China Professional Aluminum Extrusion Profiles Manufacturer and  
Exporter — Your Best Business Partner!

---

# Company Profile

- Syntech Metals Limited - Your Trusted Aluminum Profile Partner Since 1993

For over 30 years, Syntech Metals Limited has been at the forefront of aluminum profile manufacturing in China. What started as a vision in 1993 has grown into a partnership-driven company that serves clients across every continent.

- In recent years we have also become a major player in the market of operations. Besides a large amount of Aluminum windows door profiles, Curtain wall profiles, Aluminum cabinets, Construction profiles, we are also a supplier of Industrial profiles, etc. Also, profiles with CNC processing belong to our range.
- Africa, South America, Central America, Southeast Asia, Mid East, North America, South Asia, Oceania, Western Europe are our primary market.
- Factory area: 100,000 square meters, 17 units ranging from 500 to 10000 tons of extrusion machine.
- 
- 7 Reasons How You Can Stay Ahead of Your Competition By Choosing Syntech Metals Limited As Your Key Supplier
  - Great flexibility in design and supply.
  - Approved by ISO 9001:2008 & ISO 14001:2004, products strictly according to ASTM with high-quality standards.
  - Exceptional Customer service & R&D team.
  - High-quality control system.
  - You will have access to a huge product range, including custom-made.
  - You will be guaranteed prompt delivery of goods & services.
  - Producing a healthy and safe environment for our employees.

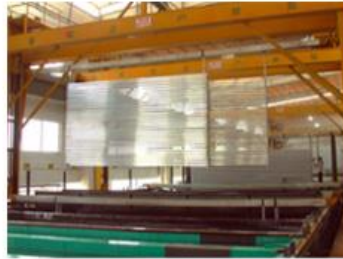

# Certification

# Workshop

# Core Advantage

## Exceptional Service

- . Professional R&D team
- . Professional merchandiser team
- . Professional after-sales team

## Creative Solutions

- . Listening to you and responding to your needs with market specific solutions

## We Focus On

- . Diverse surface treatment
- . Processing capacity
- . Timely delivery

## Advantage

- . Manufacturing and trading combo
- . More than 20 years experience in aluminum business
- . Leading technology

# Product Range

## Window & Door Profiles

- Sliding Window & Door
- Casement Window & Door
- Custom made design
- Window door system, Curtain wall system available. OEM & ODM available

## Custom-made Profiles

- Made the profiles tailored for you
- 17 units ranging from 500 to 10000 tons of extrusion machine, can meet your needs.

## Industrial Profiles

- Standard profiles (tube, channel, angle, etc.)
- Heatsink profiles
- Led profiles
- Solar profiles

# CNC Machining

- With the development of the aluminum industry, we have our own CNC processing factory, the quality control and delivery time are greatly guaranteed, and the cost is saved.
- We can provide punching, drilling, tapping, bending, milling, cutting, etc CNC processing.

# Surface Finished

## Mill Finished

- National standard raw aluminium material which is available for any kind of surface treatment afterwards are adopted.

## Anodized

- Can hardly find mechanical lines on the surface
- The surface can hardly be scratched with an anodizing thickness between 8 and 30  $\mu\text{m}$
- Small scratch marks can be easily removed

## Powder Coated

- Lots of colors are available
- Can customize the colors based on your samples
- The surface is smooth enough without any particles
- Coating thickness between 45-120  $\mu\text{m}$

# How To Choose High Quality Aluminum Profiles

## National standard raw aluminium material:

- Section incision smooth and bright
- Available for any kind of surface treatment afterwards are adopted.

## Recycling aluminium alloy:

- Section incision rough and dull
- Not available for polishing and other special surface treatment
- The hardness and planeness cannot meet general standards.

# Social Responsibility

Our aim is to gear all business activities towards protecting and conserving nature. Our environmental policy is based on the following principles:

- Manufacturing only aluminum profiles that pose no risk to the environment when they are used as intended by customers and consumers.
- Conserving natural resources by using raw materials and energy responsibly.
- Using environmentally-friendly technology in research and production. By doing so, we increase safety in the workplace and protect our communities and the environment.
- Avoiding and reducing waste; using environmentally-friendly disposal systems.
- Reducing risks to soil, air and water to the greatest extent possible
- Preparing for potential dangerous situations in order to protect both people and the environment.
