GEMINUS GROUP HISTORY

Geminus Group is one of the largest business networks. As a global procurement and sales operator, national and international, with 25 years of history and experience.

It is present in all sectors of the economy with great growth in the last decade, with over 148 employees spread across 28 countries.

Since its founding, Geminus Group has contributed to the economic, social and environmental improvement of society through the creation of opportunities, stable and quality employment, optimization of resources and responsible management of its activities.

As part of its CSR strategy, Geminus Group responds to the needs of various interest groups by managing its services on the basis of competitiveness, quality and safety; to create value and respect for the cultural and environmental environment in which the company is present. In this way, the Company wants to be an important player and driver of change towards a fairer and more advanced society.

WE ARE IN 28 COUNTRIES

GEMINUS GROUP was founded with a social character and specializes in the import and export of wholesale products, which are managed centrally from our offices in Spain. Reliability is fundamental in all our sectors as it is a high risk market due to misuse of documents by some companies and people outside the GEMINUS GROUP.

On the part of the group's management and taking into account known risks, we rely on human values, which are one of the priorities of the Geminus group.

Around the world, We invest in infrastructure, warehousing, transportation and logistics to deliver physical products to specifications, where and when they are needed.

We gain first-hand experience of developing economic fundamentals and, as a global trading house, have a detailed overview of macro and micro trends.

GEMINUS GROUP, through its "Social Action", promotes a call for cooperation with social projects focused on childhood, women, culture, education and pathological behavior related to those that contribute to improving the situation of vulnerability of these groups, as well as the development and progress of society through technological projects and innovations, with a willingness to trade throughout the world through investments in raw materials using its own funds.

UREA 46

At **GEMINUS GROUP**
THERE IS UREA 46 (UREA),
ORIGIN: **KAZAKHSTAN**

FICHA TÉCNICA	
ÚREA	
1. IDENTIFICACIÓN DEL PRODUCTO	
Nombre Químico	Úrea
Fórmula Química	CO (NH ₂) ₂
Peso Molecular	60 g/mol
Sinónimos	Carbámid, carbonilamida o ácido carbámidico
<p>Úrea, también conocida como carbámid, es el nombre del ácido carbónico de la diamida cuya fórmula química es (NH₂)₂CO. Es una sustancia nitrogenada producida por algunos seres vivos como medio de eliminación del amoníaco, el cual es altamente tóxico para ellos. En los animales se halla en la sangre, orina, bilis y sudor. La urea se presenta como un sólido cristalino y blanco de forma esférica o granular. Es una sustancia higroscópica, es decir, que tiene la capacidad de absorber agua de la atmósfera y presenta un ligero olor a amoníaco. Comercialmente la urea se presenta en pellets, granulos, o bien disuelta, dependiendo de la aplicación.</p>	
2. ESPECIFICACIONES DEL PRODUCTO	
Nitrogeno total (b.s)	Min. 44 %
Nitrogeno Orgánico (b.s)	Min. 44 %
Humedad	Max. 2 %
Aspecto	Estandar
3. PROPIEDADES	
Apariencia	Polvo o cristales
Color	Blanco
Olor	casi inodoro
Sabor	Salino
Peso Especifico	1.335
Densidad	768 Kg/m ³
Punto de Fusión	132.7 °C
Acidez equivalente a	84 partes de carbonato por 100 de urea
