# HIMALAYAN NATURAL MINERALS

A SALT & MINERALS COMPANY

**HIMALAYAN NATURAL  
MINERALS (PVT.) LTD.**

## Who We are

We have been in the salt industry for the past 38 years and truly understand each market's individual custom-needs and strive to deliver what our customers exactly require. This is our 3rd generation in the salt business where we mine, process and manufacture salt products for many local and overseas clients. At present, our production capacity is 350 tons per day of finished product, while we have the capacity to increase this volume double-fold when needed, having 2 salt mines under our company's belt, we are free from "market shortages" or any other reasons to run out of raw materials supply and stock.

Our Head Office with management in the port city in Karachi. at present, we have two production plant located next to our company owned mine at Quaidabad and Kala Bagh city in Punjab Province. This facility also serves as stock-warehouse where we keep a few thousand tons of raw form rock salt at all times.

Although our main export business is for finished product after due processing of raw rock salt and turning it into food/edible grade salt, we also supply Raw Rock Salt in boulders form, just as it comes out of the salt mines.

Our company is committed to customer satisfaction by providing high value, debris and contaminants free, premium quality salt on time. The vision of the company is to make its name and reputation as the best-of-the-best Rock Salt supplier in Pakistan.

This vision will be met by providing salt that consistently not just meet, but exceeds the expectations and standards of our customers. All our production teams and associates form part of one consolidated effort to continually improve the value of our products. Continuous workshops and training and development of our workers and staff, which are our greatest asset, is always our priority. We believe in enabling our work force to build stronger partnerships with our customers.

We are committed to continually improve the effectiveness of our Quality System, while remaining in compliance to all major world standards. Management meetings on a regular basis, makes sure that we are on a continuous path to up-grading and improvements in our systems.

## Why Himalayan Natural Minerals

Himalayan Natural Minerals is one of the pioneering Pakistani salt manufacturing company, focuses greatly on satisfying its customers. But that alone is not reason enough for our customers to choose us over others. Natural Minerals would be a smart choice for all because We are ISO 9001:2015, HACCP, ISO 14001:2015, ISO 22000:2018, ISO 45001:2018, Halal, Kosher Certified.

## We are Good at

All products at Himalayan Natural Minerals are produced following strict principles of food safety and hygiene. Our emphasis on prevention of even the most remote possibilities of cross-contamination of all food salt products is exemplary and has given us a unique place in the industry.

## We are Dedicated

Our R&D department does not only focus on improving the quality of our products but is also focused on innovation in our production techniques.

## We keep it Green & Clean

We contribute our part in giving back to this planet with the use of clean methods to keep pollution controlled to its utmost possibility by recycling our wastewater and not flowing it down the sewers.

## Himalayan Natural Minerals is a **CERTIFIED** company.

# Himalayan Edible Salt

We have food/edible grades of salts, both in Sea Salt as well as Himalayan Pink Rock Salt, these are used in numerous food related industries like bread making, confectionary, bakery, cereals, butter and cheese, pickles and spices, etc., not to mention everyday kitchen and cooking needs in every household.

As shown in pictures, there are different 100% natural color shades of Himalayan Pink Salt available, different markets prefer different color shades and these color variations are due to differences in specifications and minerals content e.g. dark shades can indicate that the mineral content of iron oxide is higher than found in lighter shades of pink salt, even if coming out of the same mine shaft.

Edible Salt

## Our Packaging

We deliver the most aesthetic and convenient packaging range to fulfil the specific requirement of our customers.

Edible Salt

500g Paper Bag

1 Kg Standup Pouch

Edible Salt

## Rock Salt Lamps

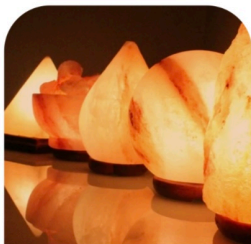

Millions of years ago massive geological changes and temperature to the extremes caused ancient oceans to get trapped under the crust of molten lava which formed a solid crust. The trapped oceans under the crust crystallized eventually over the span of millions of years, providing man one of the most important survival needs, salt.

### Benefits of Salt Lamps

Our products offer priceless health benefits as well as decoration purposes due to their unique look.

