Leading Aluminum Manufacturer & Exporter

Xuntai New Materials

Leading aluminum manufacturer & exporter

Quick response in 60 seconds

At Xuntai Aluminum, customer satisfaction is our top priority. We provide a professional and efficient after-sales service system to ensure seamless communication and reliable support. With our "Quick Response Within 60 Seconds" commitment, our service team reacts instantly to your inquiries — offering technical assistance, order updates, and problem-solving guidance without delay. Every response reflects our dedication to quality, responsibility, and long-term partnership with our global clients.

24-hour online service

At Xuntai Aluminum, we believe that excellent products deserve equally exceptional service. Our 24-hour online support system ensures that every customer receives timely and professional assistance anytime, anywhere. A dedicated service team is always on standby to provide technical consultation, order updates, and after-sales guidance with efficiency and care. Through continuous communication and rapid response, we aim to build lasting trust and satisfaction with our global partners.

365-Day Tracking Support

At Xuntai Aluminum, our commitment extends beyond delivery. With our 365-day tracking service, every order receives ongoing attention and professional care. From production updates to logistics tracking and feedback collection, we ensure reliability and satisfaction all year round — building lasting trust with partners worldwide.

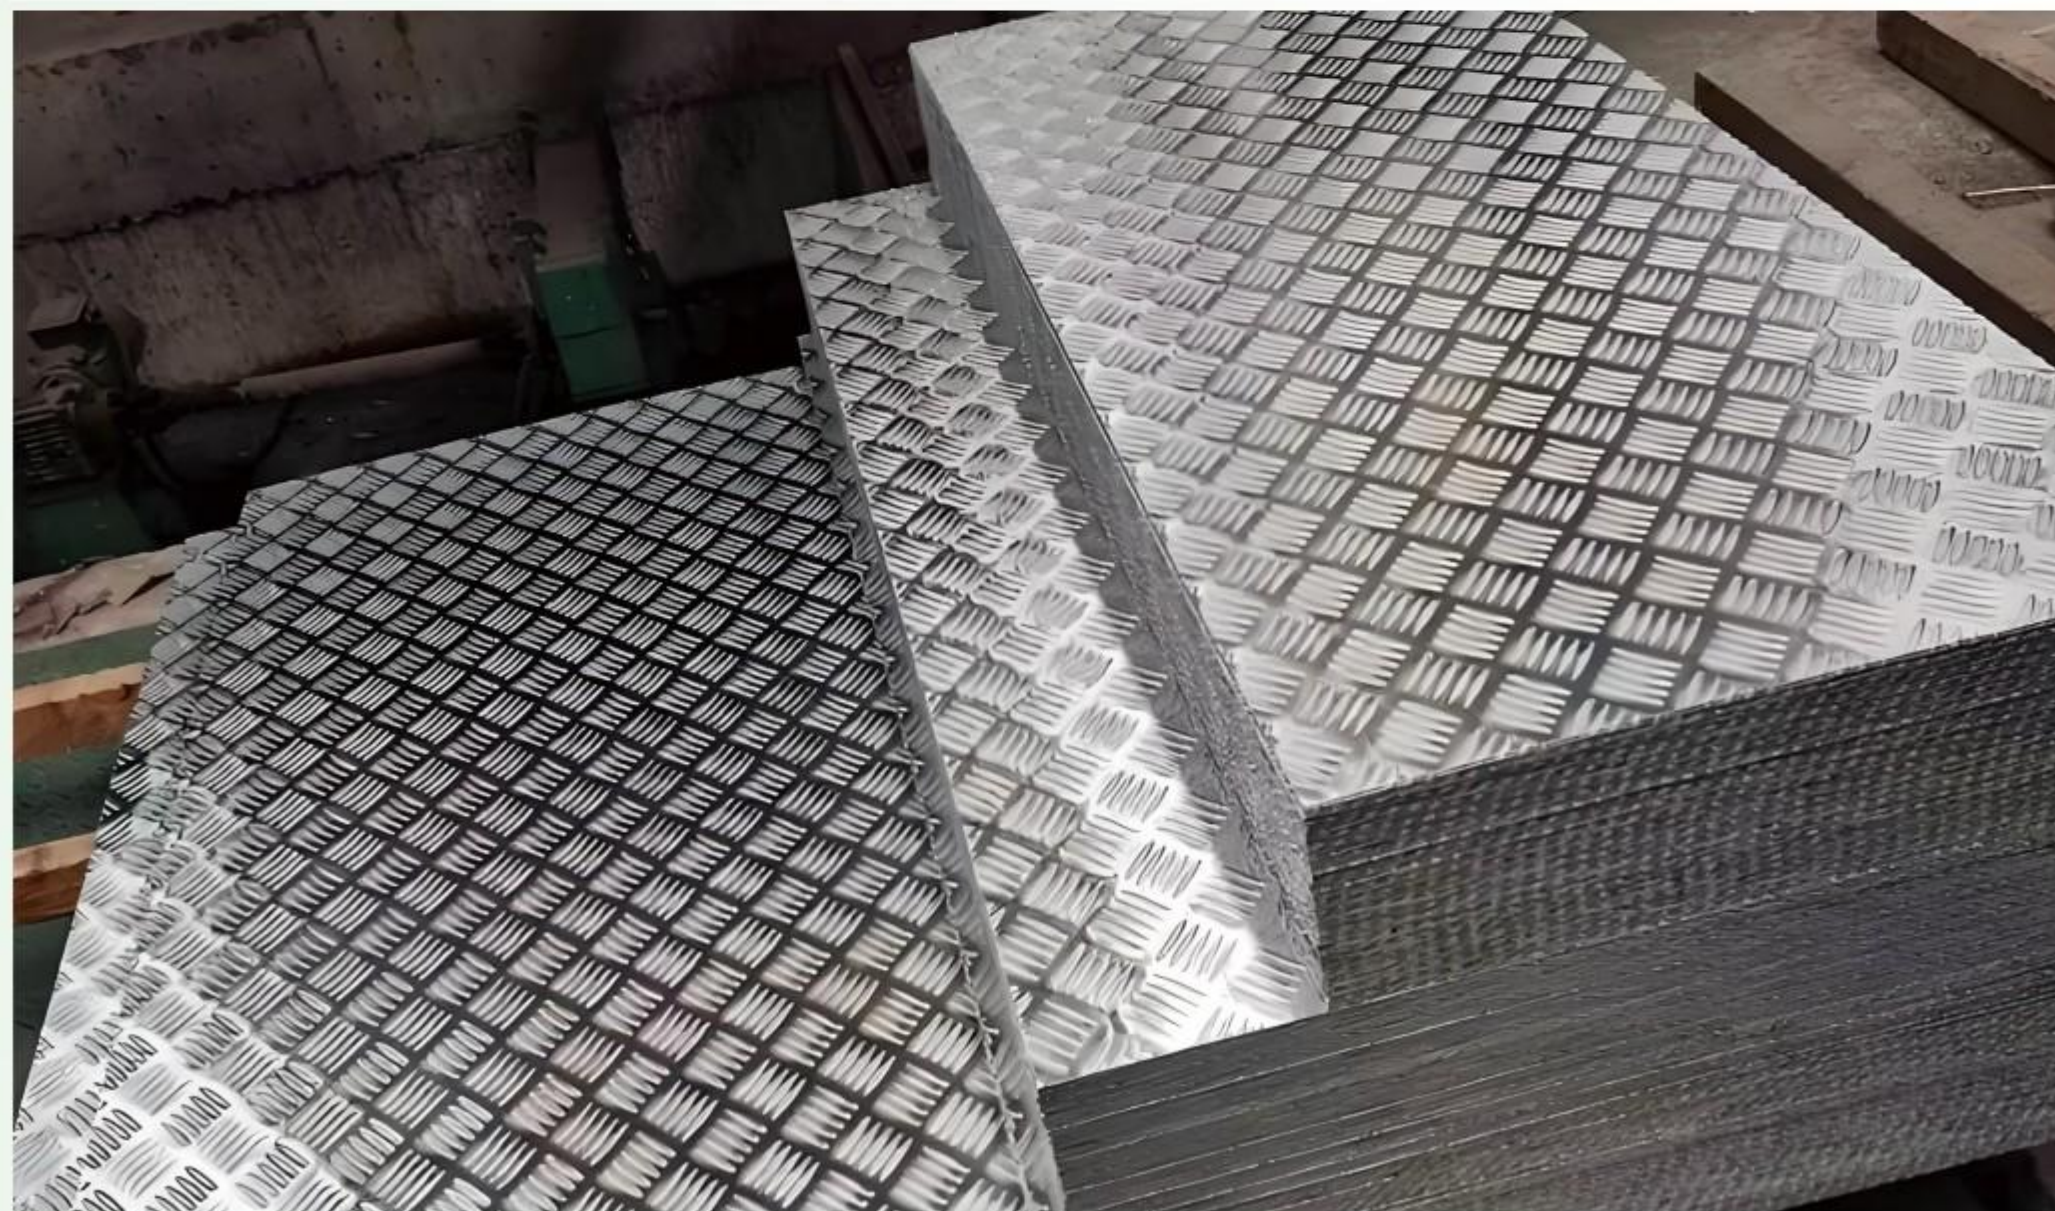

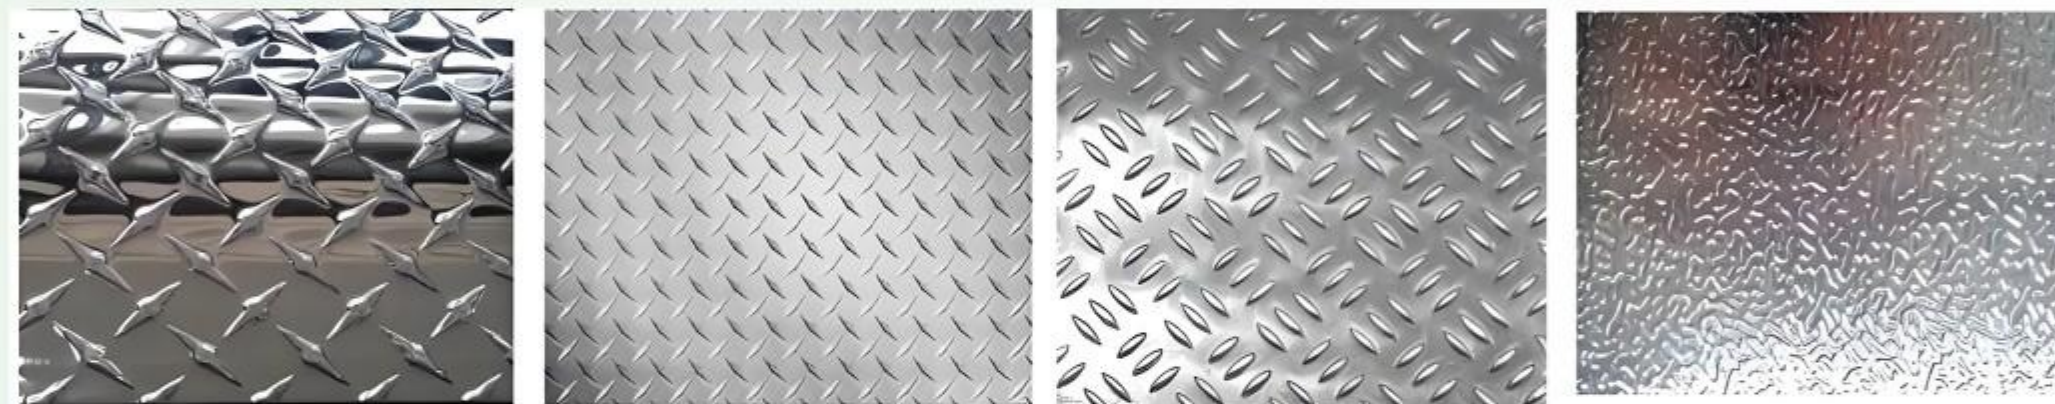

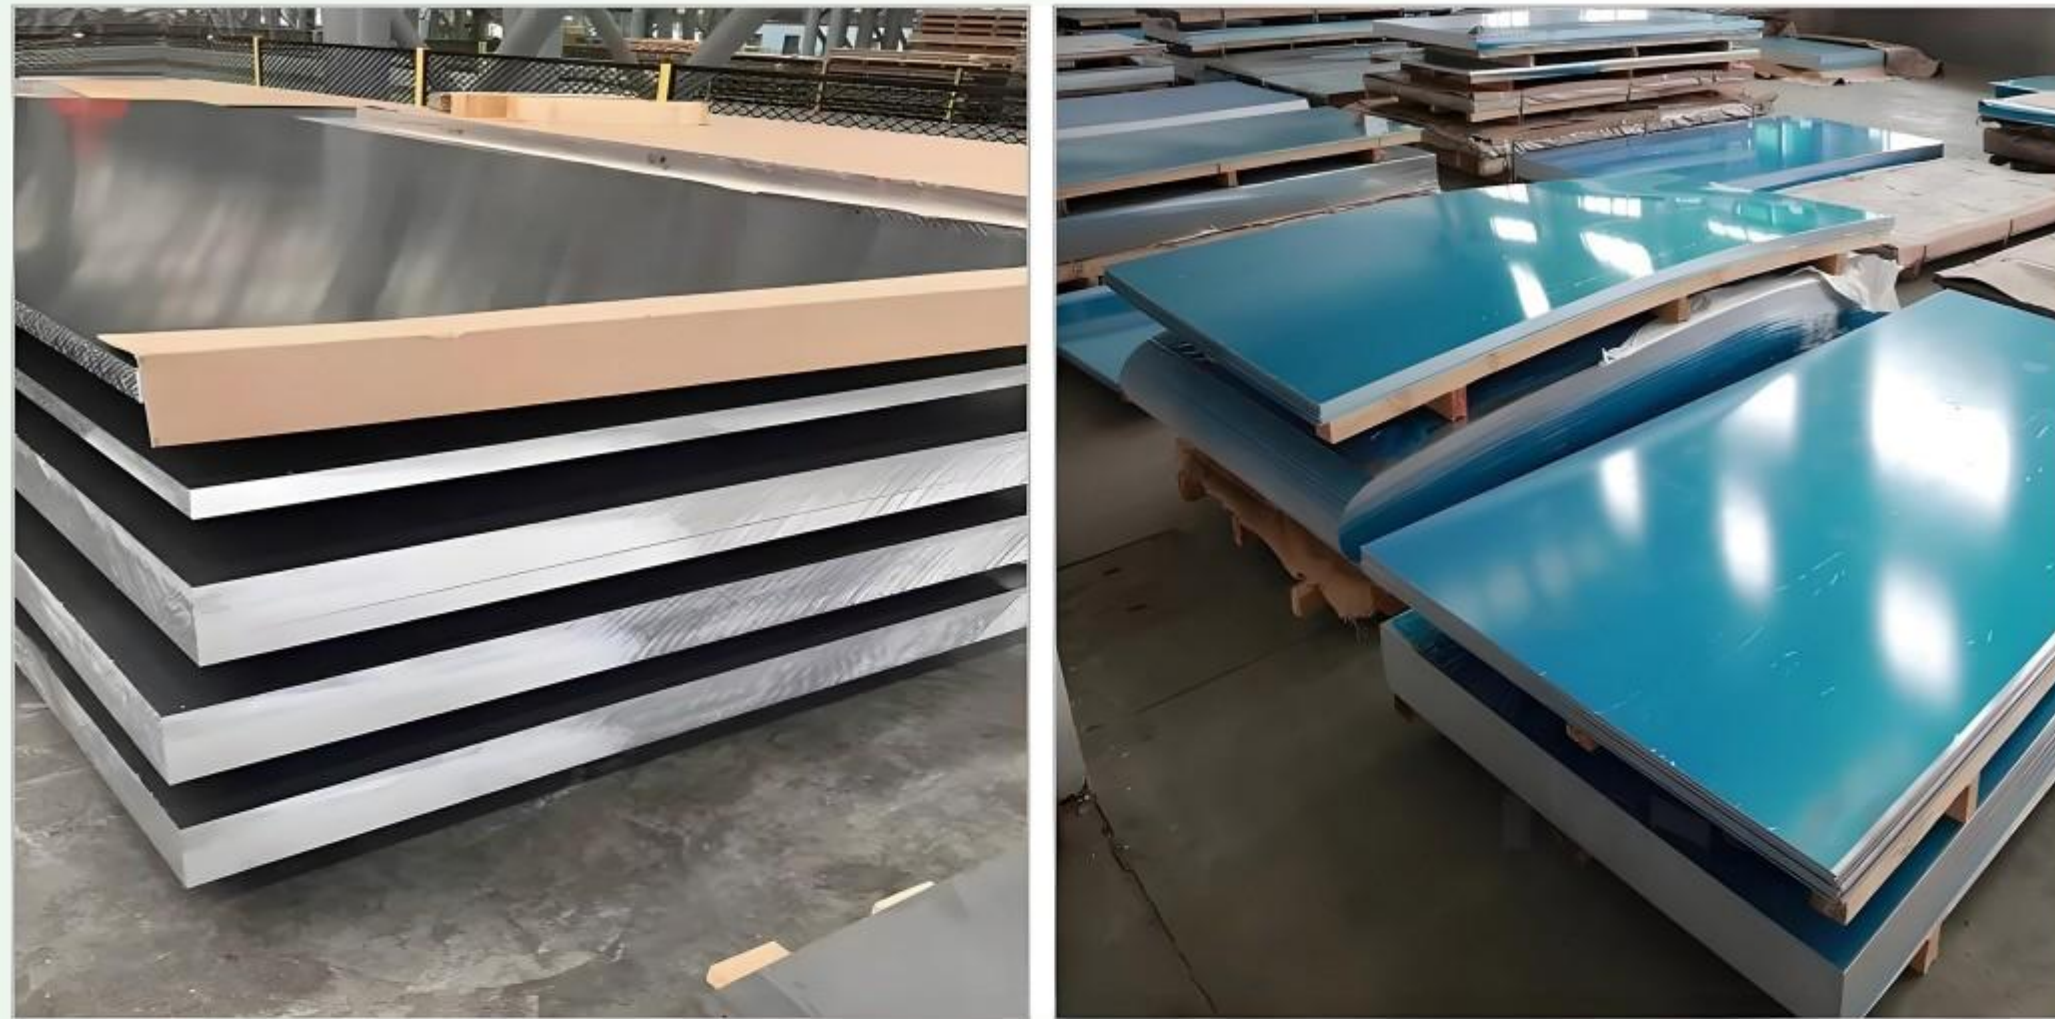

Company Profile

