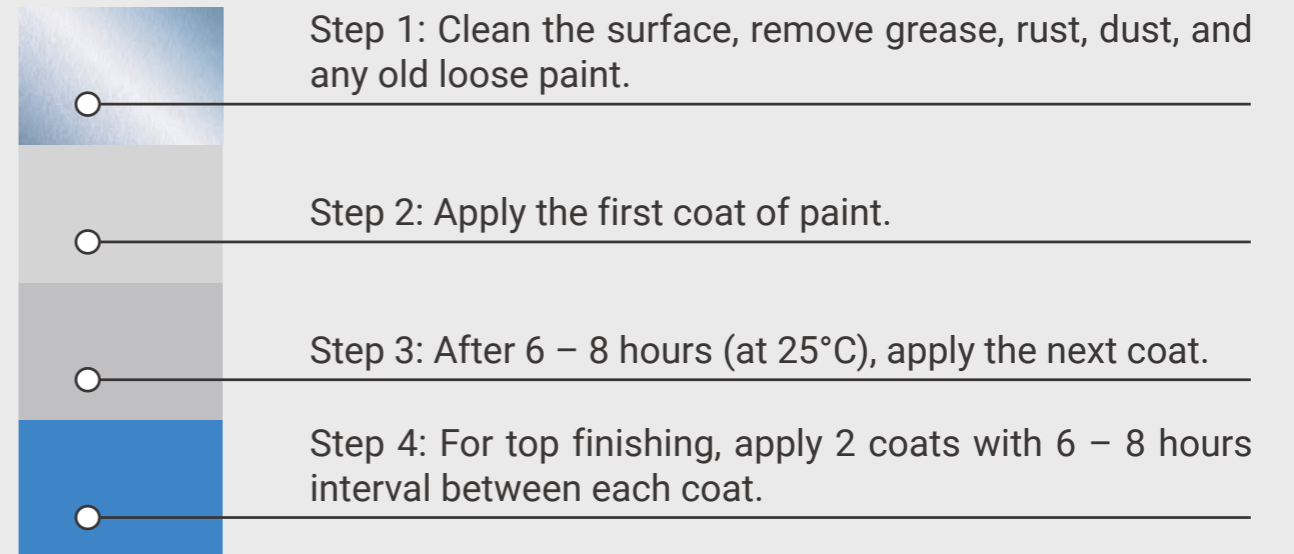

18KG Drum

TECHNICAL SPECIFICATIONS:

- Theoretical coverage: 5 – 6 m²/kg of mixed paint.
- Surface drying time: 15 – 30 minutes.
- Complete drying time: 16 – 18 hours.
- Storage: Keep in a cool, dry, well-ventilated place, away from direct sunlight and heat sources.

APPLICATION GUIDELINES:

Mixing ratio: depends on application to use thinner or not.

RECOMMENDED USES:

Ideal for construction projects, factories, workshops, and both indoor and outdoor applications on galvanized steel, stainless steel, and other metal surfaces.

HS CODE: 32089090

iNDU FAST-DRYING ENAMEL PAINT

iNDU Fast-Drying Enamel is a new-generation paint designed with ultra-fast drying characteristics. It overcomes the long drying drawback of traditional enamel systems, significantly improving economic efficiency for projects. Manufactured on modern European-imported lines with advanced technology, iNDU Fast-Drying Enamel was developed with a dual mission: to provide optimal protection for projects and ensure user health safety. Available in two systems: Anti-rust primer and Topcoat – widely applicable across industries.

OUTSTANDING FEATURES:

Excellent adhesion: Ensures long-lasting durability and aesthetics.

High coverage: Saves materials and reduces costs.

Ultra-fast drying:

- Surface dry in 15 – 30 minutes.
- Recoating interval shortened to 1 – 2 hours, faster project completion.

Color durability: Maintains beauty and maximizes investment value.

PACKING:

2.5L Tin

800ML Tin

3L Tin

18KG Drum

TECHNICAL SPECIFICATIONS:

- Theoretical coverage: 5 – 6m²/kg.
- Storage: Store in a cool, dry place, away from direct sunlight and heat sources.

APPLICATION PROCESS:

Mixing ratio: 1kg paint + 0.3kg thinner (stir well before mixing).

