

Caustic Soda Flakes 98%

Caustic Soda Flakes (Sodium Hydroxide, NaOH) is a highly alkaline inorganic chemical widely used as a key raw material in various industries including chemicals, detergents, textiles, pulp and paper, water treatment, petroleum refining, and metallurgy. Due to its strong alkalinity, high purity, and fast solubility, it plays a critical role in numerous industrial processes. Our Caustic Soda Flakes 98% is manufactured under strict quality control to ensure consistent purity, low impurity levels, and reliable performance, in full compliance with international quality standards.

CHEMINERAL

CAUSTIC SODA FLAKE 98%

Applications

- **Chemical Industry**
- **Production of various sodium-based chemicals and intermediates.**
- **Detergents and Soaps** Used in manufacturing soaps, detergents, and cleaning products.
- **Pulp and Paper Industry** Essential chemical for pulping and bleaching processes.
- **Textile Industry**
- **Used in fiber processing and dyeing.**
- **Water Treatment**
- **pH adjustment and wastewater neutralization.**
- **Petroleum and Refining**
- **Used in purification and neutralization processes.**

Typical Specification

Parameter	Value
Sodium Hydroxide (NaOH)	Minimum 98.0 %
Sodium Carbonate (Na ₂ CO ₃)	Maximum 0.5 %
Sodium Chloride (NaCl)	Maximum 0.05 %
Iron (Fe)	Maximum 30 ppm
Appearance	White flakes, free-flowing
Certificate of Analysis (COA)	available upon request

Product Advantages

- **High and consistent purity (98%)**
- **Fast and complete solubility**
- **Low impurity and iron content**
- **Stable quality and performance**
- **Flexible packaging: 25 kg bags, jumbo bags**
- **Competitive pricing for domestic and export markets**

If you are looking for high-quality Caustic Soda Flakes 98% with reliable supply and competitive pricing, we are ready to establish long-term cooperation and support your business.