Henan Xuntai New Materials Co., Ltd. is a private aluminum processing enterprise that integrates the technology leasing, intelligent integration and comprehensive service. The production line is based in Luoyang city, Henan Province. with export dept. in Zhengzhou City. Established in 2020, the workshop covers an area of 35,000 square meters, with more than 150 employees. The Equipped with advanced aluminium product processing machinery, 6 casting and rolling production lines and 1 cold rolling production line, with an annual production capacity can reach 100,000 tons.

The company' product is mainly include 1-series, 3-series, 4-series, 5-series, 6-series, 7-series and 8-series aluminium alloy and other multi-variety and multi-specification products. The products are widely used in packaging, electronic power, construction, printing, transportation, oil reserves, aerospace and light industry industries. The company takes innovation as the development guide and continuously optimism the product structure. Up to now, the product are to Pearl River Delta and Yangtze River Delta Economic Belt, and are exported to over 50+ countries and regions.

High-Quality Material

Aluminum Circles, also known as aluminum discs or blanks, are made from premium rolled aluminum coils through precision cutting and surface treatment. They combine light weight, high strength, and smooth finish, making them ideal for cookware, automotive parts, lighting, and industrial applications.

Excellent Formability

With superior ductility and consistency, Aluminum Circles can be deep-drawn, spun, bent, or stamped without cracking. Their high elongation and precise thickness ensure efficient processing, while the clean, reflective surface can be anodized, polished, or coated for both protection and elegant appearance.