- Step 1: Prepare the surface, ensuring it is clean, dry, and free from grease, dust, rust, or old peeling coatings.
- Step 2: Apply 1 – 2 coats of anti-rust primer.
- Step 3: Apply 2 topcoat layers, 6 – 8 hours apart. Fully cured in 72 hours.

APPLICATIONS:

Suitable for both metal and wood. Ideal for steel structures, bridges, stations, airports, indoor/outdoor furniture, civil works, factories, machinery, equipment, and various industrial applications.

HS CODE: 32089090

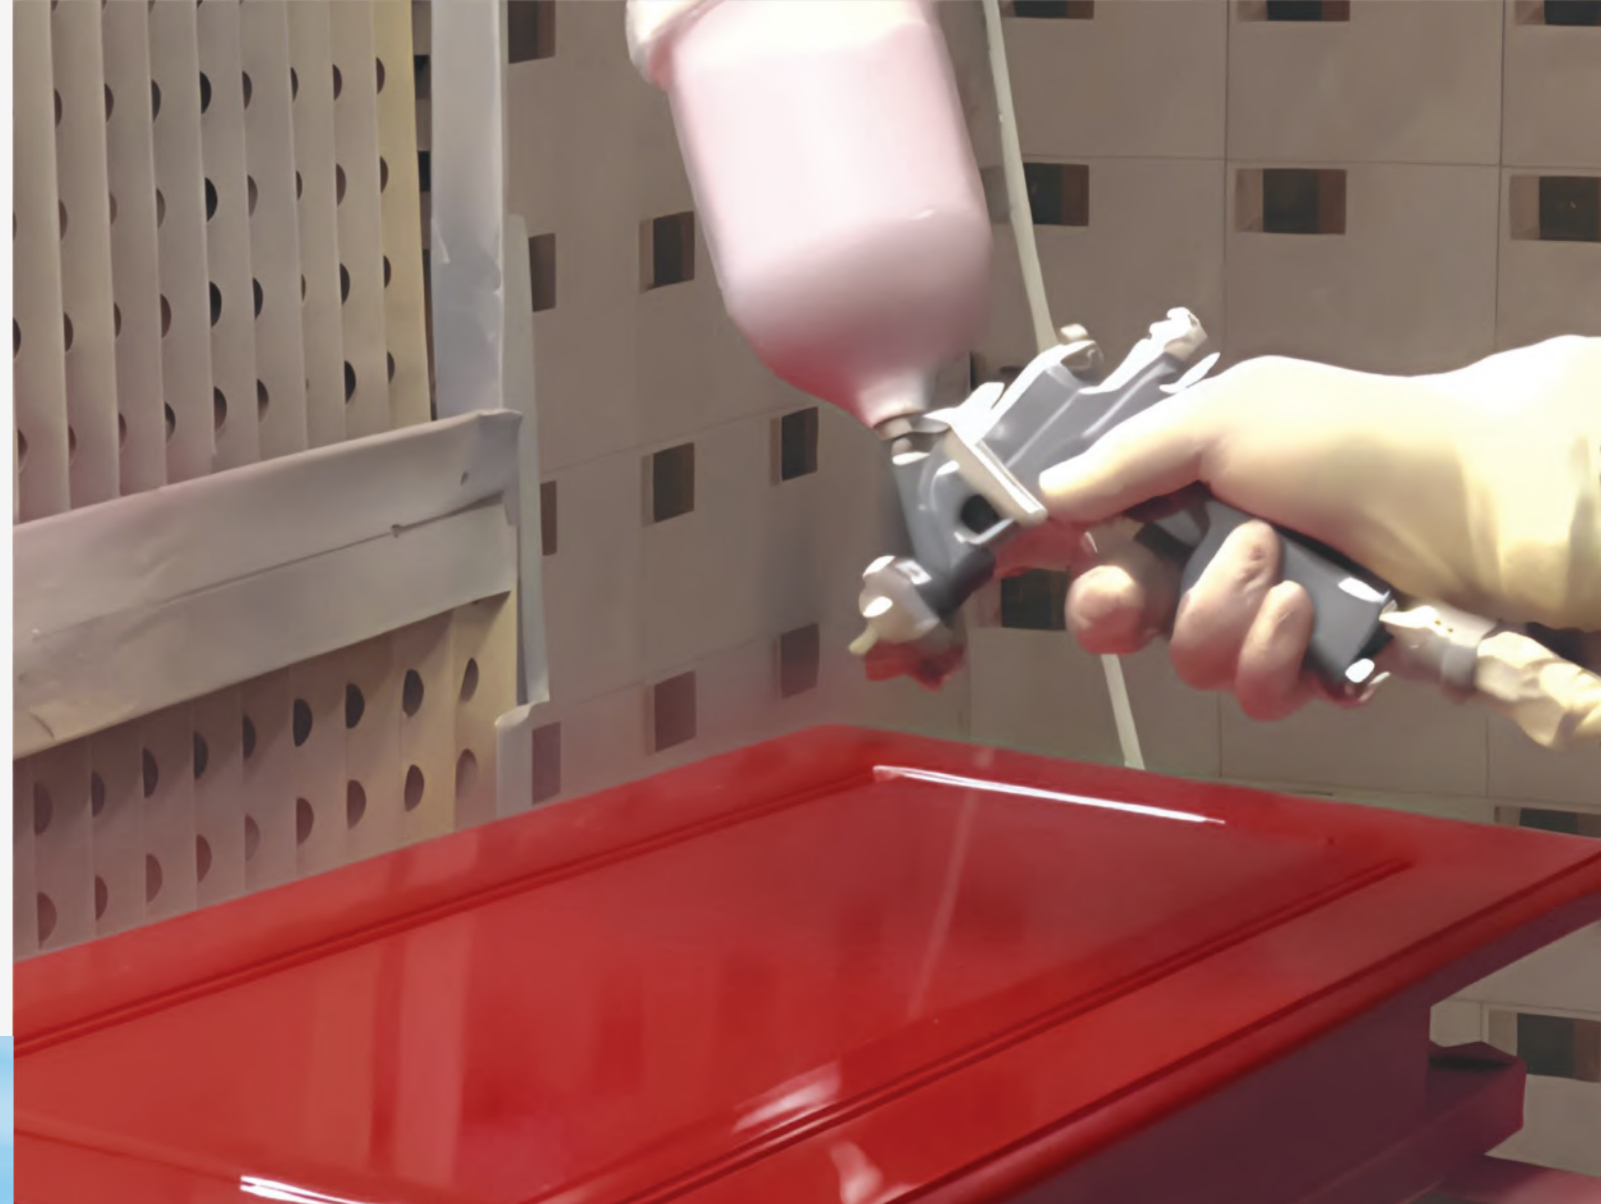

OTHER iNDU PRODUCTS

INDU

INDU ROBOT PREMIUM ENAMEL

Market-leading enamel with superior UV resistance, maintaining gloss and color stability. Excellent adhesion, coverage, high yield, with strong anti-mold performance and faster drying than conventional enamels.

iNDU 2TP MULTIPURPOSE COATING

A two-component system (paint + hardener) using advanced Technology. Can be applied on almost all materials (plastic, aluminum, glass, wood, steel, stainless steel, galvanized steel). No primer required, eco-friendly, and an effective alternative to electrostatic coatings.

INDU 2TP EPOXY

Two-component epoxy paint with high hardener content, forming an extremely hard, armor-like coating resistant to strong impacts and chemical corrosion.

INDU INDUSTRIAL PAINT

Industrial-grade paint using Technology, fast-drying, high gloss, strong adhesion, diverse colors, providing both decorative and protective functions against oxidation and harsh environments.

iNDU SPRAY PAINT

The only spray paint on the market applicable on all surfaces and materials. Compact handheld design, easy to use, with excellent decorative and protective effects.

iNDU ROBOT 911 FIRE-RESISTANT PAINT

Acrylic Fireproof & Thermal Insulation Paint is a premium one-component coating, manufactured on a modern European production line with advanced technology. It provides superior fire resistance, extended fire endurance, and rapid drying. Easy to apply, the coating delivers a smooth, high-quality finish. The product is classified by fire protection rating into 45 and 90 minutes, meeting diverse safety requirements for construction and industrial applications.