Rock Salt Crystal Lamps are highly suitable for daily use near televisions, computer, around smokers, in offices with air-conditioning, during massage therapy, in meditation rooms and anywhere else you want to restore and preserve the natural air quality.

## Quality Pledge

Looking for a reliable and trust-worthy manufacturing team of high quality traditional as well as carved, and shoped salt lamps ?

We believe in the therapeutic qualities of our salt lamps and take great care in choosing salty rocks that are free from artificial impurities.

In order for negative ions to disperse from salt lamps, the crystals must be heated. Each of our salt lamp is hand chipped and machine crafted for final touches, ensuring that the best combination of wall thickness and light power is achieved. You can be sure that you will reap the complete benefits of your salt lamp's therapeutic qualities.

The color of salt lamp ranges in hues of red, orange, apricot and white. No two lamps are ever the same since they are made out of natural rocks that vary in tones and shades of color even if they come from the same salt mine.

Our salt lamps come fully assembled with UL, CSA, CE approved power cords, bulbs and switches. Please specify your country to get the appropriate plug type when placing an order.

When you choose to take home a piece of the earth with you, be sure it comes with the quality of Himalayan Natural Minerals.

Order with complete confidence for we select and ship only the finest quality salt lamps. We shrink wrap and pack them carefully to ensure they arrive safely and in best condition.

## Applications of Salt Lamps

Negative ions cleanse the air of:

Dust

Dust mites

Smoke

Pollen

Animal dander

Odour

### At Work:

- \* Minimizes stress levels.
- \* Improves physical as well as mental capabilities as a direct result of fresh clean and healthy air.
- \* Minimizes positive ions from the atmosphere that come from the use of computers.
- \* Controls and reduces the electromagnetic rays emitting from the computer screens.

### At Home:

- \* Purifies air and improve air quality for a healthier life.
- \* Makes the environment cozy and relaxing.
- \* Reduces all day fatigue.
- \* A good decoration in your living room and bedroom.

# Industrial Salt

Salt is used as a vital ingredient in various diverse industries. Our common usage articles that form and encase our daily lives, such as, the clothing we wear cannot be color-dyed without salt, the fuel and lubricants we use in our motor vehicles is finished and made usable by treating it with salt, the fertilizers that enrich food grain fields wouldn't be possible if it weren't treated with a mixture of processes that rely on salt

alone, the shiny and warm leather wear to keep us warm in winters, has been cured and treated with salt not just to kill its bacteria but also to give it the glowing finish and texture you feel in your branded leather bags and wearables, Salt tablets for water softening. These are just a few basic uses of industrial salt, the list goes on as do your thoughts and imagination when you think 'industry'.

## Industries we Cater

We cater a wide range of industries with the purest natural Himalayan Salt.

## Bath Salt

Straight from the mountains of Himalayas, we have especially hand-picked, hand washed and hand sorted bath salts for our valued customers. Our bath salts have proven to be a very effective remedy for the control of stress, tiredness, insomnia, arthritis, aches, muscle spasms, skin conditions and mental or physical fatigue.

Prepared naturally with no chemicals added, untreated and unscented bath salt crystal rocks make the bathing experience more relaxing and soothing.

Adding salt crystals to your bath not only counters aches and pains, but helps to soften and beautify your skin by cleaning your pores and detoxifying your body.

Personal Care

Bath Salts are also popularly used in health and beauty spas, salons, massage parlors, health clubs and hydrotherapy treatment facilities.

Himalayan Natural Minerals offer many different grades of bath salts. Rocks ranging approximately from 2mm to 4" in size are used for this application. We have just added a new soap size in addition to other sizes which has become very popular amongst our customers. Many

different packaging options are also available from simple poly bags to artistically manufactured cotton pouches with strings.

You can relax and de-stress with a mineral rich bath using just a small scoop of our bath salts. The water infused with over 80 natural minerals is soaked up in the skin, the process is called dermal absorption, through which all minerals are absorbed by the body.

Prepared naturally with no chemicals added, untreated and unscented bath salt crystal rocks make the bathing experience more relaxing and soothing.