Durable and Corrosion-Resistant

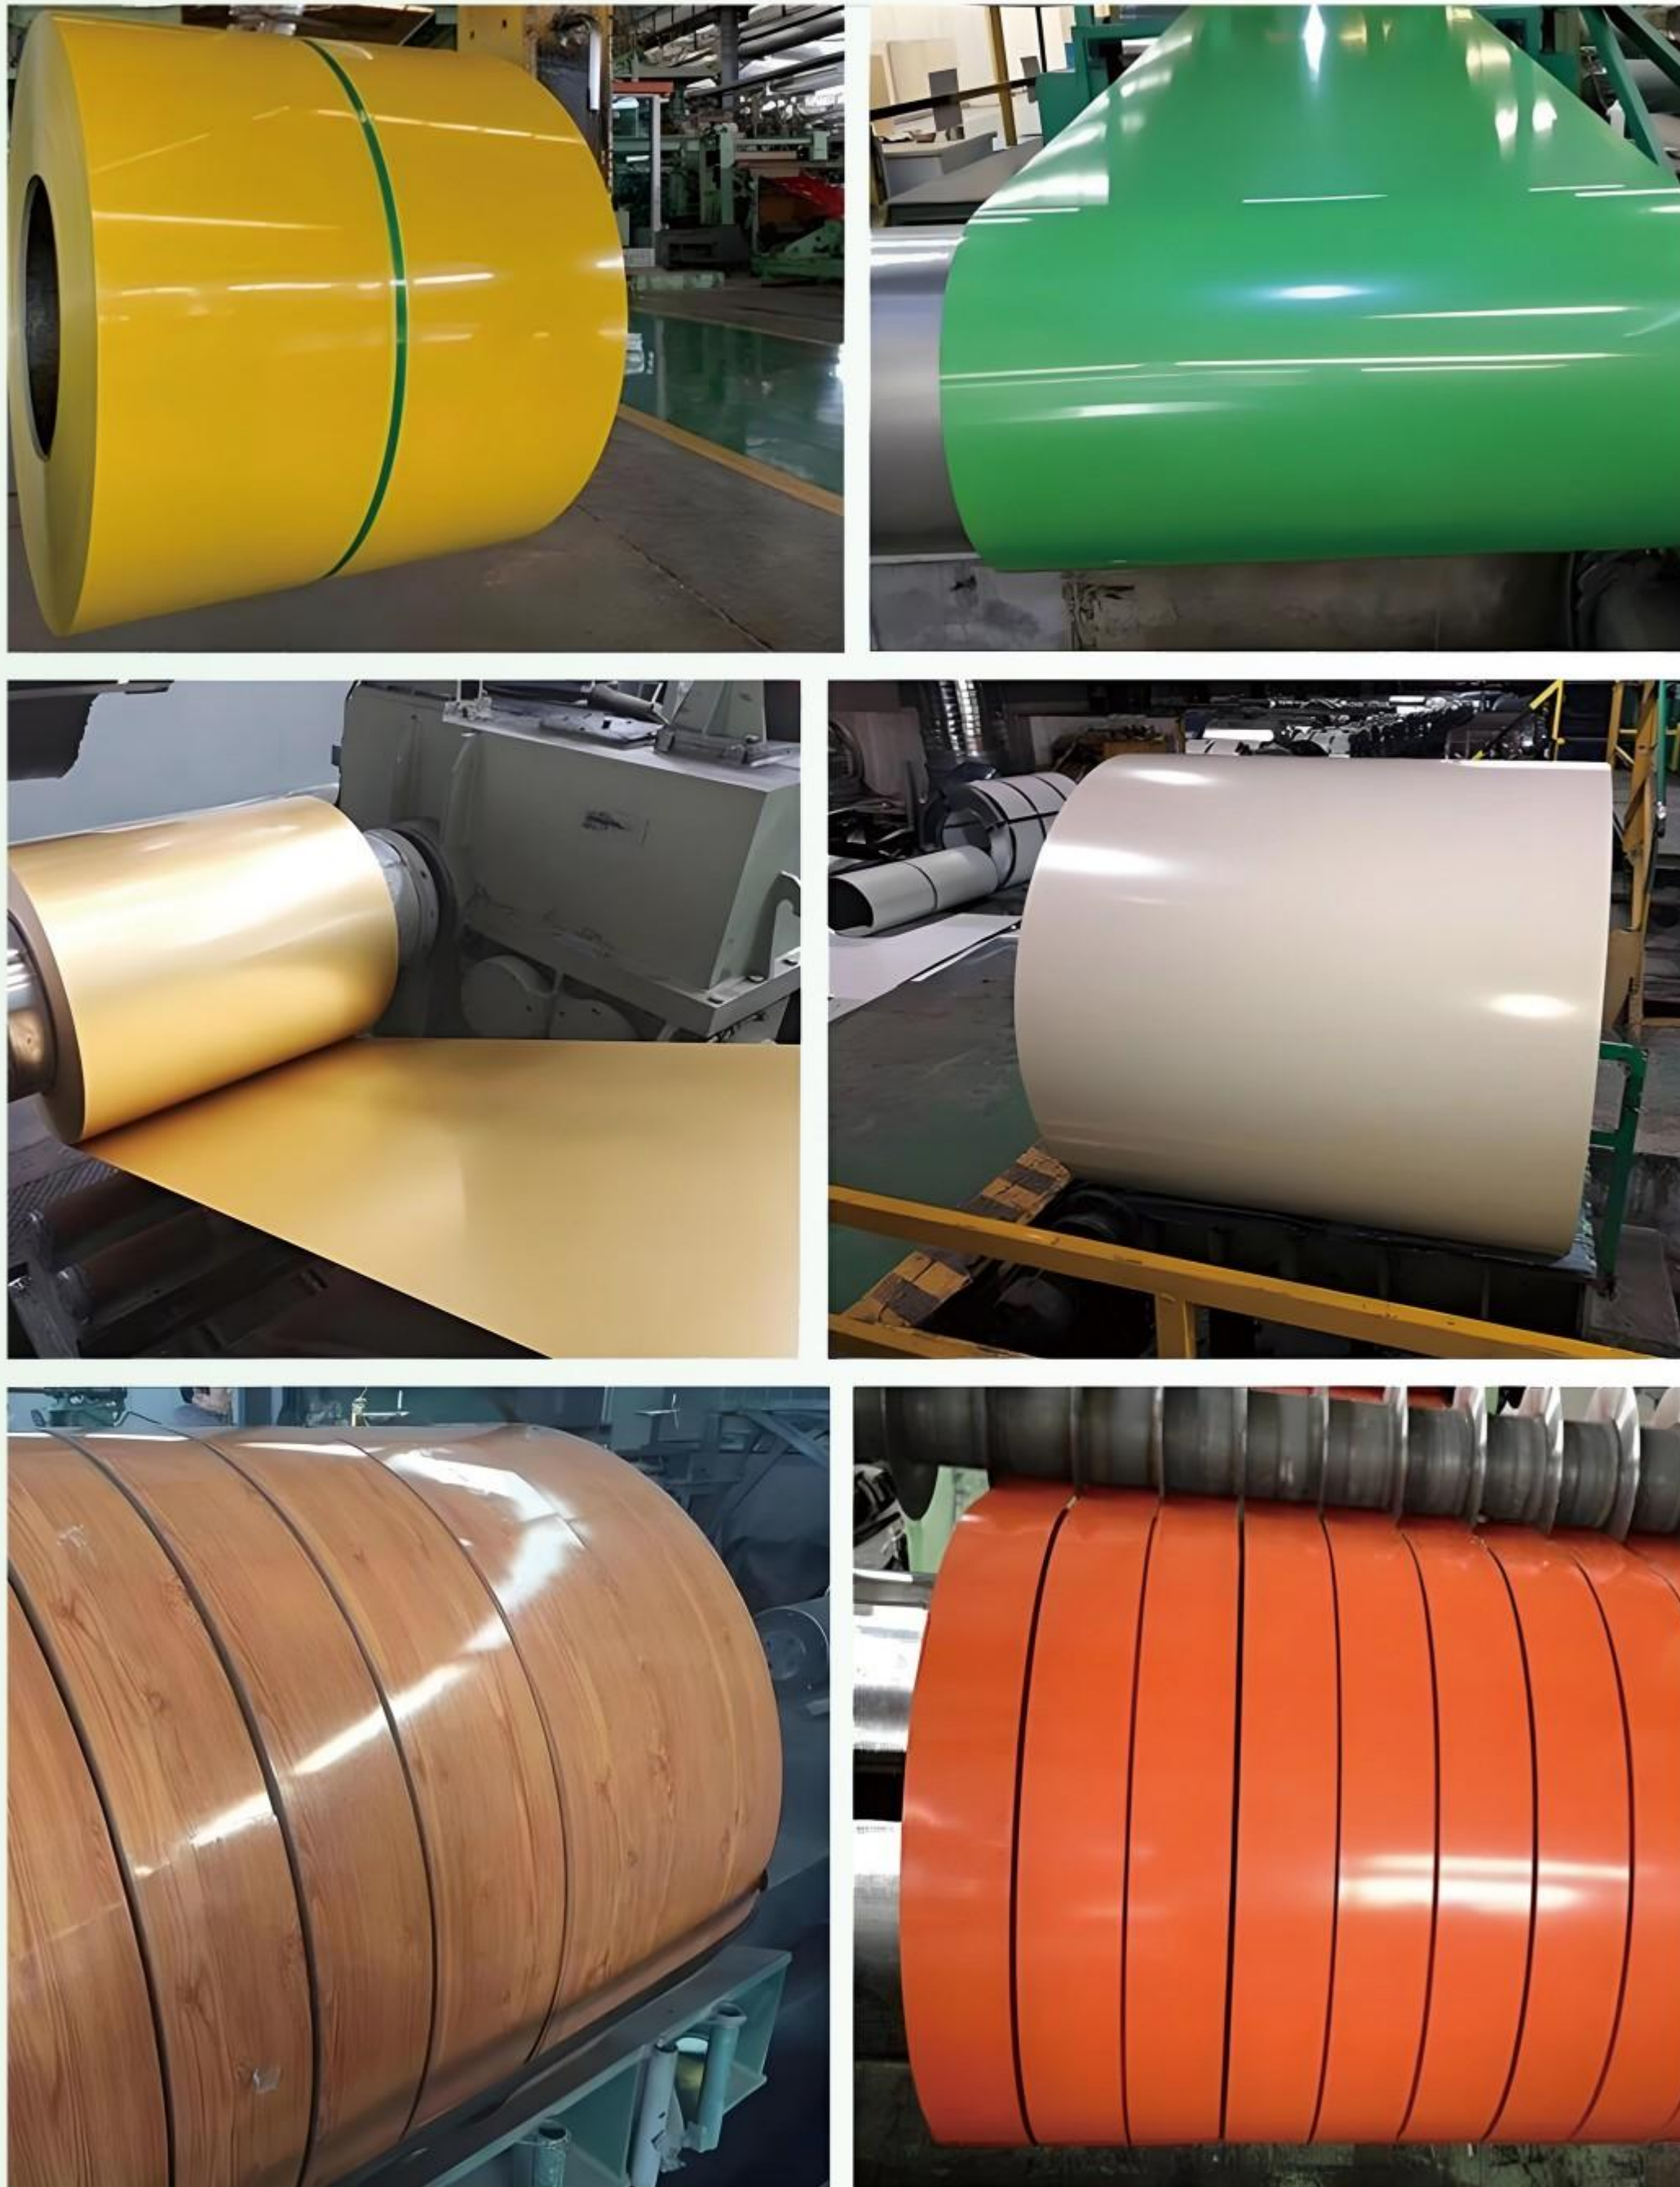

A natural oxide layer provides long-lasting protection against corrosion and oxidation. Aluminum Circles perform reliably in humid, marine, and high-temperature environments, ensuring stability and longevity.

Eco-Friendly and Versatile

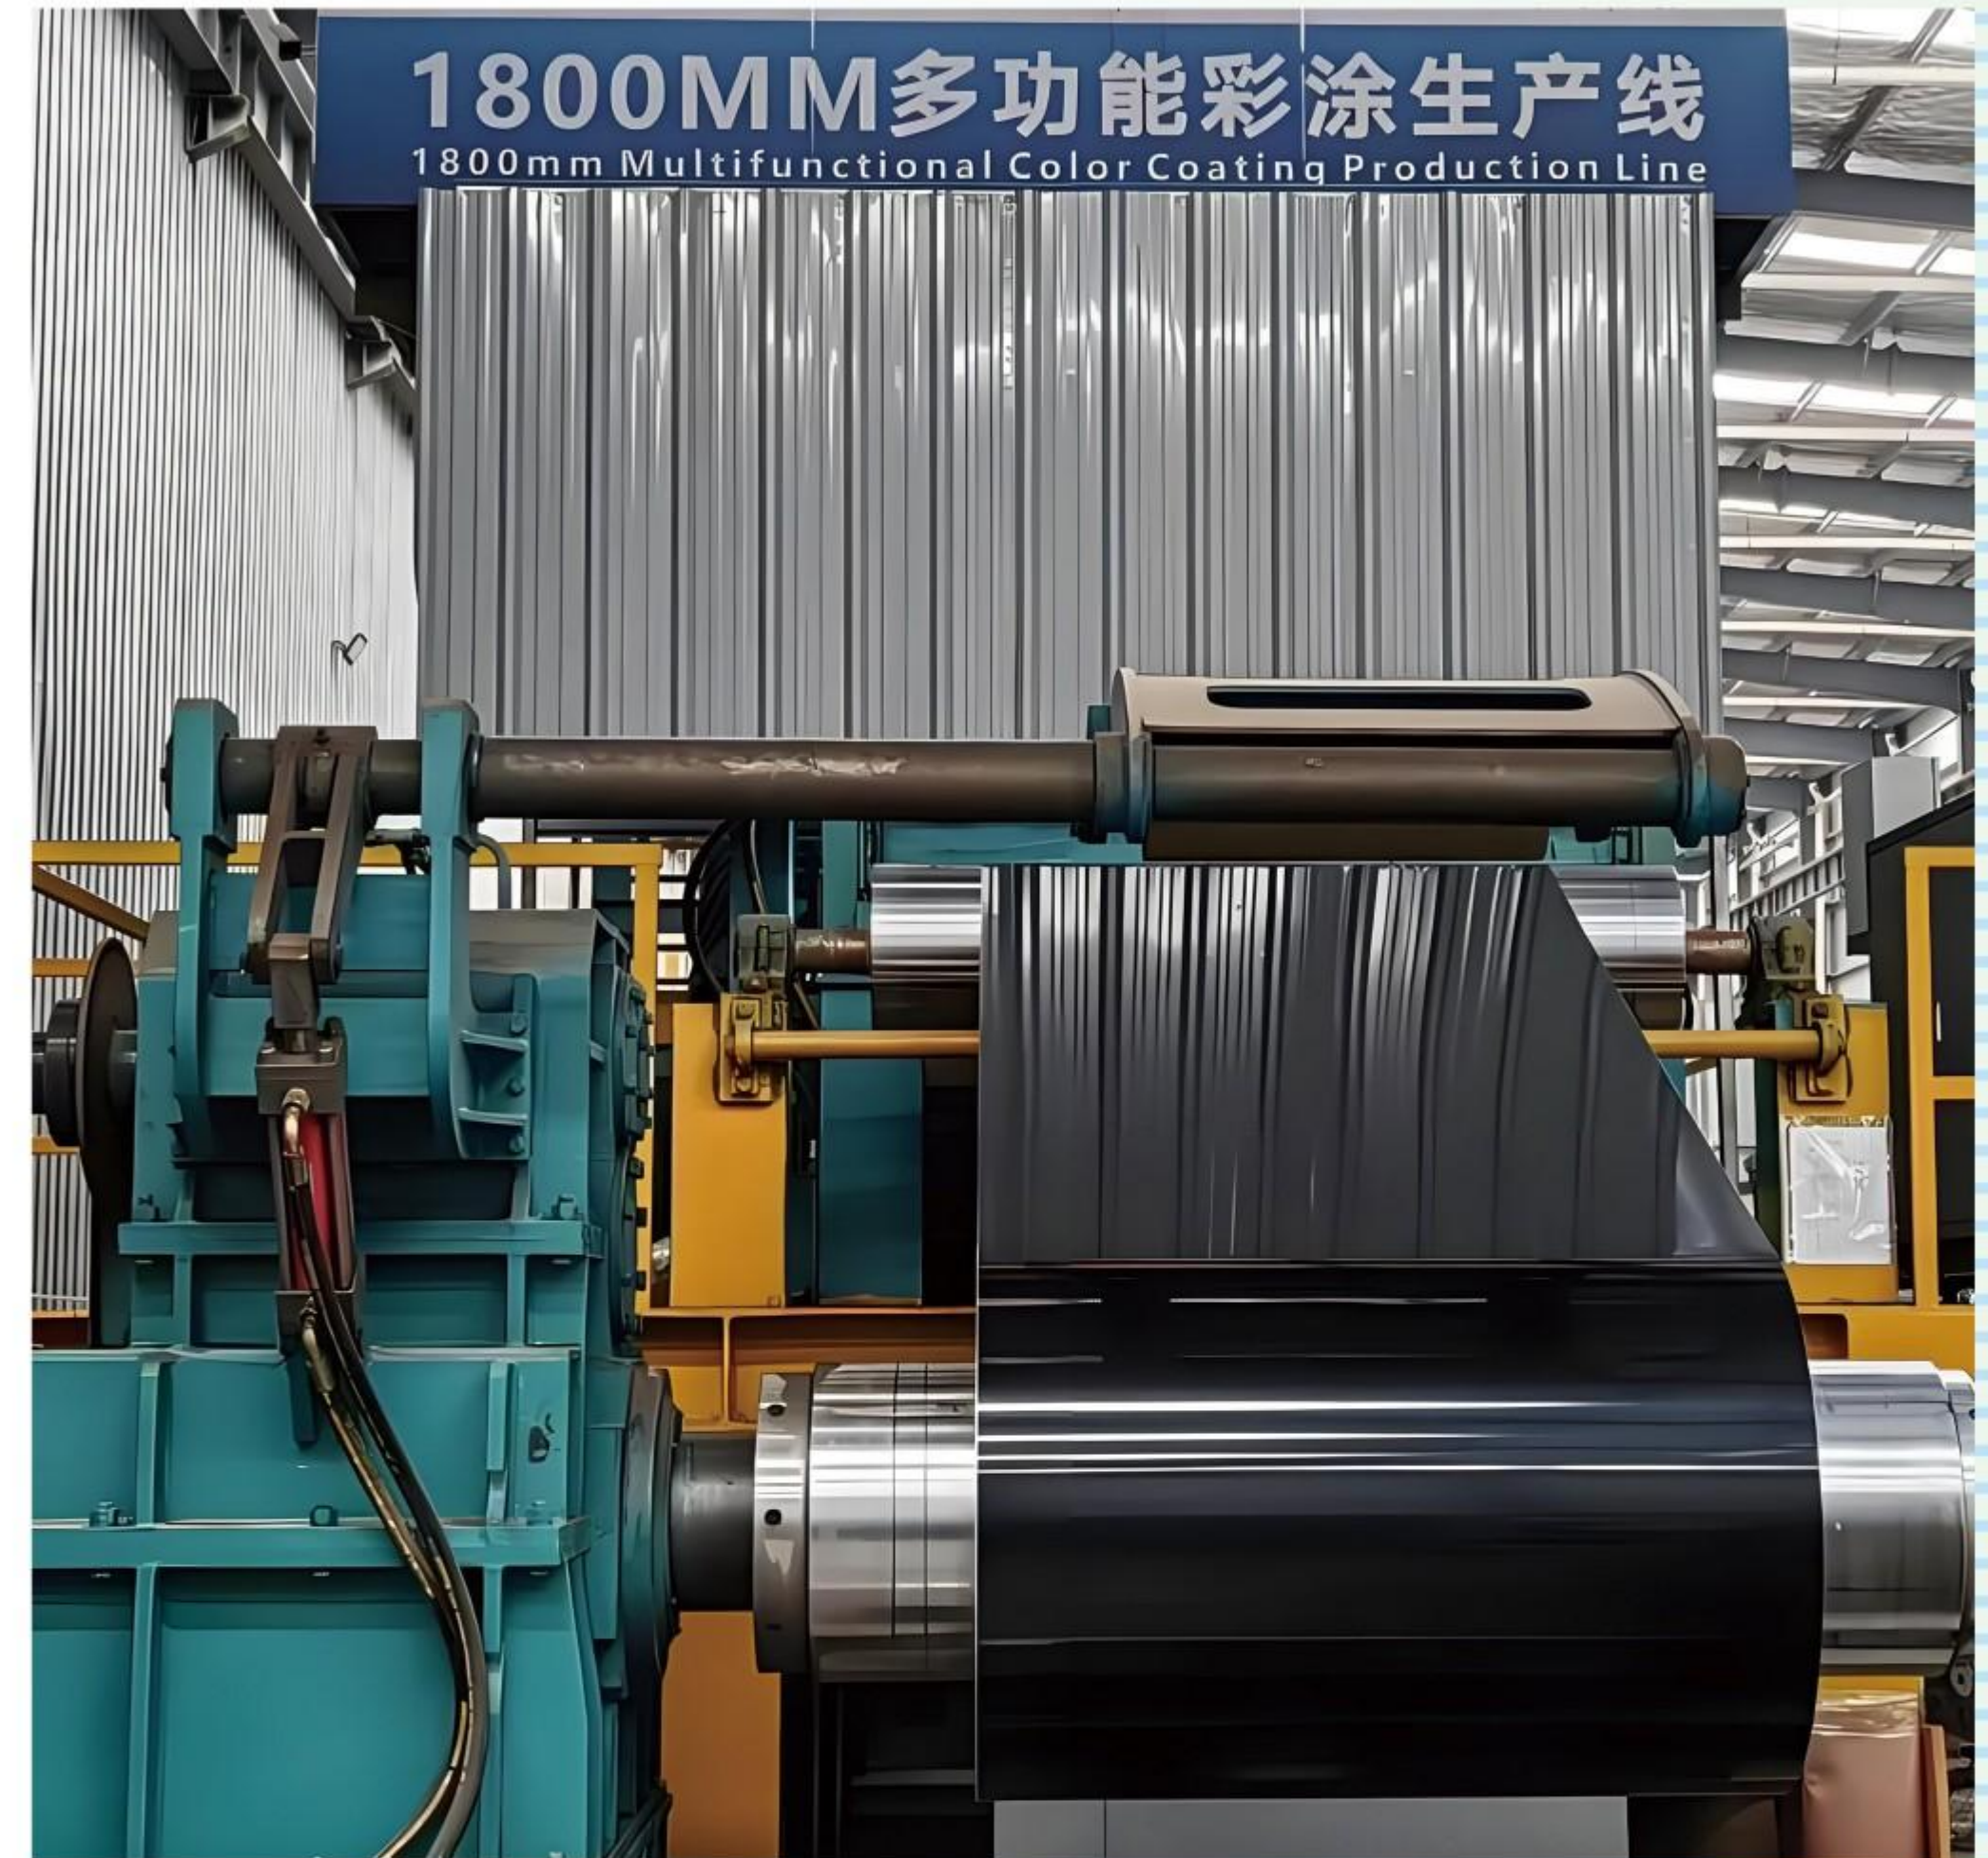

Fully recyclable and energy-efficient, Aluminum Circles support sustainable manufacturing. With excellent thermal and electrical conductivity, they are widely used in cookware, automotive components, packaging, lighting, and electronics. Xuntai Aluminum guarantees consistent quality, timely delivery, and customized solutions for global customers.

1 - Industrial Advantage

Xuntai Aluminum is equipped with state-of-the-art production lines, precision rolling and cutting machines, and advanced testing equipment. We implement strict quality management and continuous technological innovation to ensure superior surface finish, consistent thickness, and excellent strength. With strong industrial capacity and stable output, we provide reliable aluminum materials that meet international standards for various industries worldwide.

2 - Price Advantage

Our price advantage is not because product quality is not good, instead, we have good sources of aluminum ingot based on our CEO relationship and experience. Please kindly contact us for detailed price and we believe it will make sense.

3 - Service Advantages

1. One-on-one VIP professional service
2. Experienced in exporting, and provide one-stop service from delivering to shipping for clients
3. Many years' experience in attending domestic and foreign exhibitions
4. Small samples can be provided for customer's testing & selecting at any time
5. Comprehensive technical support and service can be provided

4 - Qualification advantage

We hold a comprehensive portfolio of industry certifications and possess extensive experience, enabling us to uphold the highest standards of quality and compliance. Our dedicated team employs advanced technologies and rigorous procedures to deliver precise, reliable, and consistent solutions, ensuring client trust and long-term strategic partnerships.

CERTIFICATE

Certificate of Registration

Certificate No. : 30825Q0011R0

This is to certify that

HENAN XUNTAI NEW MATERIALS CO., LTD

Unified Social Credit Code: 91410381MA9F0NDA4D

Address: Group 4, Huilongwan Village, Gu County Town, Yanshi District, Luoyang City, Henan Province

Has been awarded this certificate for compliance with the standard
GB/T 19001-2016/ISO 9001:2015 standard

Certification Scope

Production of Aluminum Sheet and Aluminum Coil

Aluminum is a highly versatile material used across a wide range of industries, including construction, transportation, aerospace, packaging, electronics, energy, machinery, and consumer goods. Its lightweight, corrosion-resistant, and easily formable properties make it ideal for structural components, vehicles, aircraft, cans, foils, machinery parts, and everyday products worldwide.
